8.6.Query/WebQuery.....	104
8.7.Share button shortcuts	105

1. Introduction

Users can connect to the Click&DECIDE Web Portal installed on a Server machine, inside or outside your organization. All you need is a supported browser. If you wish to run items such as Cubes coming from a 32-bit version of Click&DECIDE, you will be prompted to install the Microsoft Office 2003 Web Components on your local computer as well as the Click and DECIDE Cube ActiveX (32-bits).

The following browsers are supported: Internet Explorer version 9 or greater, Google Chrome (except for the cubes), Mozilla Firefox (except for the cubes). User profiles are defined by the System Administrator via the Click&DECIDE Administration Manager tool.

The new Click&DECIDE 64-bit version 15 still provides the way to create easy Dashboards using the Google Charts without the need to install nothing on the client workstation connected to the new Web Portal. Note that the use of the Google Chart Dashboards requires access to Internet and a browser such as Internet Explorer version 9 or greater, Google Chrome or Mozilla Firefox.

The new Click&DECIDE 64-bit version 15 Web Portal has been improved to be run better than before from an iPad, an Android tablet or smartphones such iPhone or Android phones.

The main new features of the Click&DECIDE 64-bit version 15 Web Portal are the Pivot Table that can most of the time replace the Microsoft Cubes, the Calendar Shared Folders and the new way to define, manage and display the Favorites and the RSS Feed. For the Calendar Shared Folder, please refer to the [BAI 2015 Click and DECIDE Administration User Guide for more information](#).

2. Connecting to the Web Portal

To connect to the Click&DECIDE Web Portal, please follow the steps below:

1. Open your Internet browser.
2. Enter the following link: http://server_name/dvweb
Note: the server_name can be the name of the server machine, the IP Address or a domain URL.
3. Press **Enter**.
4. **Note:** depending on the Click&DECIDE Web Server configuration, you will be prompted for a login unless Windows Authentication has been setup and depending on the Browser configuration.

2.1. Connection as a Standard User

In that case you do not belong to a **Super Administrator** group defined in the **Click&DECIDE Administration Manager**.

2.1.1. Under Click&DECIDE Authentication

You can use the proposed **Guest** account unless you have defined other Users.

1. Enter the **User Name**: Guest
2. Enter the **Password**: guest

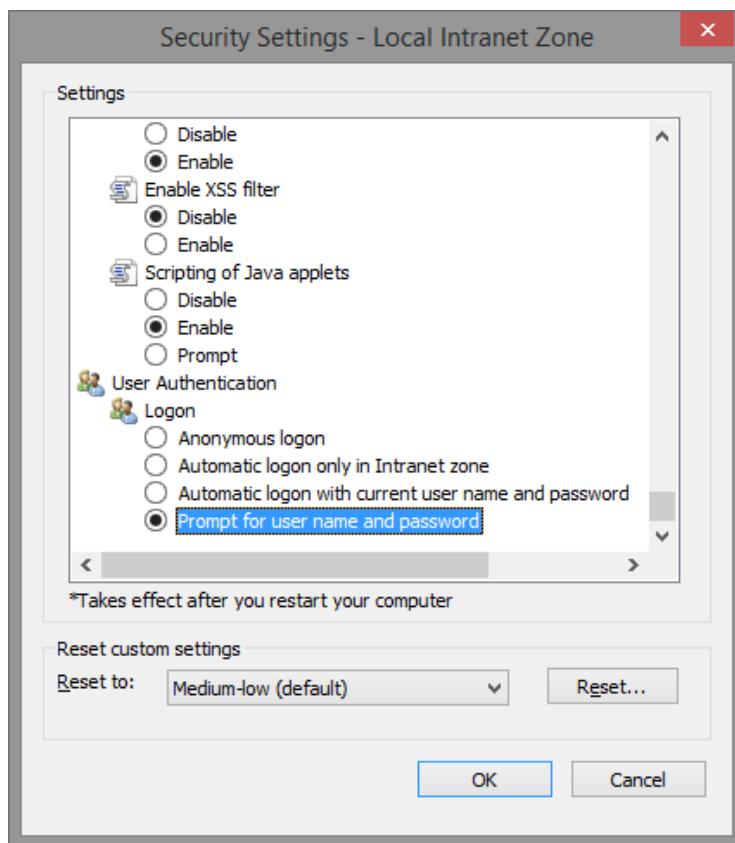

3. Click **OK**.

2.1.2. Under Windows Authentication

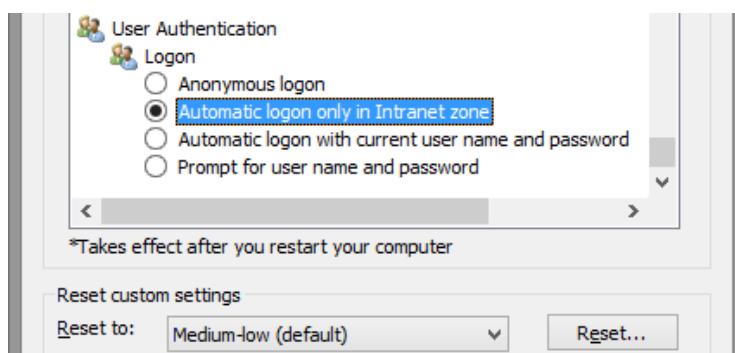

You do not need to Log in, except if your Browser configuration requires an Authentication.

Example: Under I.E.: go to Tools > Internet Options > Security then click “Local Intranet” and “Custom Level”, then go to the end of the list and check the option defined for “User Authentication”: a login can be required with the following option:

And no login will be required with the following option or the option “Automatic logon with current user name and password”:

2.1.3. Standard Menus and Commands

As you are not belonging to a Super Administrator Group, you only will see the authorized menus for the Group you belong to, defined by the System Administrator via the Click&DECIDE Administration Manager in the Server, and the authorized commands will be the **Browse** button, the **Configure** button and the **Create** Button.

The screenshot shows the Click and DECIDE Web Portal interface. At the top, there's a browser header with the URL http://localhost/dvweb, the title Click and DECIDE Web Portal, and standard window controls. Below the header is a navigation bar with a home icon, [Guest] Logout, and a search bar. The main content area is divided into two sections: 'Menus' on the left and 'Favorites' on the right. The 'Menus' section contains three items: 'Browse', 'Configure', and 'Create'. The 'Favorites' section is currently empty. At the bottom of the page is a footer with the Click&DECIDE logo, copyright information (Copyright Click&DECIDE 2010-2014), and links to Support and Terms & Conditions.

If you click the left vertical greyed bar, you will see the Left Menu Tree, with only the BAI Demonstration Menu, authorized for the WebUsers Group by default:

This screenshot shows the Click and DECIDE Web Portal interface with the left menu tree expanded. The 'Browse' item is selected, revealing its sub-menu 'BAI Demonstration'. The 'Configure' and 'Create' items remain in their respective green-colored sections at the bottom. The rest of the interface, including the 'Menus' and 'Favorites' sections and the footer, remains the same as in the previous screenshot.

From an iPad or Android Tablet or Smartphone only the right pane will be displayed as on the first above picture.

On the above screen, a Standard User only will access to the following commands:

Click **Browse** to display the Menu List defined for the Group you belong to.

Click **Configure** to customize this Home Page, see your Credential, manage your Data Source Logins and manage your Favorites.

This screenshot shows the Click and DECIDE Web Portal interface with the 'Configure' tab selected. The main content area displays three options: 'View', 'Favorites', and 'Authentication', each with a corresponding icon.

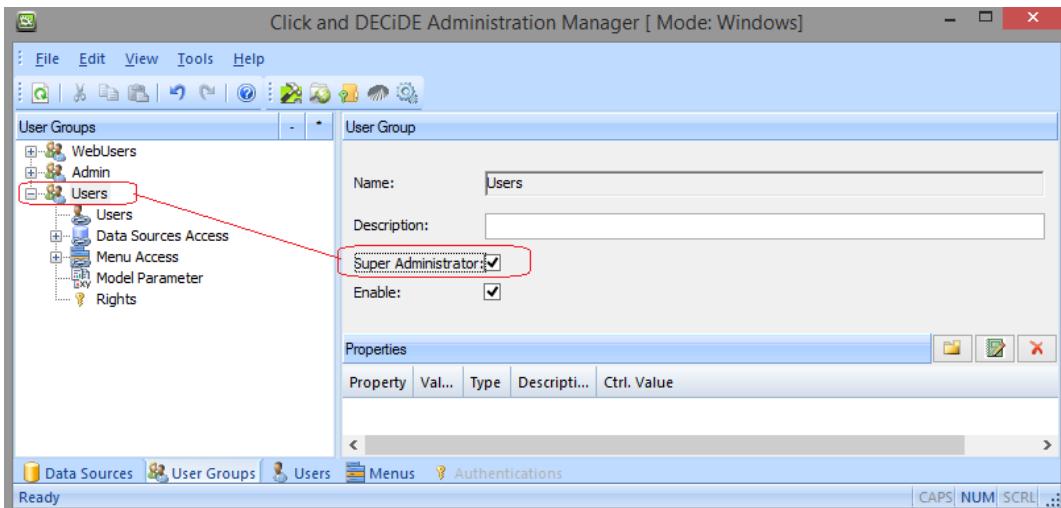

Click **Create** to get a choice between the Google Dashboard Editor and the Pivot Table Editor.

This screenshot shows the Click and DECIDE Web Portal interface with the 'Create' tab selected. The main content area displays two options: 'Google Dashboard' and 'Pivot Table', each with a corresponding icon.

2.2. Connection as a Super Administrator User

In that case you belong to a **Super Administrator** group defined in the **Click&DECIDE Administration Manager**.

2.2.1. Under Click&DECIDE Authentication

You can use the proposed **Admin** account unless you have defined other Users.

1. Enter the **User Name**: Admin
2. Enter the **Password**: admin

3. Click **OK**.

2.2.2. Under Windows Authentication

You do not need to Log in, except if your Browser configuration requires an Authentication.

Example: Under I.E.: go to Tools > Internet Options > Security then click “Local Intranet” and “Custom Level”, then go to the end of the list and check the option defined for “User Authentication”.

2.2.3. Super Administrator Menus and Commands

As you are belonging to a Super Administrator Group, you will see the authorized menus for the Super Administrator Group you belong to, defined in the Click&DECIDE Administration Manager in the Server, and the authorized commands will be the Browse button, the Configure button, the Schedule button, the Create Button and the Publish button.

The screenshot shows the Click and DECIDE Web Portal homepage. The top navigation bar includes links for 'Menus', 'News', and 'Favorites'. The 'Menus' section contains links for 'Browse', 'Configure', 'Schedule', 'Create', and 'Publish'. The 'News' section displays a message: 'No RSS Feed to display' with a small RSS icon. The 'Favorites' section is currently empty. At the bottom, there is a footer with the Click&DECIDE logo and copyright information: 'Copyright Click&DECIDE 2010-2014 | Support | Terms & Conditions'.

Note: as a Super Administrator, you are authorized to perform the **Standard** command plus the following commands:

- Click **Schedule** to define or edit Schedule tasks, for example schedule the generation of a specific report, and sent this report to a list of recipients at the date and time you wish.
- Click Schedule then **Tasks** to define or edit Tasks, but also to define or edit **SQL** or **Generic Tasks**.

The screenshot shows the 'Tasks' page. It features a table with columns for 'Name' and 'Type'. A single task named 'Purge RSS Feed Table' is listed, categorized as 'sql'. Below the table are two buttons: 'New SQL Task' and 'New Generic Task'. A red arrow points from the text 'These commands are only available for the users belonging to a Super Administrator Group!' to the 'New SQL Task' button. The text is displayed in red at the bottom of the table area.

- Click **Publish** to create and edit RSS Feeds. Note that Highlights and Information feeds have been removed from previous version 13 (32-bit).
- Click **Configure** to customize the Home Page, see your Credential and manage your Data Source Logins, see the users who are currently connected to the Web Portal and manage your Favorites.

The screenshot shows the 'Configure' page. It lists several management options: 'View', 'Favorites', 'Authentication', and 'Connected Users'. A blue arrow points from a callout box to the 'Connected Users' link. The callout box contains the text: 'This command is only displayed for Super Administrator Groups OR for User Groups or Users having the right "_P User_Manage" defined to "Allow"'.

As you can see in our demo database installed with the software, the Admin User gets more menus than the Standard User (Menus BAI .Demonstration + BAI Tools + Web Portal Statistics):

The screenshot shows the Click and DECIDE Web Portal interface. The left sidebar has a tree view with 'BAI Demonstration' expanded, showing 'BAI Tools' and 'Web Portal Statistics'. Below this is a vertical stack of buttons: 'Configure', 'Schedule', 'Create', and 'Publish'. The main right pane lists various report types under 'Name': Dashboards, Dynamic Reports, Dynamic Queries, Excel Integration, Report with URL link, Dynamic Pivot Tables, Others, Static Reports, Click and DECIDE Builder, Shared Folder, Calendar Folder, and My Group Folder.

Note that, by default, only users belonging to a **Super Administrator Group** can see the **Schedule** and **Publish** command, but also can see the **Connected Users** in the **Configure** command.

Now, a new feature in Click&DECIDE Administration Manager version 15, allows the Click&DECIDE Administrator to apply some **specific rights** to any User Group or User.

The screenshot shows the Click and DECIDE Administration Manager interface. On the left, there is a tree view of user groups: 'WebUsers', 'Admin', and 'Users'. The 'Users' group is selected and expanded, showing 'Data Sources Access', 'Menu Access', 'Model Parameter', and a 'Rights' node. Red arrows point from the 'Rights' node to the 'Rights' table on the right. The table has columns: Right, Authorizati..., and Description. It lists various permissions with their descriptions, such as '_P Pivot_Create' (V: Deny, Allow[(All)]), '_P Dashboard_Create' (V: Deny, Allow[(All)]), and '_P User_Folder_Delete' (Allow, V: Deny, Allow[(All,Menu.Desc)]).

Please refer to the [BAI 2015 Administration Manager User Guide](#) for more information about these rights:

2.3. Hiding the Left Pane Menu list:

It is easy make the left menu pane wider or narrower or hidden, as necessary (depending on the size of the report, query, pivot table or Dashboard you want to display in the right pane, or the length of a URL, report name you want to view in the left menu pane).

2.3.1. Modify the size or Hide the Left Menu Pane:

To make the left Menu pane narrower: select the vertical bar and drag it to the left.

To make the left Menu pane wider: select the vertical bar and drag it to the right.

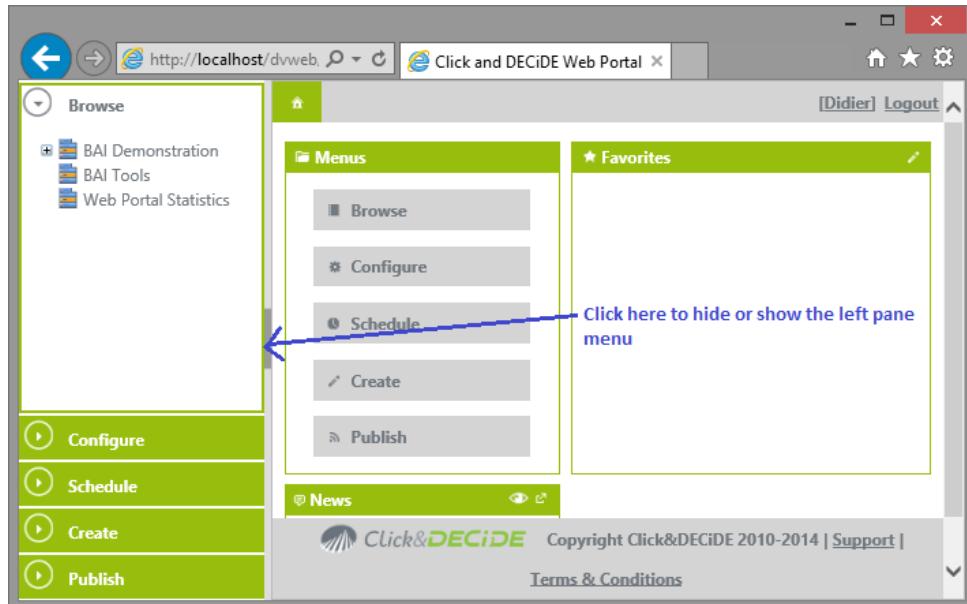

To hide the left Menu pane: click the vertical bar to hide the Left Menu pane.

To show the left Menu pane: click the left vertical bar to show the Left Menu pane.

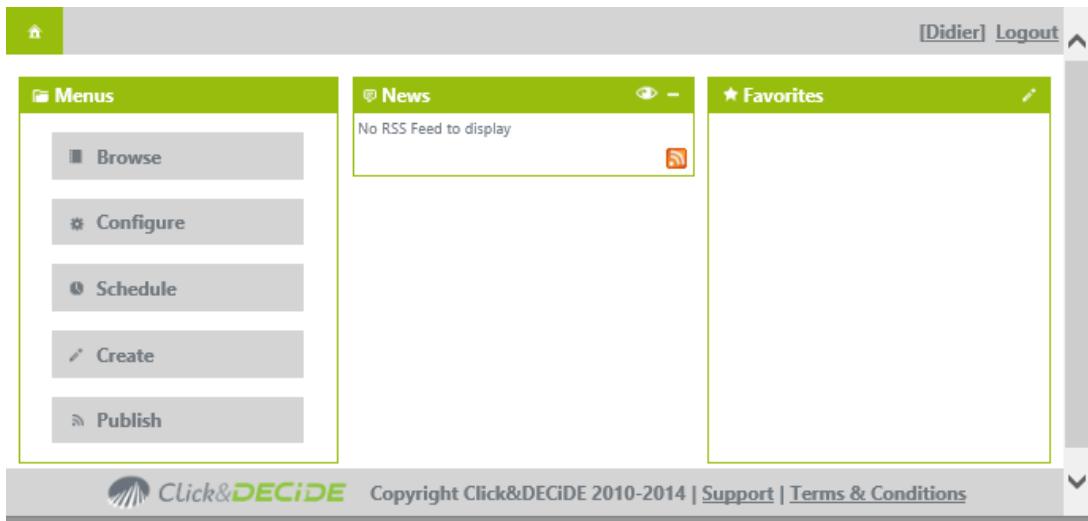

2.3.2. Hide or Display The Banner:

The **Top Banner** with the Click&DECIDE Logo existing in version 13 has been removed to give more places to the Web Portal usable area. Nevertheless you can modify the [background picture](#) used by the Theme you have selected. (See the command Configure > View > Theme).

Click the Home Page icon to go back to the Home Page.

Note: you also can directly get the Web Portal without the Left Menu Pane List by replacing <http://localhost/dvweb/> with <http://localhost/dvweb/Home.aspx>

This is the mode used with iPad, iPhone or Android Tablets and Smartphones

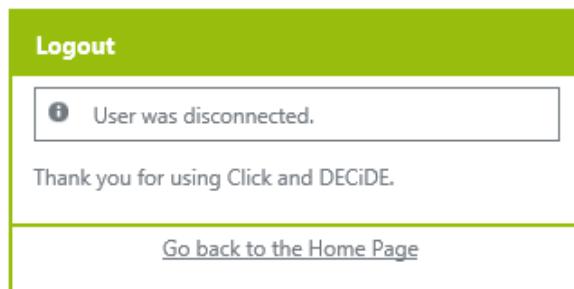

2.4. Logging Out of the Web Portal

To log out of the Web Portal, just click the "**Logout**" button on the right of your [User-ID]:

You will be disconnected from the Server, allowing another user to login in your place. The number of users connected will depend on the License Certificate for the Server. The License Certificate can include a number of CALs (Client Access License for identified users) and/or a number of Concurrent Users. For Concurrent Users, when you disconnect, another Concurrent User can connect in your place. Note that you will be disconnected from IIS in the Server after a time out (the default time out is 10 minutes).

This message will appear, allowing you to reconnect by clicking "Go back to the Home Page":

Note also that when a User is inactive more than the duration defined in the Timeout, he is automatically disconnected. When he clicks again to a Menu Item, he is automatically reconnected if the maximum number of users is not reached.

2.5. Refreshing the Menu

With the new Click&DECIDE Enterprise Version 2013 and greater, any new file located in a Shared Folder will automatically be displayed when accessing this shared folder. You do not need any more to refresh the Menu content as it was necessary with previous versions of Click&DECIDE.

Nevertheless, if the Menu Structure has changed because you added a new shared folder or a new branch, or modify an output format etc. you need to **refresh the Menu by disconnecting** from the Web Portal and **reconnecting** again.

3. Configure

3.1. View

The **View** command enables any user (Standard Users and Super Administrator Users) to modify:

- The Click&DECIDE Web Portal's Theme (Background and Menu Look)
- The language to be used
- The date, time and numeric formats
- The Enable OWC Cube option: activate this option if you wish to run existing cubes made with Click&DECIDE Builder version 13 (32-bit) or created with the client version 13.1 (32-bit) as Cubes cannot be created anymore with Click&DECIDE version 15 (64-bit).

The previous option to enable any user to display or hide the product information when opening the Web Portal has been removed as now the information about the version used is given through an RSS Feed if the current version is not up to date, and the provider information for support is now displayed in the Home page according to the Group type. See the bottom part of the Home Page:

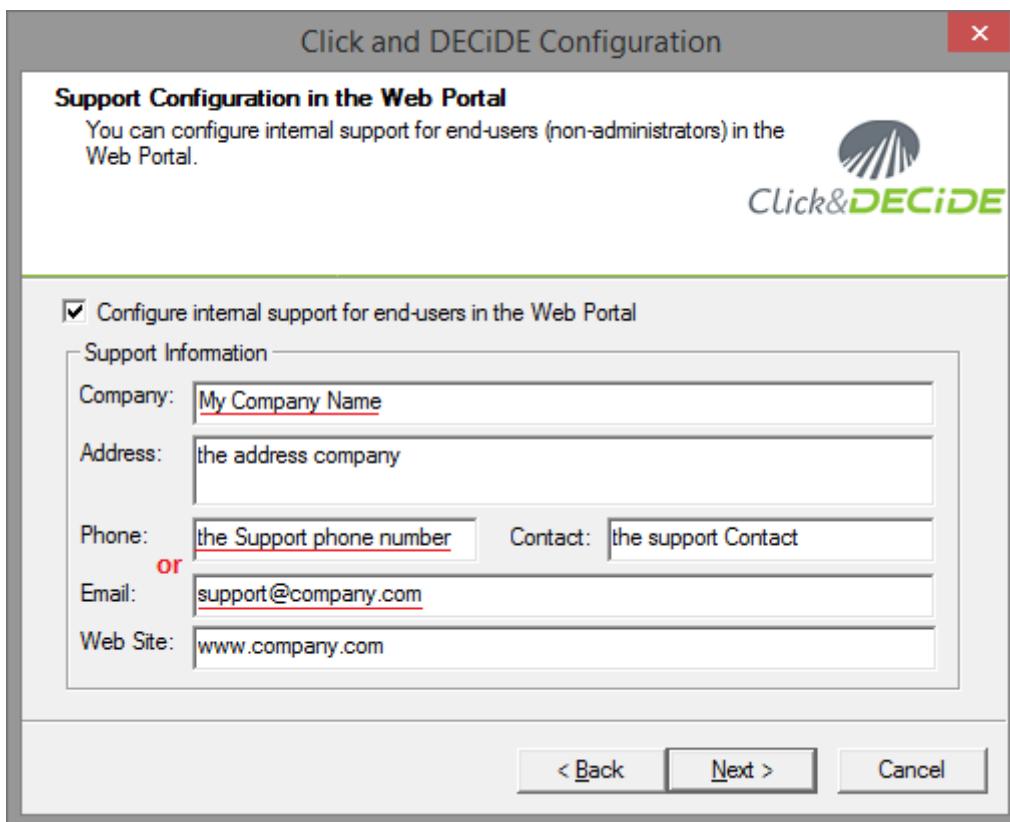

If the Group is a "Super Administrator" Group, then clicking the Support link will display information about how to find support directly with the Click&DECIDE Company.

The screenshot shows a support page with a green header bar containing the word "Support". Below the header, there is a message: "For any information or support, please contact our team:". Underneath this message, there is a list of contact details:

- Company: Click & DECIDE
- Address: 130, Rue Baptistou
ZAE NORD
34980 Saint Gély du Fesc
France
- Phone: [+33 467 844 800](tel:+33467844800)
- Email : order@clickndecide.com
- Contact: Didier Chavanne
- Web Site: <http://www.clickndecide.com/>

If the user does not belong to a Super Administrator Group, then the information displayed by the Support link is the one the Company has entered when installing the product, as the Wizard Configuration provides to feed this optional window:

Refer to the [Click and DECIDE Setup User Guide 2015](#) for more information. (Text underscored with red is mandatory, other fields are optional).

3.1.1. Theme:

Select the skin you want from the drop-down list. Several skins are available by default:

- **Click and DECiDE:** the Click&DECiDE skin in green, grey and white.

This screenshot shows the Click&DECIDE application interface in its green-themed skin. The top navigation bar includes a home icon, the Click&DECIDE logo, and links for [Admin] and Logout. The main content area is divided into three panels: 'Menus' on the left with options like Browse, Configure, Schedule, Create, and Publish; 'News' in the center showing a message about no RSS feed to display; and 'Favorites' on the right which is currently empty. The footer contains the Click&DECIDE logo and copyright information for 2010-2014, along with links for Support and Terms & Conditions.

- **Blue:** a Blue skin.

This screenshot shows the Click&DECIDE application interface in its blue-themed skin. The layout is identical to the green theme, featuring a blue header bar, a green sidebar for menus, a central news panel, and a white favorites panel. The footer remains consistent with the green theme's branding and copyright information.

- **Darkness:** a black background, and white text.

This screenshot shows the Click&DECIDE application interface in its 'darkness' theme, characterized by a black background and white text. The menu sidebar, news panel, and favorites panel all use a dark color scheme. The footer follows the same pattern as the other themes, with the Click&DECIDE logo and copyright information.

- **Metro:** a Windows 8 or Windows 10 look, soft and flat.

The screenshot shows the Click&DECIDE interface in the Metro theme. The top navigation bar is light gray with the Click&DECIDE logo and Admin Logout links. Below is a green navigation bar with 'Menus' (Browse, Configure, Schedule, Create, Publish) and 'News' (RSS feed placeholder). To the right is a large white area labeled 'Favorites'. At the bottom is a dark footer bar with the Click&DECIDE logo and copyright information.

- **Surf:** an acid green, orange and pink skin with surf icons.

The screenshot shows the Click&DECIDE interface in the Surf theme. The top navigation bar is dark with the Click&DECIDE logo and Admin Logout links. Below is a dark navigation bar with 'Menus' (Browse, Configure, Schedule, Create, Publish) and 'News' (RSS feed placeholder). To the right is a large white area labeled 'Favorites'. The background of the main area is decorated with several surfboards and flip-flops in various colors (orange, pink, purple, blue). At the bottom is a dark footer bar with the Click&DECIDE logo and copyright information.

- **Customize your Theme!**

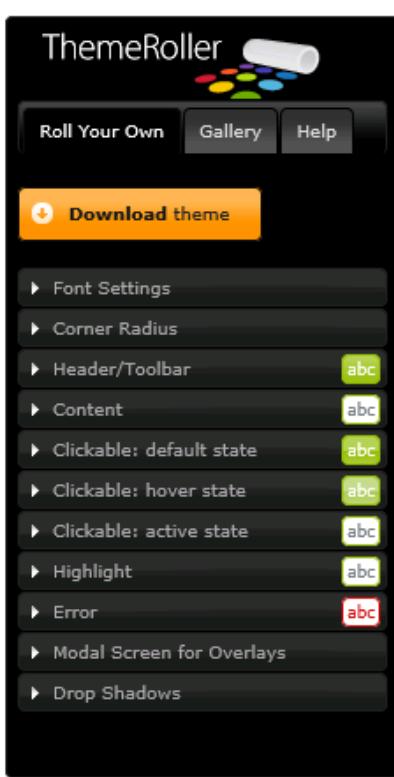

You also can customize your Theme using "JQuery" doing the following steps:

- a) Start with any of the existing Theme (except the Metro Theme), for example start using the Click&DECIDE Theme.
- b) In the Server where Click&DECIDE Enterprise is installed, go to the directory:
C:\Program Files\Click and DECIDE\dwweb\App_Themes
- c) Copy the "Click and DECIDE" directory under a new name, for example "My Personal Theme".
- d) Go to the C:\Program Files\Click and DECIDE\dwweb\App_Themes\My Personal Theme\jquery.ui directory

- e) Open the jquery-ui-1.9.2.custom.min.css file with a text editor
- f) In the row number 4 select the full link beginning with [http://jqueryui.com/themeroller/.....](http://jqueryui.com/themeroller/)
- g) Paste this link into a browser and press Enter
- h) In the JQuery ThemeRoller you can customize the skin step by step using the “Roll Your Own” Tab or select an already prepared theme in the Gallery Tab:

ThemeRoller

Accordion

▼ Section 1

Mauris mauris ante, blandit et, ultrices a, suscipit eget, quam. Integer ut neque. Vivamus nisi metus, amet, nunc. Nam a nibh. Donec suscipit eros. Nam mi. Proin viverra leo ut odio. Curabitur malesuada vulputate.

► Section 2

► Section 3

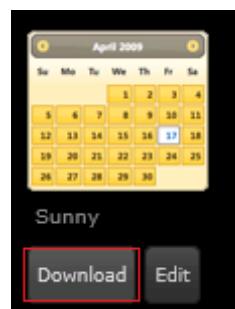

Tabs

First Second Third

Lore ipsum dolor sit amet, consectetur adipisciing elit, sed do eiusmod tempor incididunt ut labore e
veniam, quis nostrud exercitation ullamco laboris nisi ut aliquip ex ea commodo consequat.

Reverse page background color

- i) Rool You Own: define yourself what you want to change (Font, Corner radius, Colors etc)
- j) Gallery: select the existing Gallery template that you wish to use.
- k) In both case, finish by clicking “**Download theme**”
- l) Select for example the “Sunny” **Gallery** Template and click the Download button just under the template picture:

- m) In the Download Builder screen, select the **1.9.2 option**:

Quick downloads: [Stable \(Themes\)](#) (1.10.3: for jQuery1.6+) | [Legacy \(Themes\)](#) (1.9.2: for jQuery1.6+)
[All jQuery UI Downloads](#)

Version

- 1.10.3 (Stable, for jQuery1.6+)
 1.9.2 (Legacy, for jQuery1.6+)

- n) Keep **Toggle All** selected:

Components

- Toggle All

- o) In the bottom of the page, replace “Sunny” with “custom” in the **Theme Folder Name** box:

Theme

Select the theme you want to include or [design a custom theme](#)

Sunny ▾

Theme Folder Name:

custom X

CSS Scope:

[]

Download

- p) Click **Download**

- q) Save the “jquery-ui-1.9.2.custom.zip” file in a temporary directory

- r) Open the jquery-ui-1.9.2.custom.zip file and select inside the content of :

C:\Temp\jquery-ui-1.9.2.custom.zip\jquery-ui-1.9.2.custom\css\custom

Those means select and copy these 2 files and the image directory:

Name	Type	Compressed size	Password
images	File folder		
jquery-ui-1.9.2.custom.css	Cascading Style Sheet Docu...	7 KB	No
jquery-ui-1.9.2.custom.min.css	Cascading Style Sheet Docu...	6 KB	No

- s) Now go to the C:\Program Files\Click and DECIDE\dwweb\App_Themes\My Personal Theme\jquery.ui directory

- t) Select and delete the following file and directory

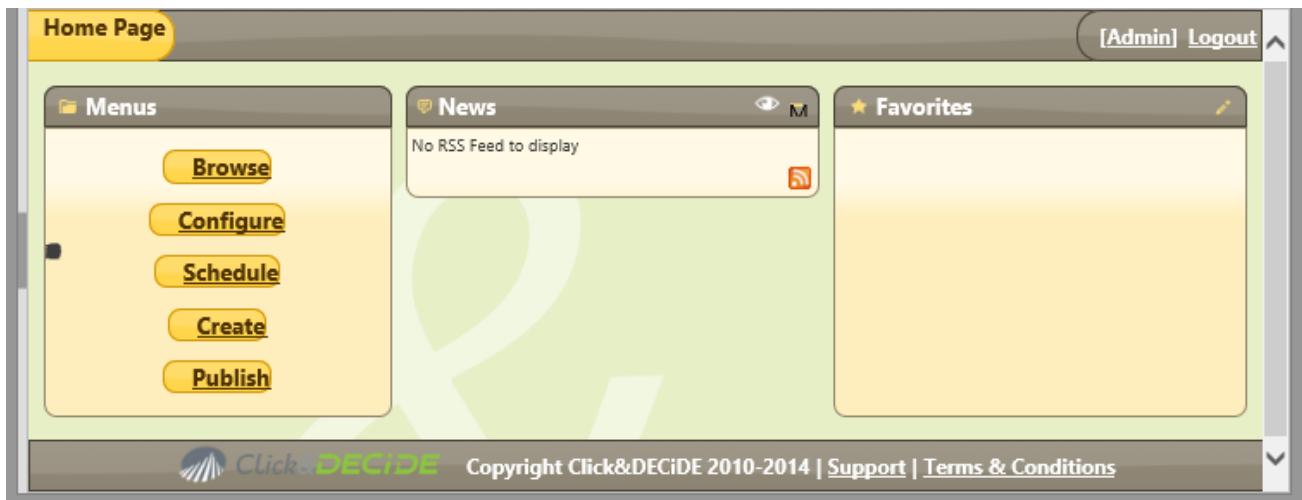

Name	Date modified	Type	Size
images	8/5/2013 4:49 PM	File folder	
jquery-ui-1.9.2.custom.min.css	6/12/2013 11:57 AM	Cascading Style Sh...	

- u) Paste the directory and the 2 files copied in step "r"
- v) Go back to the Web Portal and Refresh it using <F5>.
- w) Now the new "My Personal Theme" will appear in the list:

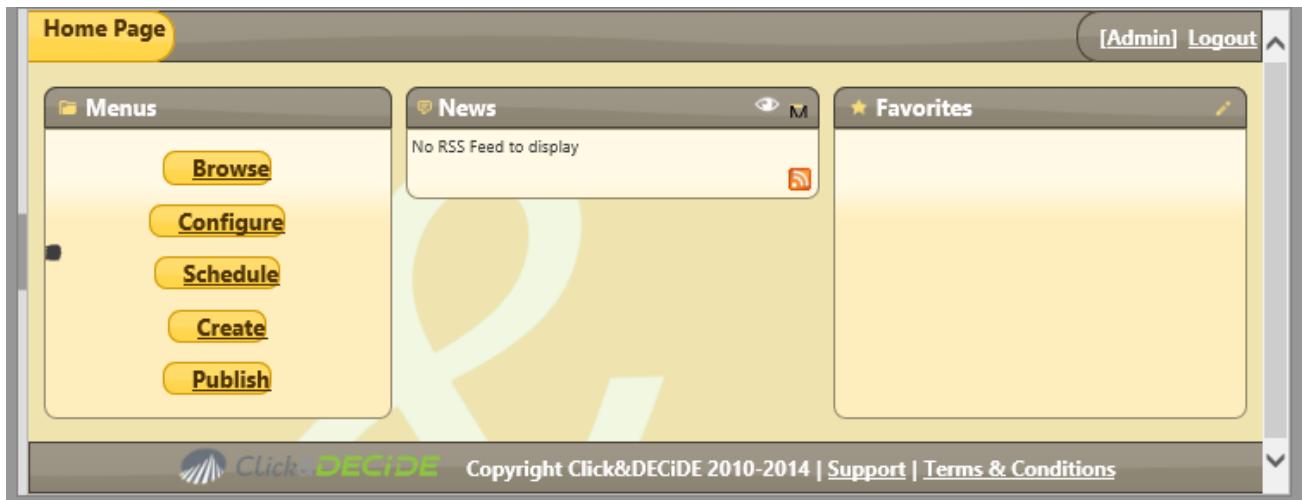

- x) Select this Theme to use it.

- y) How to change the Background pictures?

Go to the C:\Program Files\Click and DECIDE\dvweb\App_Themes\My Personal Theme\Images directory and replace the background.png picture by another picture of your choice, for example a similar yellow light picture instead of green.

Check the result by refreshing the Web Portal

z) How to remove a Theme?

Just remove the directory corresponding to this Theme in the C:\inetpub\wwwroot\dwweb\App_Themes directory and refresh the Web Portal.

3.1.2. Language:

Click the country flag for the language you wish the menus to be displayed in. The following languages are available: Spanish, German, English, Catalan, French, Italian and Russian.

3.1.3. Date, Time and Numbers

Select in the list the Country you need to format the date, time, timestamp and numeric data when they are not already formatted by the query, report or cube. This applies specially when using Web Queries links into an Excel spread sheet.

3.1.4. Enable OWC Cube

As Builder 64-bit cannot create Cubes anymore because the requirements are no longer supported by Microsoft in 64-bit mode, you can nevertheless still continue to display the Cubes made previously with a Click&DECIDE Builder version 13 (32-bit) or using the client Builder version 13.1 (32-bit) delivered with the Click&DECIDE version 2015 (64-bit).

You will need to install the Office Web Components 2003 and C&D Cube ActiveX (for 32-bits Internet Explorer browser only or for I.E. version 11 as this one works making a new process in 32-mode).

Of course to make it working through the Web Portal version 2015, you need to enable this option:

Requires Office Web Components 2003 and C&D Cube ActiveX (for 32-bits browser only)

3.2. Authentication

The **Authentication** command enables any user (Standard Users and Super Administrator Users) to see their credentials (User ID, Rights, Groups and Computer IP Address) and manage the Data Source Logins if needed.

3.2.1. Windows Authentication

If the **Windows Authentication Mode** has been defined in the Server, then you are a user identified in a Windows Group and you belong to the same Windows Group defined in the Click&DECIDE Administration Manager in the Server. The **Authentication** box will appear as follow:

The screenshot shows the Click&DECIDE Administration Manager interface. The left sidebar has buttons for Browse, Configure, Schedule, Create, and Publish. The main area has tabs for Configure and Authentication. The Authentication tab is active, showing the following details:

- You have been authenticated by Windows as:**
 - User: Didier-Portable\Didier
 - Groups:
 - INTERACTIVE
 - Local account
 - Microsoft Account Authentication
 - This Organization
 - Users
- Your Server Administrator Credentials:**
 - User: Didier
 - Rights: Administrator
 - Groups: USERS
 - @IP ::1
- Manage Data Source Logins**: A table with columns for Data Source, User ID, and Password. A button "Add a new data source login" is at the bottom.

The Rights could be “User” if you do not belong to a “Super Administrator” Group or “Administrator” if you belong to a “Super Administrator” Group in Click&DECIDE Administration Manager.

The IP Address of your computer also appears here.

3.2.2. Click&DECIDE Authentication

If the **Click&DECIDE Authentication Mode** has been defined in the Server then the Groups are the one you belong to, defined in Click&DECIDE Administration Manager. The Authentication box will appear as follow:

Data Source	User ID	Password
Add a new data source login		

The Rights could be “User” if you do not belong to a “Super Administrator” Group or “Administrator” if you belong to a “Super Administrator” Group in Click&DECIDE Administration Manager.

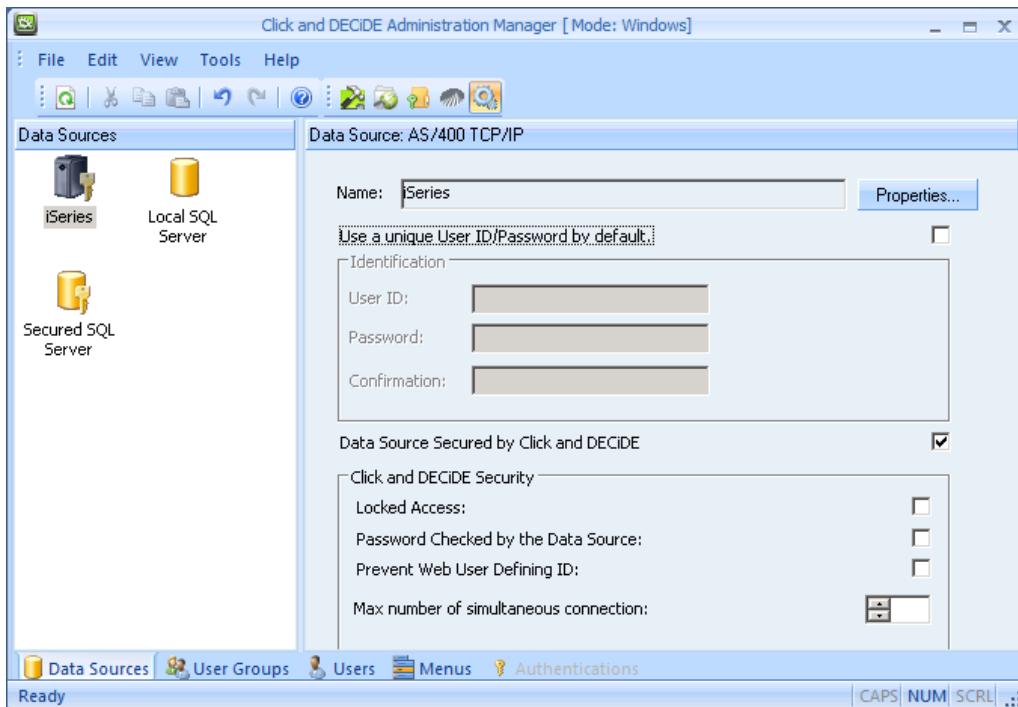

The IP Address of your computer also appears here.

3.2.3. Manage Data Source Logins

This feature allows the user to connect to a database that is not using the Windows credential and keep nevertheless the Windows Authentication for the Web Portal Access. For example, you have a distinct User-ID and Password to connect to the iSeries and want to be under Windows Authentication in the Web Portal because the use of the Excel 2010 Power Pivot or Web Queries from any Excel requires this Authentication Mode.

To add your own credential for the iSeries data source, do the following steps:

Note that this data source must previously be defined in Click&DECIDE Administration Manager as a “Data Source Secured by Click and DECIDE”:

In the “Manage Data Source Logins” from the Web Portal, click “Add a new Data Source Login”:

Manage Data Source Logins	
Add a new data source login	
Data Source	iSeries
User ID	DIDIER
Password	*****

Select in the Data Source list your iSeries Data Source (only Data Sources secured by Click and DECIDE will appear).

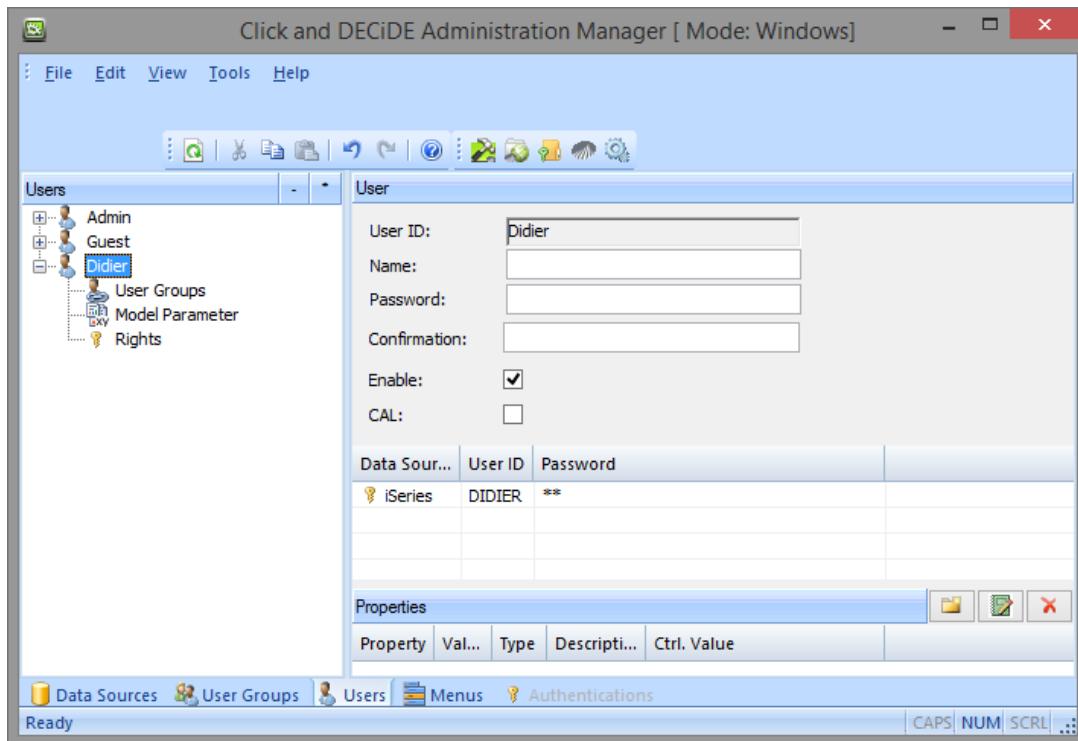

Enter your USER-ID and Password (Case sensitive).

Validate with the green check box.

The list of your Data Sources Logins will be updated:

Manage Data Source Logins			
	Data Source	User ID	Password
	iSeries	DIDIER	*****
Add a new data source login			

In the Click&DECIDE Administration Manager side, on the Server, your credential has been added in the User Tab (Press F5 to refresh if needed). The password is encrypted.

So, the access to the Web Portal will use the Windows Authentication (here User-ID is Didier), but when running iSeries queries, cross-tables, cubes or reports, the iSeries Login (DIDIER + password) will be sent to the iSeries automatically.

When your iSeries Login will change periodically, just come back here to update your new login using the most left icon to edit the configuration.

Of course, the use of "Data Source Logins" is not necessary when using a Data Source already supporting your Windows credential, such as Microsoft SQL Server for example.

3.3. Connected Users

At any time, the Administrator or other authorized users belonging to a Group being "**Super Administrator**" or having the Right **_P User_Manage** defined to **Allow** in Click and DECIDE Administration Manager can see all active users, and see if they are identified as CAL users (Client Access License) or Concurrent Users.

#	License	Product	Name	IP	Lifetime
1	Concurrent	WebPortal	DIDIER	::1	10/21/2015 2:40:11 PM
2	CAL	WebPortal	GGO	fe80::44fb:a684:34a8:82d1%3	10/21/2015 2:39:37 PM
3	Concurrent	WebPortal	VERO	fe80::1046:fdc4461:bd83%3	10/21/2015 2:40:05 PM

On the Top of this screen, the Administrator can see how many "Client Access License" (CAL) user(s) and how many Concurrent User(s) are connected and the maximum authorized users authorized by the License Certificate.

Note that the number of licenses used for the "Client Access License" (CAL) corresponds to identified users, specified in the User Tab of Click and DECIDE Administration Manager and having the "CAL" option activated: example, in the picture below GGO is a "CAL" User:

User ID: ggo
Name:
Password:
Confirmation:
Enable:
CAL:

And in the next picture Didier is not a "CAL" User and will appear as a "Concurrent User", Vero is not defined in the User Tab but belongs to the Users Group and will also appear as "Concurrent User".

User ID: Didier
Name:
Password:
Confirmation:
Enable:
CAL:

Note that it is not necessary to add the User "Vero" in that case in Administration Manager if using Windows Authentication if this user will never be declared as a CAL User.

From left to right, this Connected Users screen displays:

An icon allowing to **remove** the corresponding user (example a User who left the Company)

License type: CAL (Client Access License) or Concurrent Users.

Product: Web Portal or Connect.

User Name: the connected user's User ID.

IP Address: IP of the connected user computer. (IPV4 or IPV6).

Lifetime: this information gives the date and time when the user will be disconnected if there is no activity in the Web Portal. (This only concerns Concurrent Users).

Note: after 10 minutes without activity, a concurrent user is disconnected, whereas a CAL User still appears but their IP Address displays "Inactive". The Lifetime displays the last lifetime that was valid before the timeout.

Example 1:

[Configure](#) [Connected Users](#) [\[Didier\] Logout](#)

Web Portal License 1 / 5 CAL(s) 2 / 5 Concurrent(s) (AllowClientAccess)					
#	License	Product	Name	IP	Lifetime
1	Concurrent	WebPortal	DIDIER	::1	10/22/2015 10:42:46 AM
2	CAL	WebPortal	GGO	fe80::ec58:41e1:84a0:b82%3	10/22/2015 10:34:51 AM
3	Concurrent	WebPortal	VERO	fe80::1046:fdc:4461:bd83%3	10/22/2015 10:42:38 AM

After a while, if not active after the Lifetime, the User GGO appears as inactive.

Web Portal License 1 / 5 CAL(s) 2 / 5 Concurrent(s) (AllowClientAccess)					
#	License	Product	Name	IP	Lifetime
1	Concurrent	WebPortal	DIDIER	::1	10/22/2015 10:57:57 AM
2	CAL	WebPortal	GGO	Inactive	10/22/2015 10:34:51 AM
3	Concurrent	WebPortal	VERO	fe80::1046:fdc:4461:bd83%3	10/22/2015 10:42:38 AM

The GGO CAL user appears with an Unknown IP Address when inactive, this allows the same user to connect again from another PC with a different IP Address.

Example 2:

[Configure](#) [Connected Users](#) [\[Didier\] Logout](#)

Web Portal License 1 / 5 CAL(s) 2 / 5 Concurrent(s) (AllowClientAccess)					
#	License	Product	Name	IP	Lifetime
1	Concurrent	WebPortal	DIDIER	::1	10/22/2015 11:15:22 AM
2	CAL	WebPortal	GGO	192.168.0.51 / fe80::ec58:41e1:84a0:b82%3	10/22/2015 11:14:37 AM
3	Concurrent	WebPortal	VERO	fe80::1046:fdc:4461:bd83%3	10/22/2015 11:15:04 AM

In the above screen, the user GGO is connected at the same time using a Connect data source in the Web Portal. That is why you see his IPV4 address and his IPV6 address separated by a slash.

The reason is that the Web Portal can display both IP address types: IPV4 and IPV6, whereas Connect can only display IPV4.

Note: the Administrator can disconnect anybody from this screen using the Remove icon. This is useful if you want to remove a CAL user that no longer works in the Company. This user should then be removed from the Click&DECIDE Administration Manager and be replaced with a new user if necessary.

3.4. Favorites

The “Favorites” are corresponding to the “Home Pages” from a previous version of Click&DECIDE. If you install Click&DECIDE 2013 above a previous version having existing “Home Pages”, you will see them in the Favorite frame. With Click&DECIDE 2015, the way to manage and display the Favorites has been improved.

The **Favorites** frame enables you to display for example the result of a report in HTML or PDF format, or a Dashboard made with the Google Charts etc.

A Favorite can display a Report or a Google Chart Dashboard that do not retrieve any data but are used to display a customized menu offering some URL link to other reports or to other Google Chart Dashboards.

Important: in the URL copied to the clipboard, the server name could be **localhost** if you are working directly on the Server machine. For any URL to be used from a remote computer connected to the Web Portal Server, you need to replace **localhost** by the Server's **IP Address** or **Server Name**, followed by the port number if different than 80.

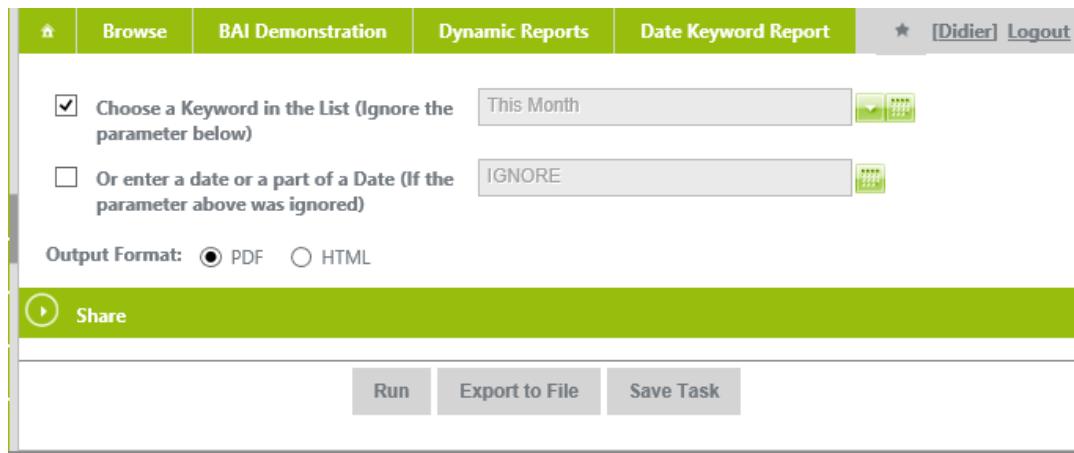

To access to the Favorite frame, click **Favorites** in the **Configure** command:

3.4.1. Adding a Favorite

You first need to copy the URL of the required Report, Dashboard or Cube etc.

To do so, select the required item in the Menu as if you wish to run it. Example: select the Report "Date Keyword Report" in the Dynamic Reports branch and select as parameter "This Month" and PDF format:

Then click the →**Share** button that will display all available links in a **combo box** (**new since version 15.2**) depending of the output formats specified in the Menu for this item:

Note that the end of the URL finishes with `__e=0`, that means the report will not be run immediately. If you want this Favorite to be run immediately, click the **Auto Run** option in the Share button, that will change the `__e=0` with `__e=1`

Share

Web Link to this page

Display Parameters Display Result Download Link Auto Run

http://localhost/dvweb/Menus>ShowParameters.aspx?__ma=BAI+Demonstration&__mi=2361&P_DATE_Keyword=0+months+ago%7cThis+Month&__f=PDF&__e=1

Copy the proposed URL into the clipboard and go back to the Favorite frame.

Click **New** in this screen:

Browse Configure Favorites [Didier] Logout

Configure

New...

View Favorites Authentication Connected Users

Save

Enter a Title and paste the URL into the box but change localhost with the server name and add the port number if different than 80 or just use the URL starting at /dvweb/... etc.

Favorite Properties

Title: Sales for the current month

URL: /dvweb/Menus>ShowParameters.aspx?
__ma=BAI+Demonstration&__mi=2361&P_DATE_Keyword=0+months+ago%
7cThis+Month&__f=PDF&__e=1

Note that if you want this Favorite to be run without showing any parameters nor output formats nor the Abort button, change **ShowParameters.aspx** with **Display.aspx**: this can be done automatically (since version 15.2) by clicking the option “**Display Result**”:

Share

Web Link to this page

Display Parameters Display Result Download Link Show Navigation Bar

<http://localhost/dvweb/Menus> [Display.aspx?__ma=BAI+Demonstration&__mi=2361&P_DATE_Keyword=0+months+ago%7cThis+Month&__f=PDF&__e=1](#)

The **__e=1** will not be used and can be removed:

http://localhost/dvweb/Menus/Display.aspx?__ma=BAI+Demonstration&__mi=2361&P_DATE_Keyword=0+months+ago%7cThis+Month&__f=PDF

Select the **Target** mode among “Open in current frame”, “Open in top window” or “Open in new window”.

Title: Sales for the current Month

URL: /dvweb/Menus/Display.aspx?
__ma=BAI+Demonstration&__mi=2361&P_DATE_Keyword=0+months+ago%
7cThis+Month&__f=PDF

Target: Open in current frame

Click **OK**. The favorite appears as follow and two icons allow you to edit or remove this Favorite. Note that you also can test the URL link by clicking on the URL in this box.

A check box allows you to get this Favorite to be run each time you load the Home Page.

The screenshot shows the Click&DECIDE interface with the 'Favorites' tab selected in the top navigation bar. A 'New...' button is visible. Below it, a card displays a globe icon and the text 'Sales for the current Month'. The URL is http://localhost/dvweb/Menus/Display.aspx?_ma=BAI+Demonstration&_mi=2361&P_Dr. To the right of the URL is a checkbox, followed by three icons: a pencil, a magnifying glass, and a trash can. The entire card has a green border.

Click **Save**.

You first Favorite has been added, and if you go back to the Home Page it will appear as follow:

The screenshot shows the Click&DECIDE Home Page. On the left is a sidebar with 'Menus' and 'Favorites' sections. The 'Favorites' section contains a card for 'Sales for the current Month' with a green folder icon. To the right of the card is the text 'Click here to edit again the Favorite'. The entire card has a green border.

Note that the icon has changed according to the item type (query, report, Dashboard etc.)

You can click the most right icon to go back directly from here to the Favorite Box:

The screenshot shows the Click&DECIDE Favorites screen again. A card for 'Sales for the current Month' is shown with a green folder icon. Three red arrows point to the right side of the card: one to the edit icon (pencil), one to the open editor icon (pencil and magnifying glass), and one to the delete icon (trash can). The entire card has a green border.

Now, when accessing to the Home Page using the icon, you will see your Favorites as follow:

The screenshot shows the Click&DECIDE Home Page. The sidebar includes 'Create' and 'Publish' options under 'Menus'. The 'Favorites' section lists two items: 'Sales for the current Month' (green folder icon) and 'Most Recent Sales for each Vendor' (grid with lightning bolt icon).

Click directly this “Sales for current month” favorite to get the result in the output format defined in the URL (here a PDF):

The screenshot shows a report titled "Date Keyword Report". The data is organized into columns: AREA, SALESMAN, DATE, and TOTAL. The data includes:

AREA	SALESMAN	DATE	TOTAL
NORTH-WEST	Sandra Davis	Thursday, October 8, 2015	\$74,490.00
NORTH-WEST	Joe Kramer	Thursday, October 8, 2015	\$137,082.00
NORTH-WEST	Sandra Davis	Saturday, October 10, 2015	\$84,947.00
NORTH-WEST	Joe Kramer	Saturday, October 10, 2015	\$150,589.00
ATLANTIC	Diane Meyer	Tuesday, October 13, 2015	\$67,712.00
ATLANTIC	Tim Rosenberg	Tuesday, October 13, 2015	\$78,634.00
NORTH-WEST	Bill Raley	Wednesday, October 21, 2015	\$56,640.00
WEST	Doug Castro	Tuesday, October 27, 2015	\$130,982.00
WEST	Doug Castro	Friday, October 30, 2015	
NORTH-WEST	Bill Raley	Friday, October 30, 2015	

At the bottom of the report are several icons for navigation and printing.

Or the Most Recent Sales for each Vendor, made with a query with HTML output format:

The screenshot shows a report titled "Max Date for a Salesman". The data is organized into columns: Salesman, Most Recent Date, and Amount. The data includes:

Salesman	Most Recent Date	Amount
John Brown	1/27/2016	\$230,236.29
Tim Rosenberg	3/16/2016	\$240,590.29
Robert Salta	10/10/2016	\$161,634.35
Karen Walker	10/27/2016	\$65,860.00
Jim Baxter	11/10/2016	\$54,955.00
Kim Johnson	11/19/2016	\$109,744.00
James Smith	11/22/2016	\$123,932.00
Jean Martin	12/22/2016	\$102,289.00
Bill Raley	12/23/2016	\$93,305.00
Wanda Sanders	12/23/2016	\$181,089.00
Diane Meyer	12/24/2016	\$197,881.50
Doug Castro	12/24/2016	\$184,135.00
Joe Kramer	12/26/2016	\$200,114.50

3.4.2. Modifying a Favorite

Access to the Favorite box through the Configure command or using the most right up icon in the Favorite Frame in the Home Page:

The screenshot shows the Click&DECIDE Home Page. On the left, there is a sidebar with "Menus" (Browse, Configure, Schedule) and a "Favorites" section. The "Favorites" section contains a green folder icon and a pie chart icon, with the text "Sales for the current Month". A red arrow points from the text "Click here to edit again the Favorite" to the green folder icon.

You will access here:

New... Save

Sales for the current Month
http://localhost/dvweb/Menus/Display.aspx?_ma=BAI+Demonstration&_mi=2361&P_DATE_Keyword=0+months+ago%7cThis+Month&_f=PDF Edit Save

Most Recent Sales for each Vendor
http://localhost/dvweb/Menus/Display.aspx?_ma=BAI+Demonstration&_mi=2395&P_DATE_Keyword=0+months+ago%7cThis+Month&_f=PDF Edit Save

Click the Edit icon to modify the required Favorite in the list.

Make the required changes and click OK to validate or Cancel.

Favorite Properties ×

Title	Sales for the current Month
URL	http://localhost/dvweb/Menus/Display.aspx? _ma=BAI+Demonstration&_mi=2361&P_DATE_Keyword=0+months+ago%7c This+Month&_f=PDF
Target	Open in current frame
Thumbnail	Paste Image Here

OK Cancel

3.4.3. Adding a Picture to a Favorite

As you can see in the Favorite Properties box, you can replace our default logo with a picture of your choice.

Open the picture you need under an Image Editor, such as Paint for example.

Copy this picture.

Open the Favorite Properties box.

Paste the picture inside the "Paste Image Here" frame.

Example for the first favorite: the icon is replaced by a picture of the first page of the PDF:

Favorite Properties ×

Title	Sales for the current Month
URL	http://localhost/dvweb/Menus/Display.aspx? _ma=BAI+Demonstration&_mi=2361&P_DATE_Keyword=0+months+ago%7c This+Month&_f=PDF
Target	Open in current frame
Thumbnail	

Example for the second favorite: the icon is replaced by a picture of the first page of the HTML, and for a third favorite being a Dashboard, the picture can be the Main Dashboard image:

The Home Page will display all your favorites as follow:

The screenshot shows the Click&DECIDE Home Page. On the left, there is a sidebar titled "Menus" containing links for "Browse", "Configure", "Schedule", "Create", and "Publish". To the right of this is a large frame titled "★ Favorites" which displays three items:

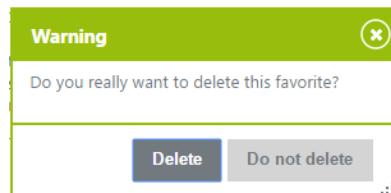

- A screenshot of a report titled "Sales Keyword Report" showing a table of sales data.
- A screenshot of a report titled "Max Date for a Salesman" showing a table of sales data.
- A thumbnail image of a dashboard featuring various charts and graphs.

3.4.4. Removing a Favorite

Access to the Favorite box through the Configure command or using the most right up icon in the Favorite Frame in the Home Page:

Click the Remove icon to delete the required Favorite in the list.

Click Delete on the next message (the selected Favorite is removed from the list) or Cancel.

4. Browse

To run menu items, follow the steps below:

The screenshot shows the Click&DECIDE Web Portal interface. On the left, a sidebar titled 'Menus' contains links for 'Browse', 'Configure', 'Schedule', 'Create', and 'Publish'. Below this is a 'News' section stating 'No RSS Feed to display'. On the right, a 'Favorites' dashboard displays three reports: 'Sales for the current Month', 'Max Date for a Salesman', and 'Most Recent Sales for each Ve...'. It also includes a 'Dashboard' section with various charts and graphs.

1. Click the **Browse** command in the Web Portal.

The screenshot shows the Click&DECIDE Web Portal with the 'Browse' command selected in the top navigation bar. The main content area displays a list of menus under the heading 'Name': 'BAI Demonstration', 'BAI Tools', and 'Web Portal Statistics'. Red arrows point from the text 'Menus associated to the current Groups of the current User' to the 'BAI Demonstration', 'BAI Tools', and 'Web Portal Statistics' entries.

2. Select one of the Menus assigned to your profile.

Note: the **Menus** depend on the Menus assigned to the Group you belong to, defined by your Administrator in the Click&DECIDE Administration Manager for the Server.

3. Refresh the Menu by logging out and then login again, if necessary.

4.1. Working with Menu Branches

Menus can display the following items.

4.1.1. Items that do not Require the Installation of Additional Components

The following items do not need additional components to be installed:

- A branch running a dynamic query, dynamic report, static query and static report.
- A branch displaying a link to a file in the following formats: PDF, Excel, Word or an URL link.
- A branch, called a Shared Folder, displaying any file type or Click&DECIDE project files containing queries or reports (except cubes).

4.1.2. Items Requiring the Installation of Additional Components

The following menu items require the installation of additional components:

- A branch running a Cube (from a 32-bit Click&DECIDE version).

- A branch, called a Shared Folder, displaying Click&DECiDE project files containing cubes.
- In both cases, a Microsoft Web Component ActiveX should be installed.

4.1.3. Items Requiring the Installation of Additional Software

The following items require the installation of additional software:

- A branch running the Click&DECiDE Builder software:

The screenshot shows a top navigation bar with four tabs: 'Browse', 'BAI Demonstration', 'Click and DECiDE Builder', and a fourth tab which is partially visible. Below the navigation bar is a green header bar with the word 'Name' in white. Underneath this is a white input field containing the text 'Web Builder'.

4.2. Running a Dynamic Item

To run a dynamic item, such as a query, report or cube, please follow the steps below. The following explanation applies to a dynamic query, report or cube. The example will be given with a dynamic report.

4.2.1. Exporting a Report in PDF Format

To export a report in PDF format, please follow the steps below.

1. Select **Browse**.
2. Select **BAI Demonstration**.
3. Select **Dynamic Reports**.
4. Click the **Demo Multi Criteria** report.

The screenshot shows a web-based application interface. At the top is a navigation bar with tabs: 'Browse', 'BAI Demonstration', 'Dynamic Reports' (which is the active tab), 'Demo Multi Criteria', and 'Administrator Logout'. Below the navigation bar are three parameter fields: 'Area?' with a dropdown menu showing 'IGNORE' and a calendar icon; 'Salesman Name:' with a dropdown menu showing 'IGNORE' and a calendar icon; and 'Date? (Use key words or a calendar date)' with a dropdown menu showing 'IGNORE' and a calendar icon. Below these fields is an 'Output Format' section with radio buttons for 'PDF' (selected), 'HTML', and 'Other', and a dropdown menu currently set to 'Excel 2007'. Further down is a 'Share' button. At the bottom are three buttons: 'Run', 'Export to File', and 'Save Task'.

5. Note all the parameters required by this report are displayed. A default value or the IGNORE reserved word appears when no values are authorized.
6. Select the values you wish, as appropriate. Click the down arrow to display the drop-down list (click **Shift + Click** or **Ctrl + Click** to select several values at the same time), or click the **Calendar** icon to display the calendar (for **Date** or **Date Time** fields), you can also enter values in the edit box.
7. **Click Ctrl+Click:** to select non-contiguous values.

[Browse](#) [BAI Demonstration](#) [Dynamic Reports](#) [Demo Multi Criteria](#) [\[Administrator\] Logout](#)

Area?

ATLANTIC		Karen Walker		\$65 860,00
				\$1 183 255,96

4.2.2. Exporting to another Output Format

1. Select the output format HTML or Other.
2. Select the Other option button to view the list of additional output formats supported by Click&DECIDE if your Administrator has setup this menu branch to propose other formats.

Area? ATLANTIC;NORTH-WEST

Salesman Name? Diane Meyer,Joe Kramer,Karen Walker

Date? (Use key words or a calendar date) Last Year

Output Format: PDF HTML Other: Excel 2007

Share

Run Export to File Save Task

3. Click **Run** to get the report result in the specified output format, according to the parameter values you entered. In the example below we selected the Excel 2007 output format and above criteria with "Last Year" for the date.
4. A message appears while running:

Output Format: PDF HTML Other: Excel 2007

Share

Abort Save Task

⚠ Running...

5. Then a message ask you what to do with the generated Excel file:

Click Open or Save and open the file under Excel 2007, 2010 or greater.

6. Click on the required Tab to go back to the location you need:

Click here to come back to the Home Page

Click here to come back to the Menu Root

Click this Tab to come back to the Report List

Click this Tab to come back to the Parameters list and output formats

This Tab displays the result

7. The Tab corresponding to the item name will display the last parameters and output formats used.

Note: if you wish to IGNORE a parameter previously defined, clear the check box to the left of the value and the IGNORE reserved word will be restored.

<input type="checkbox"/> Area?	IGNORE
<input type="checkbox"/> Salesman Name:	IGNORE
<input type="checkbox"/> Date? (Use key words or a calendar date)	IGNORE

Output Format: PDF HTML Other: Excel XLSX

Note: sometimes a parameter can be mandatory and/or not editable according to the way it has been defined by the Report Author.

Note: when entering several values by hand in an edit box, the separator value is a semi-colon. No additional quotes are required for text fields as the field type is known by the application.

4.2.3. Stopping a running Job

Since version 10.2.2, during the execution time, the Run button is changed to **Abort**, so that it is now possible to stop an execution in progress. The consequence is that you cannot click elsewhere on the Web Portal before the current run is completed or stopped. (Improvement of the Click&DECIDE Export Manager Service).

A Running...

It should be noted that two steps are required when executing a query: the FIRSTDATA that returns the first set of data and then the FETCH that returns a result of successive data packet. Cancelling the execution cannot be done until the return of FIRSTDATA, i.e. either during the recovery following blocks, either during the formatting of data (query, report and cube). Cancelling during FIRSTDATA is planned for version 11 of Click&DECIDE.

4.2.4. Working with the Navigation Bar in a Report in HTML Format

If you export a report to HTML format which generates several pages then a special navigation bar appears. Follow the steps below for more information. **This new navigation bar has been designed to work fine under an iPad, iPhone, or Android Tablet or Smartphones.**

The screenshot shows a software interface with a green header bar. The header contains the Click&DECIDE logo, a search bar, and menu items: 'BAI Demonstration', 'Dynamic Reports', 'Demo Multi Criteria', 'Result', and '[Administrator] Logout'. Below the header, there's a toolbar with icons for file operations. The main area displays a report titled 'Report Demo Multi Criteria with 3 Break L'. The report has three columns: 'Area' (containing 'ATLANTIC'), 'Code' (containing '4'), and 'Salesman name' (containing 'Diane Meyer'). To the right of the salesman name, there's a dropdown menu with dates: '10/01/2011', '11/02/2011', '21/03/2011', and '27/03/2011'. At the bottom left of the report area, there's a small icon with the number '1'.

Move the Page Number cursor to right or left to reach a specific page number or just next page or previous page.

Example using the Demonstration Menu

1. Click the **Report with URL link** branch.
2. Click the **Sales by Area and Distributor** report in the right pane.
3. Click **Run** to run it. A first report appears with a page for each Area. The Area field contains a hyperlink that can call another report giving more details about this area.

The screenshot shows a software interface with a green header bar. The header contains the Click&DECIDE logo, a search bar, and menu items: 'BAI Demonstration', 'Report with URL link' (which is highlighted in yellow), 'Sales by Area and Distributor', 'Result', and '[Didier] Logout'. Below the header, there's a toolbar with icons for file operations. The main area displays a report for the 'CENTRAL' area. It features a pie chart with three segments: 'James Smith' (green, 61.17%), 'John Brown' (yellow, 13.34%), and 'Wanda Sanders' (blue, 25.49%). Below the pie chart is a table with sales data:

James Smith	\$3,653,798.46	61.17%	
John Brown	\$796,902.47	13.34%	
Wanda Sanders	\$1,522,314.95	25.49%	
Sub-Total CENTRAL	\$5,973,015.89	14.32%	

4. Click the value you want, for example the **Central** value (or any other area on next pages) and the second report will appear in place of the first one.

The screenshot shows a sub-report titled "Sales by area and distributor subreport" for the area "CENTRAL". It includes instructions: "Click on a PRODREF value do get a report for the family product (01 = CHILDREN and 02 = ADULT)" and "Click on a PRODUCT name to get a sub-report for the selected Product only". The report displays a table of sales data:

Name	Prodref	Product	Amount
James Smith	0111	HYBRID TOUR 95	9,990.00 €
James Smith	0111	HYBRID TOUR 95	11,100.00 €
James Smith	0111	HYBRID TOUR 95	12,210.00 €
James Smith	0111	HYBRID TOUR 95	26,640.00 €
James Smith	0111	HYBRID TOUR 95	27,750.00 €
James Smith	0111	HYBRID TOUR 95	46,231.50 €
James Smith	0111	HYBRID TOUR 95	47,175.00 €
James Smith	0112	STREET KING SKULL	14,037.80 €

5. Click the Back Button from your browser to come back to the previous report, then the Next Browser button to go back to the last report.

The screenshot shows the same sub-report as before, but the browser toolbar is visible at the top. A red arrow points to the "Back" button icon in the toolbar.

6. Select an article code beginning with "02" in the PRODREF column. A third report for the ADULT family will appear in place of the current report.

The screenshot shows a third sub-report titled "Sales by area and distributor third subreport with parameter". It states: "You have selected the ADULT Family (Product number beginning with 02) and the CENTRAL Area." The report displays a table of sales data:

PRODREF	PRODUCT	FAMILY	QTY	AMOUNT
0213	BMX ADULT RACER	Adult	16	12,736.00 €
0214	BMX URBAN LEAGUE	Adult	14	31,500.00 €
0215	SCHWINN EXCURSION RACER	Adult	9	13,365.00 €

7. Click the Back Browser button to come back to the previous report.

4.3. Working with Useful Icons and Buttons

4.3.1. Navigation icons

Home Page: sends you back to the Main Home Page.

Click here to come back to the main report

Sales by area and distributor third subreport with parameter

You have selected the ADULT Family (Product number beginning with 02) and the CENTRAL Area.

PRODREF	PRODUCT	FAMILY	QTY	AMOUNT
0213	BMX ADULT RACER	Adult	16	12,736.00 €
0214	BMX URBAN LEAGUE	Adult	14	31,500.00 €

4.3.2. Export to File button

Export to File

Export to File: exports the current report directly to a file without building the result in the Web Page. This avoids displaying the result and having to click **Save As**. It is particularly useful when running output formats such as ASCII, as it automatically generates an ASCII file on the disk.

4.3.3. Save Task button

Save Task

Save Task: generates a task that can be scheduled later. If you are not recognized as a Super Administrator user, or a User having a special right named **_P Task_Manage = Allow** in Administration Manager, this button is hidden. A Super Administrator user is a user who belongs to a Group defined as "Super Administrator" in the Click&DECIDE Administration Manager on the Server. Only the Administrator of this module can modify the user status. The right **_P Task_Manage = Allow** can be applied to a User Group or a User.

4.3.4. Share Button Bar

Share

Share: generates the required links (URL) such as **Web Link**, **Google® DataTable Datasource**, **Excel® WebQuery Datasource**, **QlikView® Script**, **Excel® Power Pivot** or **Click'n'Decide Builder Query**.

Since **version 15.2**, the Share button has been improved to make it more users friendly: instead of displaying all possible links according to the output formats specified in the menu for this Menu Branch, now the Share button displays a combo-box: example with the Demo Multicriteria query:

Output Format: PDF HTML Other: Excel XLSX

▼ Share

Web Link to this page

Display Parameters Display Result Download Link

Auto Run

http://localhost/dvweb/Menus>ShowParameters.aspx?__ma=BAI+Demonstration&__mi=2274&__f=Excel+XLSX&__e=0

Click the Combo Box to display other available links, which list is depending on the output formats defined in the Menu Branch for this query:

The screenshot shows the Click&DECIDE interface with the 'Share' menu open. The 'Web Link to this page' option is selected. Other options visible in the dropdown include 'Google® Data Table', 'Excel® Web Query' (which is highlighted in green), 'QlikView® Script', 'Excel® PowerPivot', and 'ClicknDECIDE Builder Query'. Below the dropdown, there are buttons for 'Run', 'Export to File', 'Save Task', and 'Create Pivot Table'. A URL field contains 'http://localhost/dvweb/Menus/ShowParameters.aspx?__ma=BAI+Demonstration&__mi=2274&__f=Excel+XLSX&__e=0'. To the right of the URL field is an 'Auto Run' checkbox.

Select the link you wish to use. The URL will be updated dynamically.

4.3.4.1. Web Link to this page:

This link can be used when defining a Favorite, or used inside a Google Chart or be saved as a Shortcut on your desktop.

The screenshot shows the Click&DECIDE interface with the 'Web Link to this page' mode selected. There are three radio button options: 'Display Parameters' (selected), 'Display Result', and 'Download Link'. An 'Auto Run' checkbox is also present. The URL field shows 'http://localhost/dvweb/Menus/ShowParameters.aspx?__ma=BAI+Demonstration&__mi=2274&__f=Excel+XLSX&__e=0'. Below the URL field is a 'Share' button.

Now the syntax of the URL can be changed with the mouse by clicking the available mode, depending on the selected link type. A Web Link to this page authorizes:

Display Parameters: the URL will contain the **ShowParametrss.aspx** function that will display the Parameters list and the Output formats list when running this URL:

The screenshot shows the Click&DECIDE interface with the 'Display Parameters' mode selected. It includes fields for 'Area?' (with 'IGNORE' dropdown), 'Salesman Name?' (with 'IGNORE' dropdown), 'Date? (Use key words or a calendar date)' (with 'IGNORE' dropdown and calendar icon), and an 'Output Format' dropdown set to 'Excel XLSX'. Below these settings is a 'Share' button. At the bottom are buttons for 'Run', 'Export to File', 'Save Task', and 'Create Pivot Table'.

The **Auto Run** check box on the right will change the `__e=0` to `__e=1` in the URL in order to run immediately the job. But the Cancel button is displayed, so that the User can cancel the job if needed.

The screenshot shows the Click&DECIDE interface with the 'Display Parameters' mode selected and the 'Auto Run' checkbox checked. The URL field now shows 'http://localhost/dvweb/Menus/ShowParameters.aspx?__ma=BAI+Demonstration&__mi=2274&__f=PDF&__e=1'. The 'Auto Run' checkbox is highlighted with a red border.

If the above URL is used in a Favorite for example, the job will run immediately when clicking the Favorite, as follow:

The screenshot shows a configuration page for a task. At the top, there are three checkboxes: 'Area?' (IGNORE), 'Salesman Name:' (IGNORE), and 'Date? (Use key words or a calendar date)' (IGNORE). Below these is an 'Output Format' dropdown set to 'Excel XLSX'. A 'Share' button is visible above a row of buttons: 'Abort' (highlighted with a red box), 'Save Task', and 'Create Pivot Table'. At the bottom, a message box displays 'Running...' with an exclamation icon.

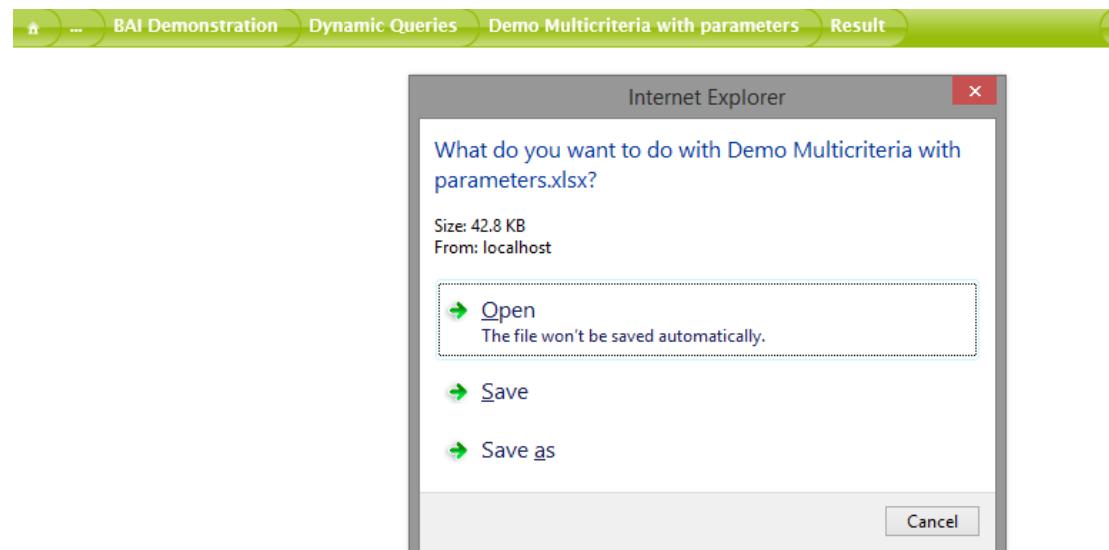

Display Result: the URL will contain the **Display.aspx** function that will run immediately the job without showing the Parameters list neither the Output formats list:

The screenshot shows the 'Web Link to this page' dropdown menu open, with the 'Display Result' option selected. The URL in the input field is `http://localhost/dvweb/Menus/Display.aspx?__ma=BAI+Demonstration&__mi=2274&__f=Excel+XLSX&__e=0`. A checked checkbox labeled 'Show Navigation Bar' is also visible.

Note that the `__e=0` is still here but will not be used, as Display.aspx already means to run now. You can thus remove this part of the URL and only keep:

`/dvweb/Menus/Display.aspx?__ma=BAI+Demonstration&__mi=2274&__f=Excel+XLSX`

When running the above link through a Favorite for example, the job will run and the Navigation Bar is still visible.

Show Navigation Bar: uncheck this option if you wish to hide the navigation bar.

The URL will change to: **Display.aspx** is replaced by **Display.ashx**

The screenshot shows the 'Web Link to this page' dropdown menu open, with the 'Display Result' option selected. The URL in the input field is `http://localhost/dvweb/Menus/Display.ashx?__ma=BAI+Demonstration&__mi=2274&__f=Excel+XLSX&__e=0`. A unchecked checkbox labeled 'Show Navigation Bar' is highlighted with a red box.

The URL is run immediately without showing the Navigation Bar.

Download link: the URL will contain the **Download.ashx** function that will run immediately the download of the result file (without showing the Parameters list neither the Output formats list):

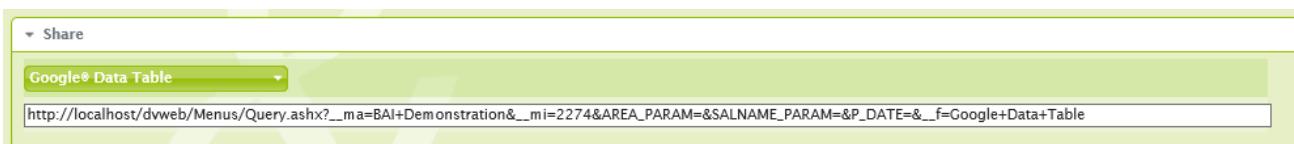

[/dvweb/Menus/Download.ashx?__ma=BAI+Demonstration&__mi=2274&__f=Excel+XLSX](http://localhost/dvweb/Menus/Download.ashx?__ma=BAI+Demonstration&__mi=2274&__f=Excel+XLSX)

(Note that the &__e=0 is not necessary in that case)

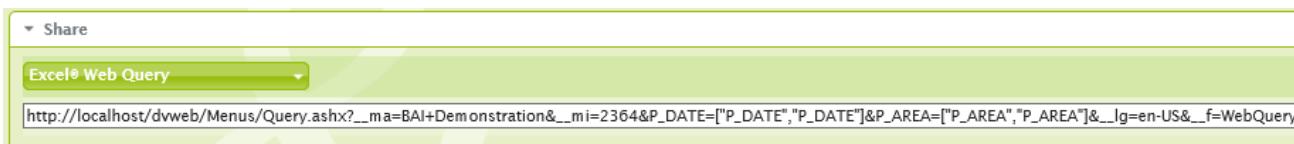

Refer also to the [Technical Appendix](#) for more information.

4.3.4.2. Google® DataTable Datasource:

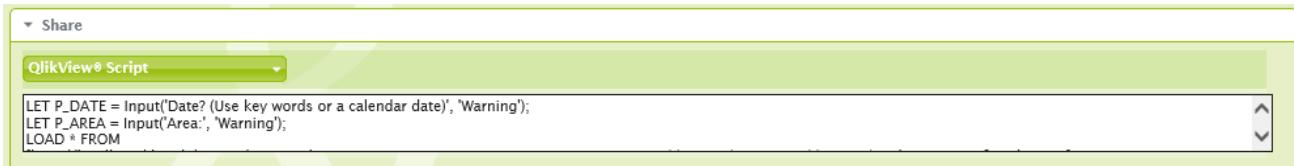

This link will be used when creating some Dashboards with the Google Charts. (Refer to the [BAI Dashboard Google Chart User Guide V2013](#)).

4.3.4.3. Excel® WebQuery Datasource:

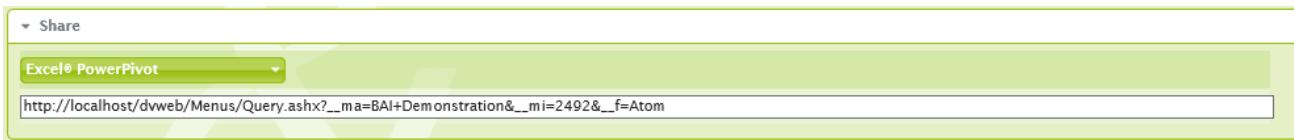

This link will be used when using the [WebQuery](#) inside an Excel file. See the chapter about the WebQuery in this Manual and the [Technical Appendix](#).

4.3.4.4. QlikView® Script:

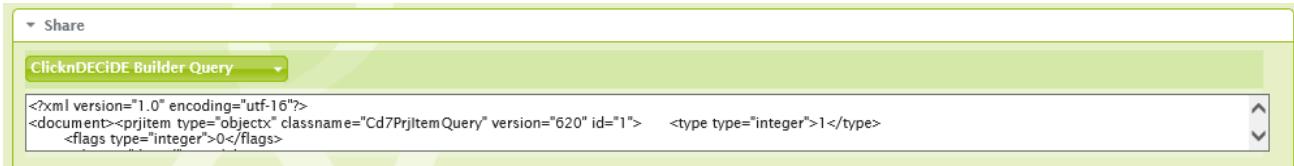

This link will be used when using QlikView to generate the required QlikView script.

4.3.4.5. Excel® Power Pivot:

This link will be used when using the [PowerPivot](#) module from Excel 2010 or greater. See the chapter about the Power Pivot in this Manual.

4.3.4.6. Click'n'Decide Builder Query:

This link allows the user to copy and paste this link into a Click&DECIDE Builder project file and get automatically the corresponding query built inside this project. This is useful when using Click&DECIDE Web Builder.

4.4. Saving a Task

4.4.1. Create a new Task

To create a task, please follow the steps below. This example will use the **Demo Multi Criteria** report for the **Last Month** period.

1. Select the **Dynamic Report** branch in the left **BAI Demonstration** menu.
2. Click the **Demo Multi Criteria** report.
3. Ignore all parameters except the **Date**.
4. Replace the year with **Last Month**.
5. Select **PDF** output format.

The screenshot shows the Click&DECIDE Dynamic Reports interface. At the top, there are tabs for 'Browse', 'BAI Demonstration', 'Dynamic Reports', and 'Demo Multi Criteria'. On the right, there's a 'Logout' button. Below the tabs, there are three input fields: 'Area?' (checkbox), 'Salesman Name:' (checkbox), and 'Date? (Use key words or a calendar date)' (checkbox, checked) with a dropdown menu showing 'Last Month'. At the bottom, there's a 'Share' section and a row of buttons: 'Run', 'Export to File', and 'Save Task'.

6. Click the **Save Task** button.
7. **General:** enter a name for the Task.

The screenshot shows the Click&DECIDE Tasks interface. At the top, there are tabs for 'Schedule', 'Tasks', and 'New Export Task'. On the right, there's a 'Logout' button. Below the tabs, there's a 'General' section with a 'Task Name' field containing 'MyReportLastMonth'.

8. **Source:** note the Report information (New in version 2013): Menu Name, Item Name and Menu ID:

Source	
Menu Alias:	BAI Demonstration
Menu Item (ID):	Demo Multi Criteria (2316)

9. **Parameters** status: the parameters default values can be changed again here and, optional, you can use the last option to generate a document for each distinct value of the specified parameter.

Parameters		
<input type="checkbox"/> Area?	IGNORE	<input checked="" type="checkbox"/> <input type="checkbox"/>
<input type="checkbox"/> Salesman Name:	IGNORE	<input checked="" type="checkbox"/> <input type="checkbox"/>
<input checked="" type="checkbox"/> Date? (Use key words or a calendar date)	Last Month	<input type="button" value="..."/> <input type="button" value="Calendar"/> <input type="checkbox"/>
<input type="checkbox"/> Generate a document for each value of the parameter: AREA_PARAM		

If you want for example to get a different target directory and/or a destination different file name for each value of the AREA field, managed by the AREA_PARAM parameter, then select this option and this parameter:

Parameters		
<input type="checkbox"/> Area?	IGNORE	<input checked="" type="checkbox"/> <input type="checkbox"/>
<input type="checkbox"/> Salesman Name:	IGNORE	<input checked="" type="checkbox"/> <input type="checkbox"/>
<input checked="" type="checkbox"/> Date? (Use key words or a calendar date)	Last Month	<input type="button" value="..."/> <input type="button" value="Calendar"/> <input type="checkbox"/>
<input checked="" type="checkbox"/> Generate a document for each value of the parameter: AREA_PARAM		

10. **Destination:** click the **Browse** icon to define the **Destination Directory**. By default the Shared Folder (and sub-directories) can be used because all new files created in these directories can be accessed later via the Web Menu. The Shared Folder corresponds to the following default path on the Server: C:\Program Files\Click and DECiDE\BAI\DemoWeb\Shared Folder.

Destination		
Output Format:	<input checked="" type="radio"/> PDF <input type="radio"/> HTML <input type="radio"/> Others	Excel 2007 <input type="button" value="..."/>
Destination Directory	<input type="text"/> <input type="button" value="..."/>	
Destination File	<input type="text"/>	
Suffix	None <input type="button" value="..."/>	

Example with the option to generate several documents for each value of the parameter AREA_PARAM:

Destination		
Output Format:	<input checked="" type="radio"/> PDF <input type="radio"/> HTML <input type="radio"/> Others	Excel 2007 <input type="button" value="..."/>
Destination Directory	<input type="text"/> BAI Demonstration/Shared Folder/#PARAM_ITERATE# <input type="button" value="..."/>	
Destination File	<input type="text"/> sales for area #PARAM_ITERATE#.PDF	
Suffix	None <input type="button" value="..."/>	

The variable #PARAM_ITERATE# is automatically proposed in the Destination directory (but can be removed if needed) and can be used also in the **Destination File** Name. This variable will take the distinct AREA values found according to the other criteria. (NORTH-WEST, ATLANTIC, SOUTH etc.). If you are not using this iteration option, anyway enter a file name according to the chosen output format, for example **Sales for Last Month.pdf**.

11. **Suffix:** when a report is exported periodically, you can automatically get a dynamic name according to the chosen period. To do so, modify the name to "**Sales for the Month_.pdf**" to add an underscore between the file name and suffix, and click the Suffix drop-down list to select the appropriate suffix: if we are the 1st September 2013...

Suffix	Result	Comment
None		No suffix will be added

YY	13	The suffix will be the 2 digits of current year
YY-1	12	The suffix will be the 2 digits of last year
YYMM	1309	The suffix will be the 2 digits of current year and 2 digits of current month
YYMM-1	1308	The suffix will be the 2 digits of last month's year and 2 digits of last month
YYMM-1D	1308	The suffix will be the 2 digits of yesterday's year and 2 digits of yesterday's month
YYMMDD	130901	The suffix will be the 2 digits of current year, 2 digits of current month and 2 digits of current day
YYMMDD-1	130831	The suffix will be the 2 digits of yesterday's year, 2 digits of yesterday's month, and 2 digits of yesterday
NNNN	0001	The suffix will be a number starting at 0001 to 9999

Select for this example the **YYMM-1** suffix:

Destination

Output Format:	<input checked="" type="radio"/> PDF <input type="radio"/> HTML <input type="radio"/> Others	Excel 2007
Destination Directory	BAI Demonstration/Shared Folder/#PARAM_ITERATE#	
Destination File	sales for area #PARAM_ITERATE#_PDF	
Suffix	YYMM-1	

12. Post-Treatment (optional): you can decide to make an action such as "Send an e-mail", "Export to Google Doc" or feed the RSS Feed Table, when the item is run through the Scheduled Task.

Post-Treatment

<input type="checkbox"/> Do a Post-Treatment:	e-mail
---	--------

If you want to do so, select this option:

Post-Treatment

<input checked="" type="checkbox"/> Do a Post-Treatment:	e-mail
From	e-mail
To	Export Google Doc
Subject	RSS Feed
Text	
Attachment	
<input type="button" value="Finish"/> <input type="button" value="Cancel"/>	

13. Click **Finish**

4.4.2. Do a Post Treatment

Do a Post Treatment allows you to decide which kind of actions must be done at the run time report.

4.4.2.1. E-mail

Post-Treatment	
<input checked="" type="checkbox"/> Do a Post-Treatment:	e-mail
From	sender@company.com
To	recipient@company.com
Subject	Last Month Result for the Sales
Text	Here is the PDF corresponding to the last month sales
Attachment	=Destination()

It is possible to send a file (for example a report) by e-mail to one or more recipients, only working with single generated file, such as **PDF**, **Excel**, **ASCII**, and so on. To do so, follow the steps below.

When the generated files are multiple such as **Cube HTML Export**, the e-mail action only sends the file with the *.cub extension. This file can be used to refresh a cube using the other static files (*.hta, *.gif, *.xml etc.).

When the generated files are multiple such as **Query or Report HTML export**, the e-mail action does not work because only one file is sent.

1. Select the **e-mail** as Post-Treatment.
2. Enter the sender e-mail address in the **From** field.
3. Enter the Recipient(s) address in the **To** field (to enter several recipient addresses, separate each address by a semi-colon).
4. Enter the message title in the **Subject** entry field.
5. Enter the message body in the **Text** entry field.
6. Note that the Attachment field can use the **=Destination()** function to return the file name with the full path. Another function, called **=FileName()** can sometimes be used to only return the file name without the path.
7. Note the generated file will automatically be attached to the e-mail using the predefined **=Destination()** function that you can see in the Attachment edit box:
8. Click **Finish**

4.4.2.2. Export Google Doc

Post-Treatment	
<input checked="" type="checkbox"/> Do a Post-Treatment:	Export Google Doc
Google User	democnd@gmail.com
Google Password	*****
Collection	/Public/filename

You need a Goggle account, enter you e-mail address and password, and then specify the Google Drive (shared with other people) and File Name you wish to use. Note that this Post-Treatment has been done specially for the Excel output format. (single file) when exporting to Google Doc. Click **Finish** when done.

Example of Google Drive and File Names:

The screenshot shows the Google Drive interface. On the left, there's a sidebar with 'My Drive' expanded, showing 'Public' selected. The main area shows a folder named 'Public' with a plus sign icon. Below it, there are three items: 'customer Shared' (starred), 'Invoice_12023 Shared' (starred), and 'Invoice_12024 Shared'.

In the above example **/Public** in the Collection box represents My Drive / Public (Shared)

And **/Filename** are the above examples “customer” (shared), Invoice_12023 (shared) and Invoice_12024 (shared).

4.4.2.3. Sending RSS Feed Alerts

Post-Treatment	
<input checked="" type="checkbox"/> Do a Post-Treatment:	RSS Feed
Title	Monthly Sales
Description	Sales Statistics for last month
Link	=Hyperlink()
Category	Information
User	
Group	

The document generated by the Scheduled Task can add a record in the RSS Feed Table located into the **CnDBAI** database installed in your SQL Server by Click&DECIDE.

1. Select the **RSS Feed** Post Treatment.
2. Enter the **Title** you want to be displayed in the RSS Title area.
3. Enter the **Description** you want to be displayed in the RSS Description area.
4. Enter the **Link = Hyperlink()**. This function will automatically generate the URL corresponding to the report file created so that the end user can open this report when clicking the RSS Title.
5. Enter the **Category** so that you can classify your information in several categories, such as Brochures, Videos, Documentation, Price List and so on. This is optional.

Note: Standard RSS Feed readers do not use **User** and **Group**.

6. Click **Finish** when done.

Any new Task will appear in the Web Portal as follow, in the [Schedule](#) Task Frame.

Name	Type
MyReportLastMonth	export
Purge RSS Feed Table	sql

New SQL Task New Generic Task

Note that the two above buttons only appear for a Super Administrator Group

4.4.3. Modifying or Deleting a Task

To view or modify or delete an existing task, please perform the steps below.

1. Click the **Schedule** command in the Web Portal.

Scheduled Tasks

Tasks

Import

2. Click **Tasks**
3. Your tasks and default Click&DECIDE tasks will appear in the frame. (See previous above picture).
4. To edit a Task, just click on the Task Name. The Task will be open.
5. To delete a Task, just click on the right trash icon and confirm. Note that a Task cannot be deleted if still used by a Scheduled Task.

For more information, please see the [Schedule](#) section to learn how to schedule one or more tasks.

4.5. Running a Dynamic Cube (IE 32-bit or IE version 11)

To run a dynamic cube, please follow the steps below. In this section we will explain some specific commands that can be used once a cube is displayed. This example will use the following cube: **Cube 1 Sales by year and salesman**. The cubes can be created only with a 32-bit version of Click&DECIDE, but can be displayed through the Click&DECIDE Web Portal 64-bit.

Note: Mozilla Firefox and Google Chrome Browsers do not support the Cube feature.

1. Click the **Dynamic Cube** branch.
2. Select the cube you want, in this example **Cube 1 Sales by year and salesman**.
3. Ignore all the parameters to get three years.
4. Click **Run** to run the Cube.
5. Note you may be prompted to install the Microsoft Web Component 2003 if it is the first time you are running Cube from this PC.
6. Note you may be prompted to install an ActiveX Web Component if it is the first time you are running Cube from this PC.
7. Click the plus sign to expand Date levels.
8. Click the **Area** filter field to display only certain areas, please refer to the Cube User Guide for more information.

SALNAME	Years ▾ Quarters				2013				Grand Total	
	TOTAL	2011	2012	2013	TOTAL	TOTAL	TOTAL	TOTAL	TOTAL	TOTAL
Bill Raley	\$539,347.00		\$143,087.80	\$482,947.80	\$354,581.80	\$980,617.40	\$586,901.80	\$2,106,866.20		
Diane Meyer	\$809,028.71		\$226,166.15	\$325,504.49		\$565,725.33	\$1,117,395.96	\$866,456.48	\$2,792,881.15	
Doug Castro	\$1,946,734.41		\$2,473,849.75	\$156,244.45		\$1,071,942.46	\$3,702,036.66	\$2,057,604.94	\$7,706,376.01	
Georges Dunel	\$986,082.85		\$245,321.79	\$244,359.93	\$173,954.50	\$310,843.79	\$974,480.00	\$1,058,487.55	\$3,019,050.40	

9. Click the **Chart Tab** to display the Graph.

Click the down-arrow in the top left corner of the screen to display the specific Cube commands that are available in the Web Portal. The following context menu appears.

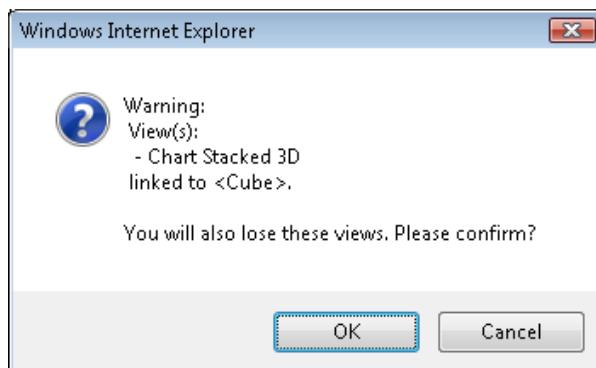

New Grid View...: creates a new **Cube** tab to get another presentation of the available dimensions and measures.

New Chart View...: creates a new **Chart** tab to get another graph presentation. A Chart can be linked to a Cube View or can be standalone.

Rename View: allow you to rename a Cube View or Chart View. First select the View to be renamed, then use this command.

Remove View: allow you to remove a Cube View or Chart View. First select the View to be removed, then use this command.

Warning: if you are removing a Cube View linked to a Chart View, a message will appear explaining that the Chart View is linked to the Cube View and that you will also lose these views.

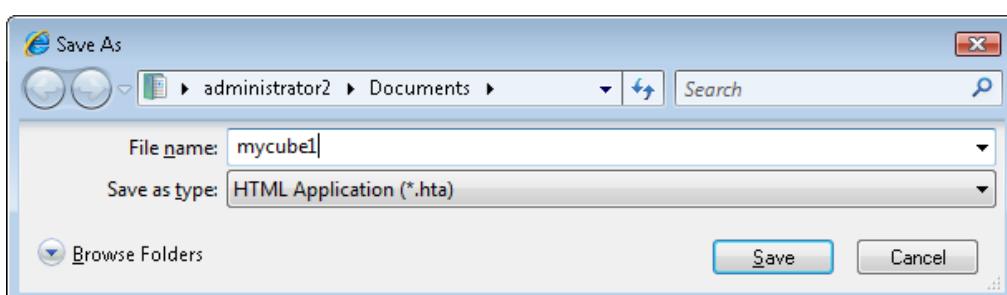

Click **OK** only if you accept losing both views. The above example concerns the “**Cube 6 Sales by Year and by Salesman with 2 graphs**”.

10. Click **Save Data and Presentation As** to save your cube's presentation and data.

Note: if you customized your Cube must save it locally, otherwise the next time you connect to this Cube in the Web Portal, you will get the Cube presentation defined on the Server machine.

11. Enter the **File name**.

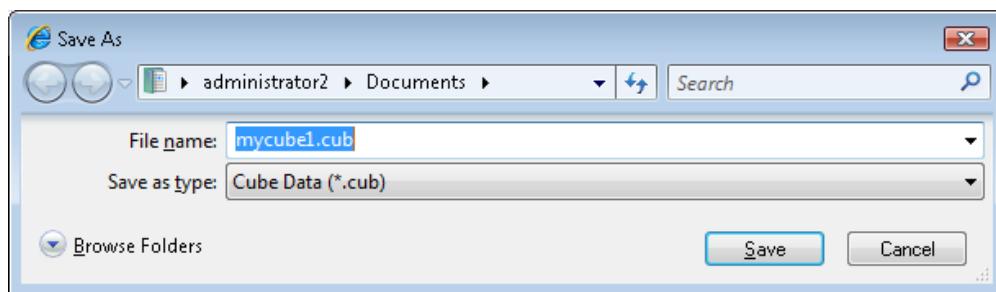

12. Click **Save**.

Note: you can now access this cube offline, without needing to connect to the Web Portal. To do so, go to the destination directory and double-click the *.hta file (in this example, the file mycube1.hta).

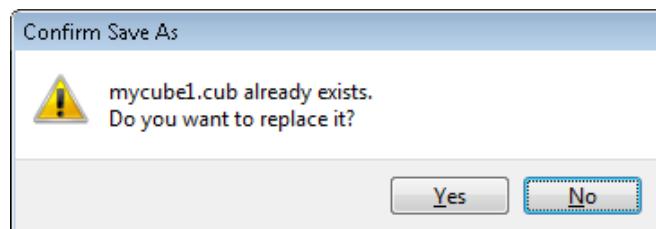

4.5.1. Updating a Dynamic Cube

To update a cube later with new data, please follow the steps below.

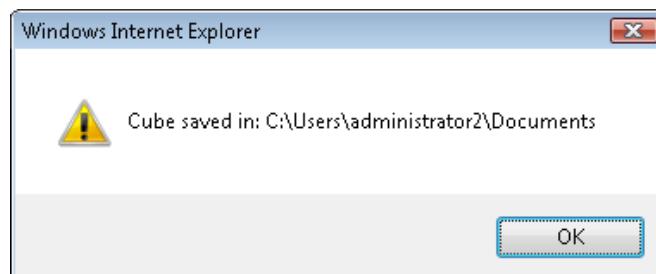

1. Connect to the same cube via the Web Portal, for example, every day.
2. Run the same cube to get new data.
3. Select **Save Data As** and you will be able to save the new data in the same destination directory.

4. Click **Save**.

5. Click **Yes**

6. Click **OK**.
7. Disconnect from the Web Portal.
8. Double-click the mycube1.hta file to open your customized cube with the refreshed data.

4.5.2. Exporting a Cube to Excel 2007 (XLSX)

Since version 10.1 a cube can be exported to Excel 2007 (or greater) if the new output format **Excel 2007 Pivot Table** appears. Select for example the “Cube 1 Sales by Year and Salesman” in the Dynamic Cubes branch:

The screenshot shows the Click&DECIDE software interface. At the top, there's a navigation bar with tabs: Browse, BAI Demonstration, Dynamic Cubes, and Cube 1 Sales by Year and by Salesman. Below the tabs, there are three input fields with dropdown menus: Area? (set to IGNORE), Salesman Name? (set to IGNORE), and Date? (Use key words or a calendar date) (set to IGNORE). At the bottom of this section is an 'Output Format' dropdown menu with options: PDF, HTML, Excel 2007 Pivot Table (which is checked), and Other: Google Data Table.

1. Select the **Excel 2007 Pivot Table** output format
2. Click **Run** to send the Cube Data to Excel 2007 (or 2010 or greater).

Note: this action cannot concern the Chart Tab.

If this output format is not visible, refer to the Click&DECIDE Administration Manager Guide.pdf to see how to add this output format for a cube, on paragraph 6.6.4.

Warning: the icon that you can see in the cube result has not the same function as the Excel 2007 Pivot Table output format.

This icon only can work to send a cube to Excel when using a Cube Analysis, not when using a file having “cub” extension.

The screenshot shows an Excel spreadsheet titled "Cube 1 Sales by Year and by Salesman.xlsxm". The PivotTable is filled with data for Salesman (SALNAME), Year (Years), and Area (AREA). The PivotTable Field List pane is open on the right, showing fields grouped under Σ Values (TOTAL), AREA (AREA), DATE (DATE by Month), and SALNAME (SALNAME). The data in the PivotTable includes various sales figures for different years and salesmen across different areas.

4.6. Running a Web Query

A Web Query is a query sent to a specific Click&DECIDE output format, named a WebQuery, generate a special URL that can be used later in any Excel file (Excel 2003, Excel 2007 and greater) to retrieve the data from the query from the Web (i.e. the Internet) without any Click&DECIDE software or components installed.

Warning: this feature only works if the Click&DECIDE Web Server has been setup using **Windows Authentication**.

4.6.1. Running a Predefined Example with Excel

To run a predefined example of a Web Query with Excel, please follow the steps below.

1. Click the **Excel Integration > WebQuery** branch in the left **BAI Demonstration** Menu.

The screenshot shows the Click&DECIDE BAI Demonstration interface. The top navigation bar includes links for Home, Browse, BAI Demonstration, Excel Integration, and Web Query. The 'Excel Integration' section is currently selected. Below this, a list of predefined example files is displayed under the heading 'Name': 'Web Query Demo', 'Web Query Demo for Graph', 'Web Query Excel XLS', and 'Web Query Excel XLSX'.

2. Click one of the predefined example files, that is either **Web Query Excel XLS** or **Web Query Excel XLSX** in the right pane.
3. Open the file in Excel.
4. Note that depending on your Windows version, you may need to click the **Options** button and click **Enable this content**.

A yellow dialog box titled 'Security Warning' appears, stating 'Data connections have been disabled'. It contains a 'Enable Content' button and a close 'X' button.

5. Click **OK** and this example should appear as follows.

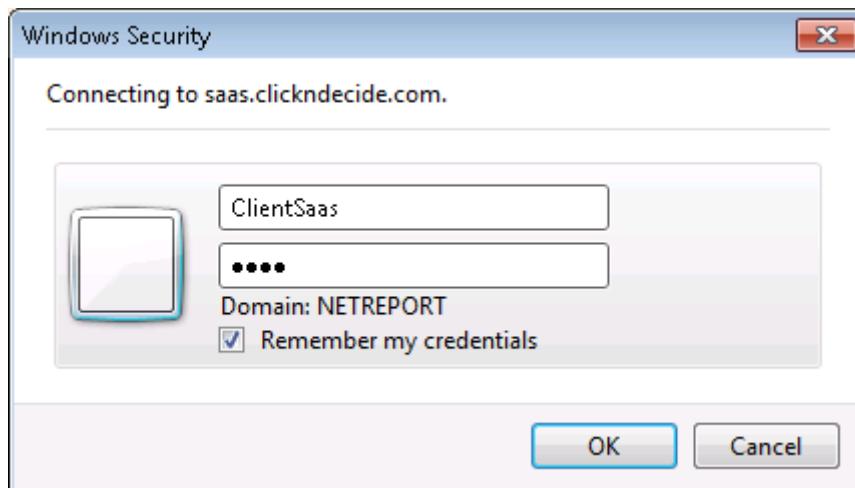

The screenshot shows an Excel spreadsheet titled 'Display.ashx [Read-Only]'. The data starts with two rows of filters ('Date: 2011' and 'Area: West;Atlantic') followed by a descriptive note ('ex: Last Month, Yesterday, 2 months ago, Q1, 2011 ...'). Below this, there is a list of sales data from various resellers. To the right of the table, a bar chart displays the total amount for each reseller. The chart has a Y-axis ranging from 0 € to 2,000,000 € and an X-axis listing the resellers.

Min Date	Max Date	AREA	Reseller	Amount
11/02/2011	18/10/2011	ATLANTIC	Atlantic Mountains Bikes	€ 422 776,00
11/02/2011	18/10/2011	ATLANTIC	Family Bikes	€ 371 739,00
10/01/2011	17/08/2011	ATLANTIC	Sunny Bikes	€ 437 290,00
10/07/2011	10/07/2011	WEST	Bike's for Life	€ 169 641,00
22/01/2011	22/01/2011	WEST	Discount Store	€ 279 272,00
11/05/2011	17/08/2011	WEST	Family Rides	€ 246 852,00
10/01/2011	22/11/2011	WEST	Mountain Bicycles	€ 1 946 734,00
30/01/2011	30/01/2011	WEST	Pikes Peak Bikes	€ 78 445,00
07/02/2011	30/12/2011	WEST	Running Riding Bike	€ 1 985 258,00
11/01/2011	30/12/2011	WEST	Swedish Bicycles	€ 666 058,00
15/12/2011	15/12/2011	WEST	The Polar Bicycle	€ 73 173,00

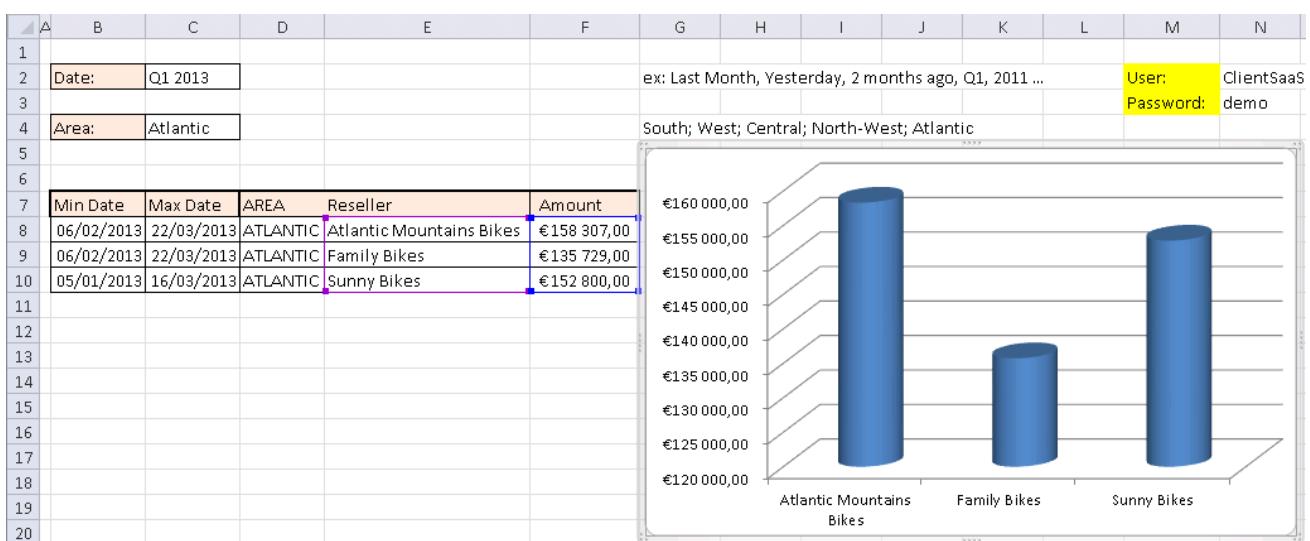

6. Modify the date using a year, or a keyword.

7. Modify the Area box using the proposed values (Atlantic, Central, North-West, South, West).
8. Validate to update the Excel sheet using data from the Click&DECIDE Web site.
9. Enter your **User Name** (ClientSaas by default).
10. Enter the **Password**: demo.

11. Click **OK**.
12. Modify the year value, for example for **Q1 2013** (or the current or last year)
13. Modify the Area value for example for **Atlantic**.
14. Validate, and the Excel sheet will be updated as follows.

Important note: if the date or numeric formats are not correct in your Excel file, you can edit the Query Link and replace for example the end of the URL &__lg=fr-FR&__f=WebQuery with

&__lg=en-GB&__f=WebQuery to get an English format.

Note that when you will build your own WebQuery, be sure to use the correct format in the [Configure>View>](#) command: the chosen format will build the correct syntax in the URL.

Theme:	Click and DECIDE
Language:	
Date, Time, Numbers:	English – United States (M/d/yyyy h:mm tt ####,####.##)

4.6.2. Defining your Web Query Example

4.6.2.1. Generating the Web Query URL

To generate the Web Query URL, please follow the steps below.

1. Click the **Excel Integration > WebQuery** branch in the left **BAI Demonstration** Menu.
2. Select the **Web Query Demo** query.

The screenshot shows the Click&DECIDE interface with the 'Web Query Demo' query selected. The 'Date?' and 'Area' checkboxes are unchecked. The 'Output Format' dropdown is set to 'PDF'. A 'Share' button is visible at the bottom.

3. Select the **Date** criteria but do not select any values for this parameter.
4. Select the **Area** criteria but do not select any values for this parameter.

The screenshot shows the Click&DECIDE interface with the 'Web Query Demo' query selected. The 'Date?' and 'Area' checkboxes are now checked. The 'Output Format' dropdown is set to 'PDF'. A 'Share' button is visible at the bottom.

5. Click the **Share** button.

The screenshot shows the Click&DECIDE interface with the 'Excel® Web Query' sharing dialog open. The URL is displayed in the box: `http://localhost/dvweb/Menus/Query.ashx?_ma=BAI+Demonstration&_mi=2364&P_DATE=[P_DATE]&P_AREA=[P_AREA]&_lg=en-US&_f=WebQuery`.

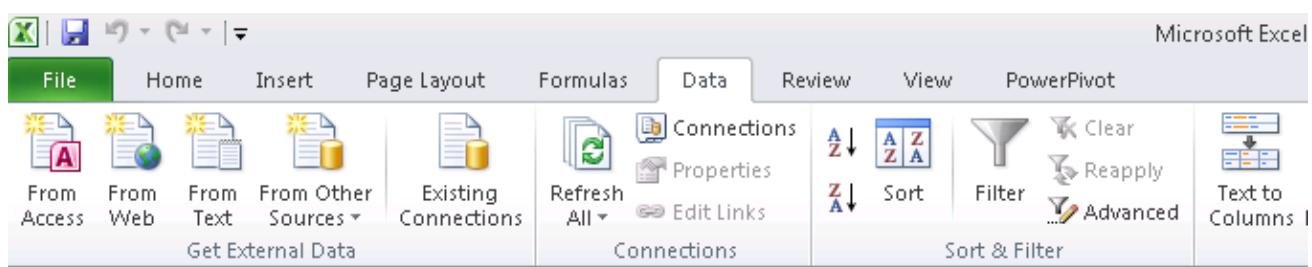

6. Copy the URL from the box at the right of "Excel WebQuery"
7. Note, the link will look something like the following example:
`http://localhost/dvweb/Menus/Query.ashx?_ma=BAI+Demonstration&_mi=2364&P_DATE=[P_DATE]&P_AREA=[P_AREA]&_lg=en-US&_f=WebQuery`
or
`http://servername/dvweb/Menus/Query.ashx?_ma=BAI+Demonstration&_mi=2364&P_DATE=[P_DATE]&P_AREA=[P_AREA]&_lg=en-US&_f=WebQuery`
8. Note that criteria are transmitted as Parameters and not as Values.

4.6.2.2. Building an Customized Excel Page

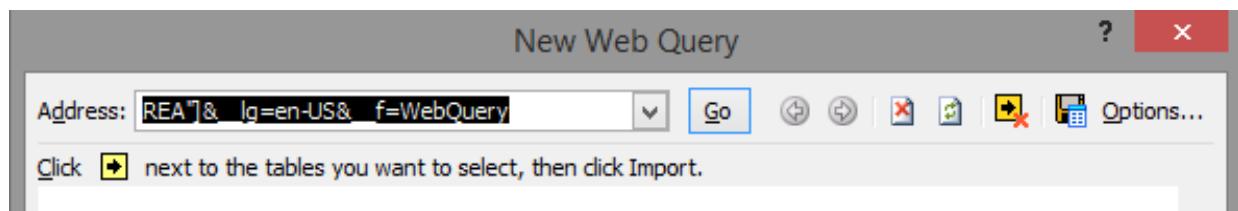

To build an Excel page, please follow the steps below.

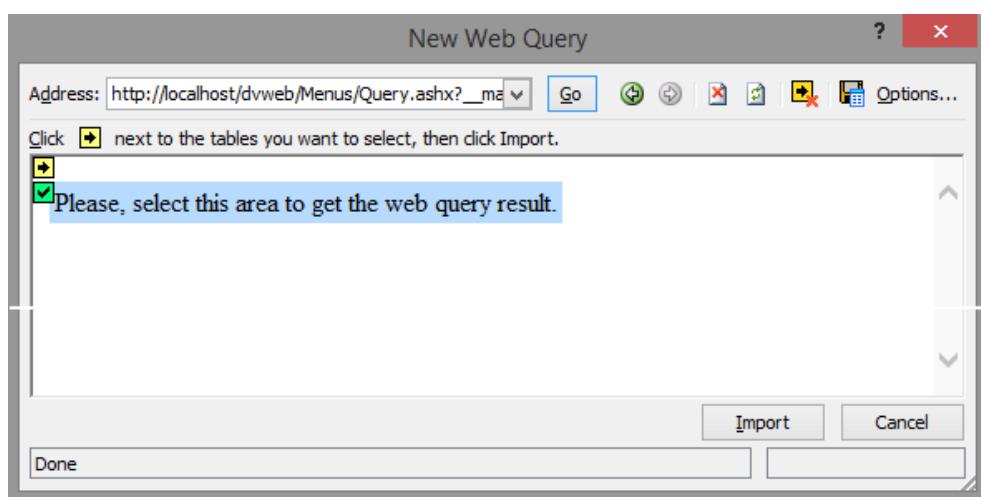

1. Open Excel.
2. Create a new document.
3. Enter the word “**Period**” in cell **A2**
4. Enter the word “**Area**” in cell **A3**
5. Set the mouse cursor in cell **B5** for example.
6. Select the **Data** tab.
7. Click the **From Web** button.
- 8.

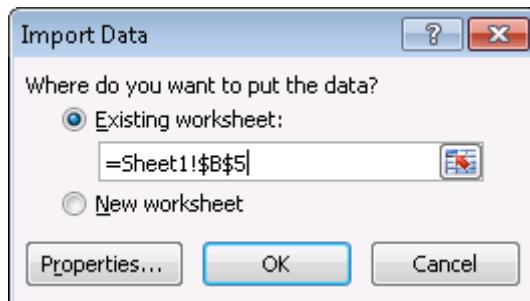

9. Paste your WebQuery URL into the Address field in the **New Web Query** dialog box.

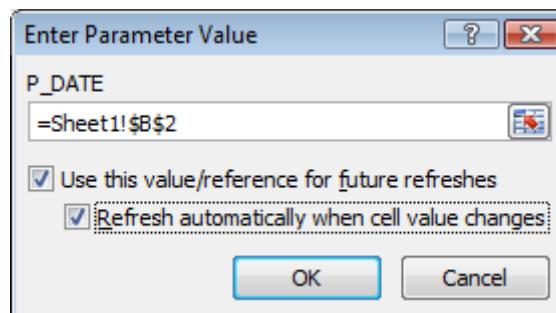

10. Click **Go** and wait until this text appears, and select the left yellow arrow that becomes green:

11. Click **Import** and select the Cell B5.

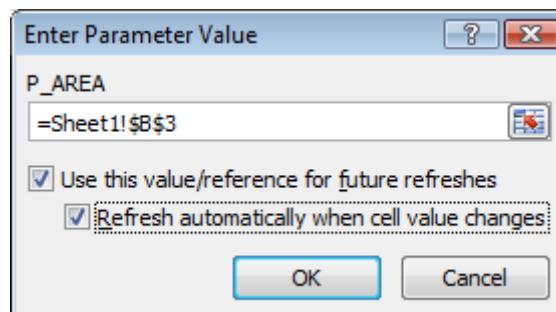

12. Click **OK** to confirm the starting cell.

13. Select the cell B2 for the Date parameter and activate the options “Use this value/reference for future refreshes” and “Refresh automatically when cell value changes”.

14. Click **OK**.

15. Select the cell B3 for the Area parameter and activate the options “Use this value/reference for future refreshes” and “Refresh automatically when cell value changes”.

16. Click **OK**. The data will feed the sheet starting in cell B5, first row including the column headers:

	A	B	C	D	E	F	G	H	I	J	K	L	M	N	O	P	Q
1																	
2	Date																
3	Area																
4																	
5		Query.ashx?_ma=BAI+Demonstration&_mi=2364&P_DATE=[“P_DATE”, “P_DATE”]&P_AREA=[“P_AREA”, “P_AREA”]&_lg=fr-FR&_f=WebQuery: Getting Data ...															
6																	

17. The link appears and then replaced with the result from cell B5 as follow:

	A	B	C	D	E	F	G	H
1								
2	Date							
3	Area							
4								
5	Date	Area	Name	State	State Name	Reseller	Amount	
6	08/01/2011	NORTH-WEST	Bill Raley	WA	Washington	Norway Cycles	76630	
7	09/01/2011	NORTH-WEST	Bill Raley	WA	Washington	Norway Cycles	87191	
8	10/01/2011	ATLANTIC	Diane Meyer	NY	New York	Sunny Bikes	67885	
9	10/01/2011	WEST	Doug Castro	CA	California	Mountain Bicycles	57550	
10	11/01/2011	WEST	Georges Dunel	NV	Nevada	Swedish Bicycles	136180	

18. Note the result appears in the Excel sheet, starting at cell B5.
19. Now enter a date keyword or a year (current year or last year) in cell B2 and press Enter. The result will be refreshed for the concerned value:

	A	B	C	D	E	F	G	H
1								
2	Date	2012						
3	Area							
4								
5	Date	Area	Name	State	State Name	Reseller	Amount	
6	08/01/2012	NORTH-WEST	Sandra Davis	ID	Idaho	On 2 Wheels	67523	
7	09/01/2012	NORTH-WEST	Sandra Davis	ID	Idaho	On 2 Wheels	77116	
8	10/01/2012	CENTRAL	John Brown	ND	North Dakota	Bikes for Tykes	223333	
9	10/01/2012	CENTRAL	Wanda Sanders	ND	North Dakota	Bikes for Tykes	208749	
10	24/01/2012	WEST	Georges Dunel	NV	Nevada	Swedish Bicycles	245322	
11	24/01/2012	NORTH-WEST	Joe Kramer	WA	Washington	The Polar Bicycle	320677	

Note: as you can see in the above screen shot, data are updated from Cell B5 and previous data has been removed.

20. Now enter one or several Area names in cell B3 and press Enter. The result will be refreshed for the concerned value: (Atlantic;Central;North-West;South;West with semicolon as separator)

	A	B	C	D	E	F	G	H
1								
2	Date	2012						
3	Area	Atlantic;South						
4								
5	Date	Area	Name	State	State Name	Reseller	Amount	
6	14/03/2012	SOUTH	Jim Baxter	FL	Florida	Central Hut	262983	
7	14/03/2012	SOUTH	Kim Johnson	LA	Louisiana	New Haven Cycles	247934	
8	15/03/2012	ATLANTIC	Diane Meyer	VT	Vermont	Family Bikes	226166	
9	16/03/2012	ATLANTIC	Tim Rosenberg	MA	Massachusetts	Atlantic Mountains Bikes	240590	
10	16/06/2012	ATLANTIC	Diane Meyer	NY	New York	Sunny Bikes	167186	
11	18/06/2012	ATLANTIC	Diane Meyer	NY	New York	Sunny Bikes	158318	
12	27/10/2012	ATLANTIC	Diane Meyer	VT	Vermont	Family Bikes	56263	
13	27/10/2012	ATLANTIC	Karen Walker	MA	Massachusetts	Atlantic Mountains Bikes	65860	
14	28/10/2012	SOUTH	Jean Martin	TX	Texas	Pro\Bikers	62168	

Note: as you can see in the above screen shot, data are updated from Cell B5 and previous data has been removed.

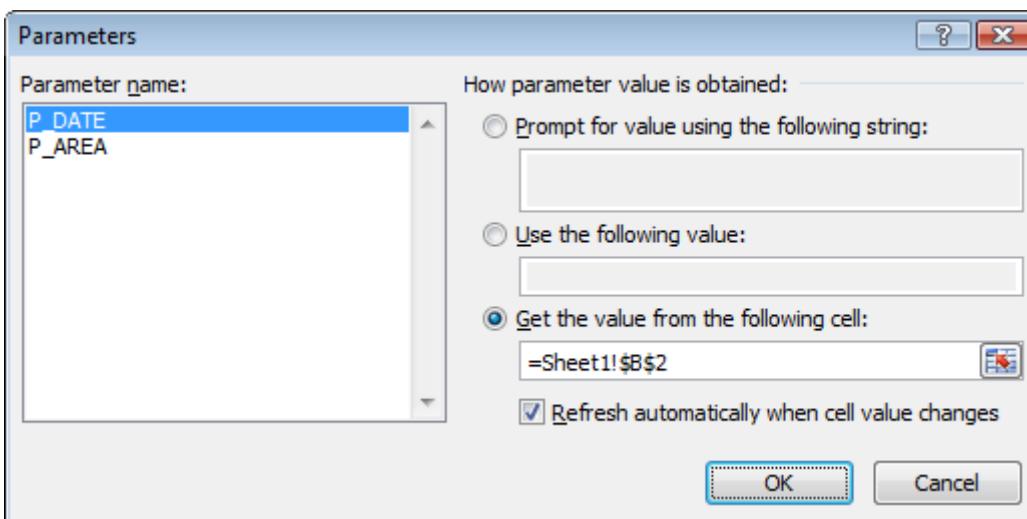

Date Keywords for the Period can be any keyword supported by Click&DECiDE such as a year, a month, Q1 to Q4 for the current year or Q1 to Q4 followed by a year, or Last Month, Last Week etc. (see all supported keyword at the end of this manual).

21. Editing again the link: make a right mouse click anywhere in the data area then select **Edit Query**:

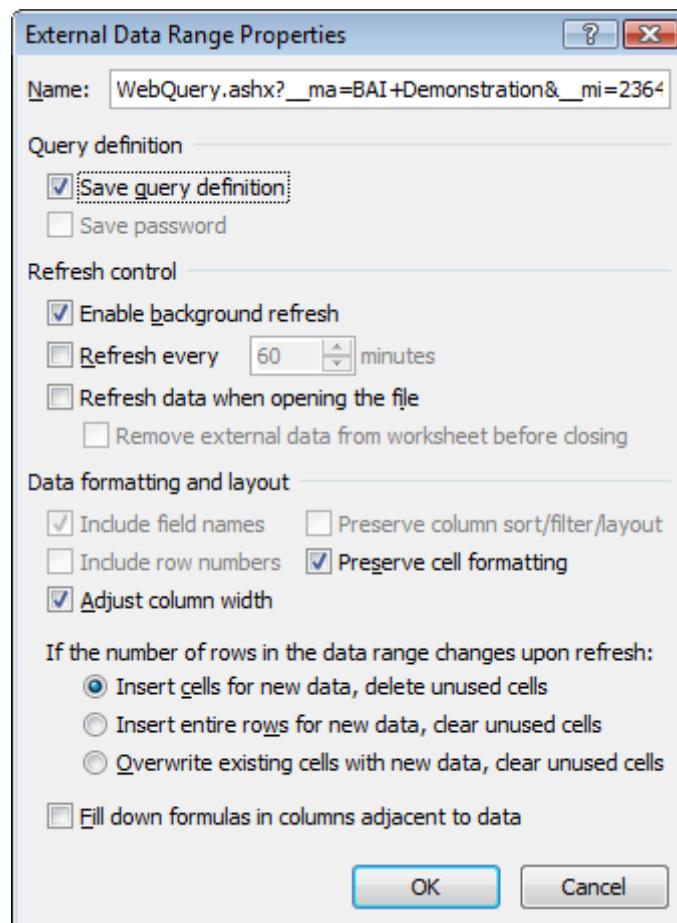

You can here paste a new URL link or modify the one used.

22. Modifying the parameters: make a right mouse click anywhere in the data area then select **Parameters**:

You can here modify how parameter values are updated.

23. Other options are available in the command Data Range Properties:

4.6.3. How to use an URL bigger than 255 characters with WebQuery and Excel

From the Click&DECIDE Web Portal you can copy the WebQuery URL corresponding to a Query and paste this URL inside Excel using the command Data > From Web as described previously. But the URL cannot be used if the size is bigger than 255 characters.

A workaround is given in this Manual to be able to use WebQuery URL bigger than 255 characters. This manual will give an example using the Demo_Multicriteria query given in the BAI Demonstration Menu.

4.6.3.1. Select the Query to be used and copy the WebQuery URL

To generate the Web Query URL, please follow the steps below.

1. Click the BAI Demonstration menu in the Web Portal.
2. Select the Dynamic Queries branch.
3. Select the "Demo Multicriteria with parameters" query.

[Browse](#) [BAI Demonstration](#) [Dynamic Queries](#) [Demo Multicriteria with parameters](#)

<input type="checkbox"/> Area?	IGNORE
<input type="checkbox"/> Salesman Name:	IGNORE
<input type="checkbox"/> Date? (Use key words or a calendar date)	IGNORE

Output Format: PDF HTML Other: [Excel XLS](#)

To get a very long URL we are going to defined several values for the Area parameter and the Salesman Name parameter, such as this example: all areas are selected and all salesmen are selected. Only the Date parameter remains selected but empty:

[Browse](#) [BAI Demonstration](#) [Dynamic Queries](#) [Demo Multicriteria with parameters](#) [\[Didier\]](#) [Logout](#)

<input checked="" type="checkbox"/> Area?	ATLANTIC;CENTRAL;NORTH-WEST;SOUTH
<input checked="" type="checkbox"/> Salesman Name:	Bill Raley;Diane Meyer;Doug Castro;George
<input checked="" type="checkbox"/> Date? (Use key words or a calendar date)	

Output Format: PDF HTML Other: [Excel XLS](#)

[Share](#)

4. Now click the [Share](#) button.
5. Copy the Excel WebQuery Data source link.
6. Optional: you can paste this URL into an editor to check the length: this one is 580 characters!

```
http://localhost/dvweb/Menus/Query.ashx?__ma=BAI+Demonstration&__mi=2274&AREA_PARAM=ATLANTI
C%3bCENTRAL%3bNORTH-WEST%3bSOUTH%3bWEST&SALNAME_PARAM=Bill+Raley%7cNORTH-
WEST%3bDiane+Meyer%7cATLANTIC%3bDoug+Castro%7cWEST%3bGeorges+Dunel%7cWEST%3bJame
s+Smith%7cCENTRAL%3bJean+Martin%7cSOUTH%3bJim+Baxter%7cSOUTH%3bJoe+Kramer%7cNORTH
-
WEST%3bJohn+Brown%7cCENTRAL%3bKaren+Walker%7cATLANTIC%3bKim+Johnson%7cSOUTH%3bRi
c+Smith%7cWEST%3bRobert+Salta%7cNORTH-WEST%3bSandra+Davis%7cNORTH-
WEST%3bTim+Rosenberg%7cATLANTIC%3bWanda+Sanders%7cCENTRAL&P_DATE=["P_DATE","P_DA
TE"]&__lg=en-US&__f=WebQuery
```

4.6.3.2. Transform this URL using TinyURL

7. Open a new window in your browser and copy this URL: <http://tinyurl.com/create.php>

The screenshot shows a web browser window with the address bar containing "tinyurl.com/create.php". The main content area displays the TinyURL.com homepage with the slogan "Making over a billion long URLs usable! Serving billions of redirects per month.". On the left, a sidebar menu lists various options: Home, Example, Make Toolbar Button, Redirection, Hide URLs, Preview, Feature^{cool!}, Link to Us!, Terms of use, and Contact Us!. The right side contains a form for creating a short URL from a long one. The "Enter a long URL to make tiny:" field contains "http://localhost/dvweb/Menus/Q". Below it is a "Make TinyURL!" button. A note says "Custom alias (optional): http://tinyurl.com/" followed by an input field and the instruction "May contain letters, numbers, and dashes."

8. Copy the WebQuery URL in the “Enter another long URL to make tiny” box and click the Make TinyURL! Button. You will get the result as follow:

TinyURL was created!

The following URL:

```
http://localhost/dvweb/Menus/Query.ashx?  
__ma=BAI+Demonstration&__mi=2274&AREA_PARAM=ATL  
ANTIC%3bCENTRAL%3bNORTH-  
WEST%3bSOUTH%3bWEST&SALNAME_PARAM=Bill+Raley%7  
cNORTH-  
WEST%3bDiane+Meyer%7cATLANTIC%3bDoug+Castro%7c  
WEST%3bGeorges+Dunel%7cWEST%3bJames+Smith%7cCE  
NTRAL%3bJean+Martin%7cSOUTH%3bJim+Baxter%7cSOUT  
H%3bJoe+Kramer%7cNORTH-  
WEST%3bJohn+Brown%7cCENTRAL%3bKaren+Walker%7cA  
TLANTIC%3bKim+Johnson%7cSOUTH%3bRic+Smith%7cWE  
ST%3bRobert+Salta%7cNORTH-  
WEST%3bSandra+Davis%7cNORTH-  
WEST%3bTim+Rosenberg%7cATLANTIC%3bWanda+Sander  
s%7cCENTRAL&P_DATE=["P_DATE","P_DATE"]&__lg=en-  
US&__f=WebQuery
```

has a length of 580 characters and resulted in the following TinyURL which has a length of 26 characters:

<http://tinyurl.com/nlz59tw>
[Open in new window] [Copy to clipboard]

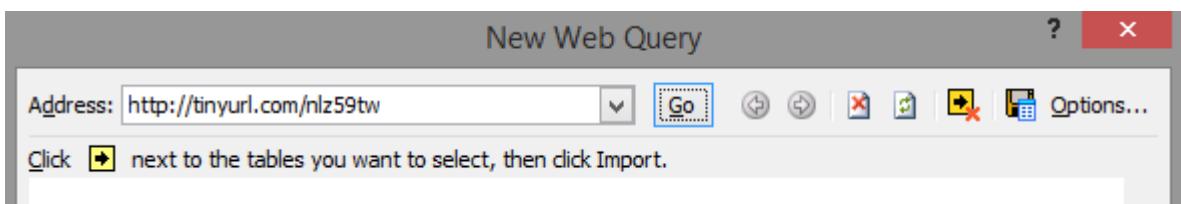

Copy the new URL into your clipboard, using the [Copy to clipboard] link. Note that the short URL has been copied to your clipboard automatically. If you lost it, or if you did not click Allow access to the previous message, you can manually copy again the above dynamic URL such as this example: <http://tinyurl.com/nlz59tw>

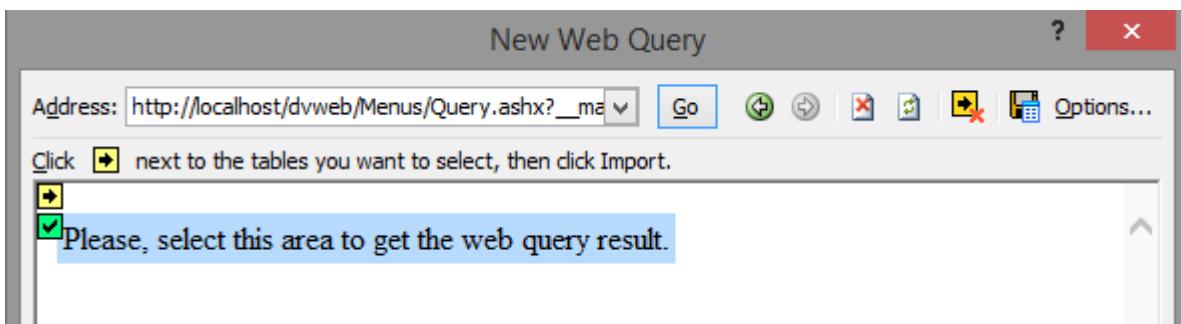

4.6.3.3. Use the TinyURL in Excel to import the WebQuery:

To build an Excel page, please follow the steps below.

9. Open Excel.
10. Create a new document.
11. Go to the cell B5 for example.
12. Select the Data tab.
13. Click the From Web button.
14. Paste your TinyURL into the Address field in the New Web Query dialog box.

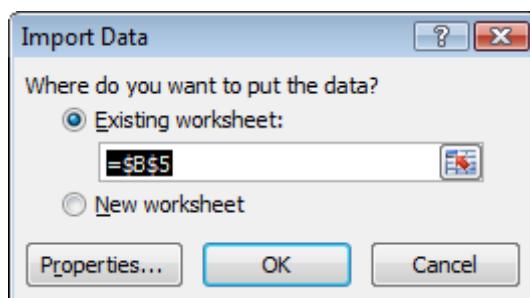

15. Click **Go** until you get this screen

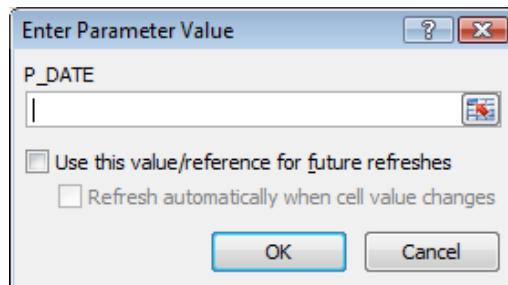

As you can see the TinyURL has been changed to the full big URL

16. Click **Import**
17. Select the target top left corner for the data result, example cell B5:

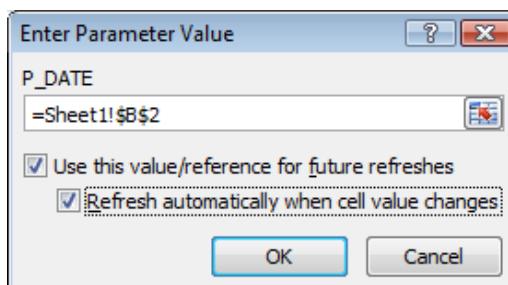

18. Click **OK** to confirm the starting cell.
19. As the Date is an empty not defined parameter, you will get this dialog:

20. Click the cell B2 to define the location for the Date parameter value.

21. Validate and check on the 2 options:

22. Click OK.

23. The result will appear from cell B5 on the rows below and right columns

	A	B	C	D	E	F	G
1							
2	Period						
3							
4							
5	Area	Code	Salesman name	MAIL	Date	Amount	
6	ATLANTIC	4	Diane Meyer	diane.meyer@yopmail.com	10/01/2011 00:00	67885	
7	ATLANTIC	4	Diane Meyer	diane.meyer@yopmail.com	11/02/2011 00:00	69535,6125	
8	ATLANTIC	4	Diane Meyer	diane.meyer@yopmail.com	21/03/2011 00:00	72880	

24. Any date value, or date keyword, entered in cell B2 will refresh the data

	A	B	C	D	E	F	G
1							
2	Period	Last month					
3							
4							
5	Area	Code	Salesman name	MAIL	Date	Amount	
6	CENTRAL	5	James Smith	james.smith@yopmail.com	03/07/2013 00:00	76082	
7	CENTRAL	5	James Smith	james.smith@yopmail.com	03/07/2013 00:00	86539	
8	CENTRAL	9	John Brown	john.brown@yopmail.com	02/07/2013 00:00	70754,5	
9	SOUTH	6	Jim Baxter	jim.baxter@yopmail.com	25/07/2013 00:00	178368,2	
10	WEST	14	Doug Castro	doug.castro@yopmail.com	09/07/2013 00:00	144235,5

13	WEST	7	Georges Dunel	georges.dunel@yopmail.com	27/07/2013 00:00	63276,5	
14	WEST	15	Ric Smith	ric.smith@yopmail.com	05/07/2013 00:00	86378,2	
15	WEST	15	Ric Smith	ric.smith@yopmail.com	05/07/2013 00:00	96939,6	
16							

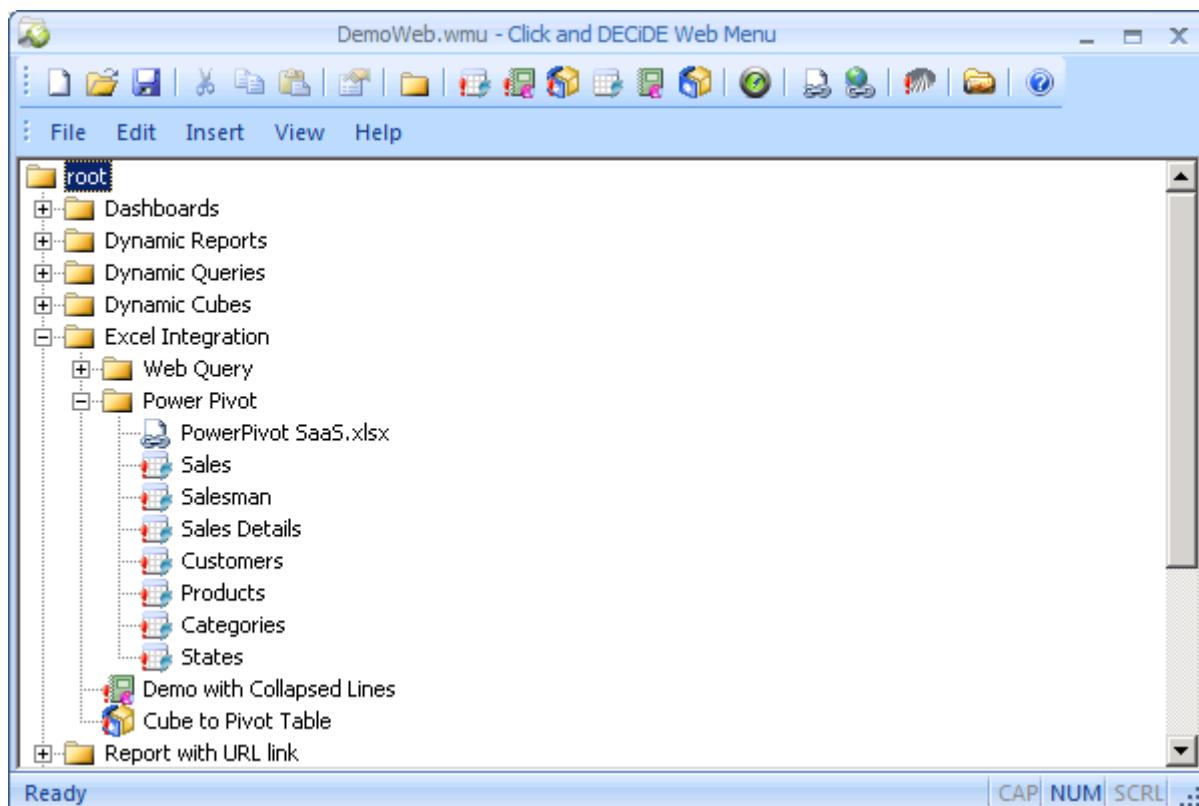

4.7. Running a PowerPivot with Excel 2010

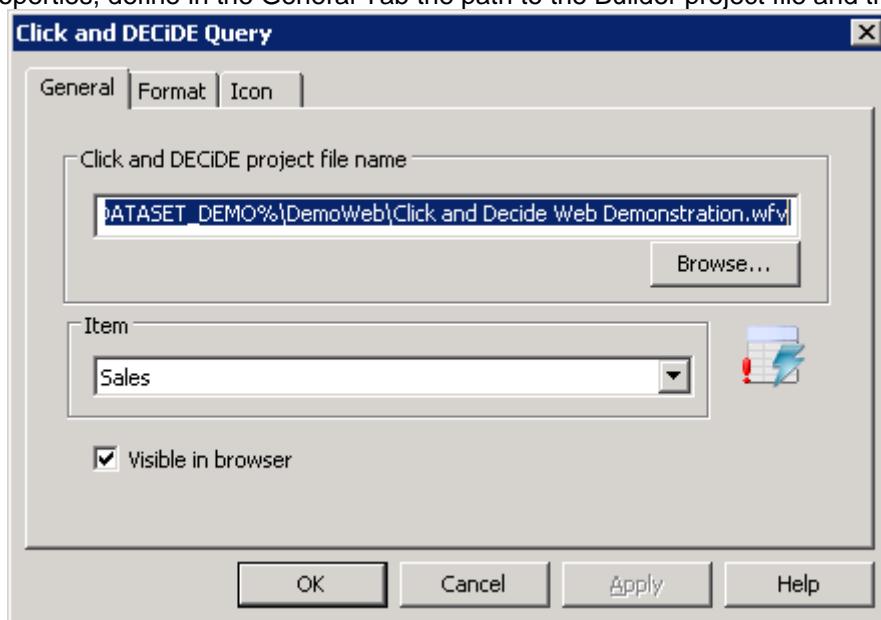

Requirements: Excel 2010 must be installed as well as the Power Pivot module. This module can be installed above your Excel 2010 version or greater.

4.7.1. Step 1: defining the tables you need in Menu Builder

Open Click&DECIDE Menu Builder and add in a Branch all the required tables based on a query, as you can see in the DemoWeb.wmu file: to do so, add a dynamic query pointing to the Click&DECIDE Builder project file containing theses queries.

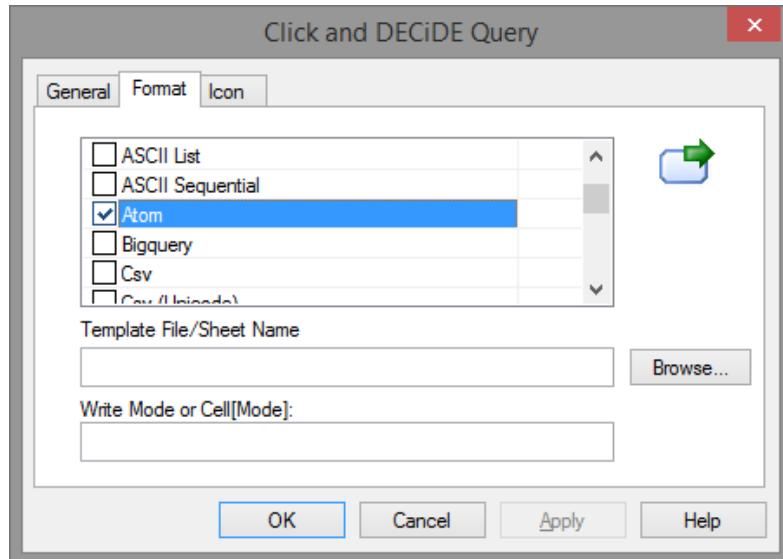

In each query Properties, define in the General Tab the path to the Builder project file and the query to be run:

Then, on the **Format** Tab, add the **ATOM** output format:

Click **OK** and save the menu.

4.7.2. Step 2: Copying the ATOM URL link to be used in Excel 2010

Open the Web Portal against the Server having the Click&DECIDE Web Server installed, and, if needed, enter your login: (depending on your Authentication Mode). Once connected to the Web Portal, select the branch containing all your required queries having the ATOM output format:

The screenshot shows the Click and DECIDE Web Portal interface. The top navigation bar includes 'Browse', 'BAI Demonstration', 'Excel Integration', 'Power Pivot' (which is the active tab), and user information '[Didier] Logout'. Below the navigation is a list of queries under the 'Power Pivot' branch, titled 'Name'. The queries listed are: PowerPivot SaaS.xlsx, Sales, Salesman, Sales Details, Customers, Products, Categories, and States. Each query has a small icon to its left.

Select the first query, corresponding to the "Sales" Table in the above example:

The screenshot shows the Click&DECIDE interface with the 'Power Pivot' tab selected in the top navigation bar. Below the navigation bar, there are two input fields: the first is labeled 'Choose a Keyword in the List (Ignore the parameter below)' with a dropdown menu set to 'IGNORE'; the second is labeled 'Or enter a date or a part of a Date (If the parameter above was ignored)' with a dropdown menu set to 'IGNORE'. Below these fields is an 'Output Format' section with radio buttons for PDF (selected), HTML, and Other, followed by a dropdown menu set to 'ATOM'. At the bottom left, there is a 'Share' button.

Click the **Share** button to get the PowerPivot URL:

Note: if the ATOM format has been added in the Menu for this query, you automatically get the required URL using the Share button.

The screenshot shows the Click&DECIDE interface with the 'Share' button expanded. It displays a dropdown menu with the option 'Excel® PowerPivot' selected. Below the menu, the URL 'http://localhost/dvweb/Menus/Query.ashx?__ma=BAI+Demonstration&__mi=2492&__f=Atom' is shown in a text box.

Copy the URL from this box.

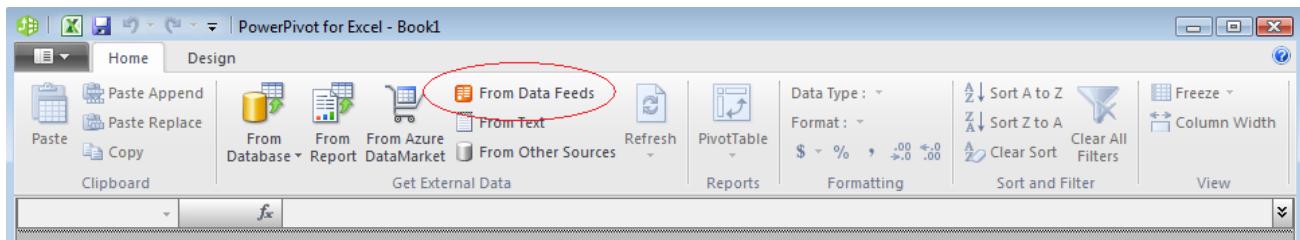

http://servername/dvweb/Menus/Query.ashx?__ma=BAI+Demonstration&__mi=2492&__f=Atom

4.7.3. Step 3: Adding the table content into the Excel Power Pivot Windows

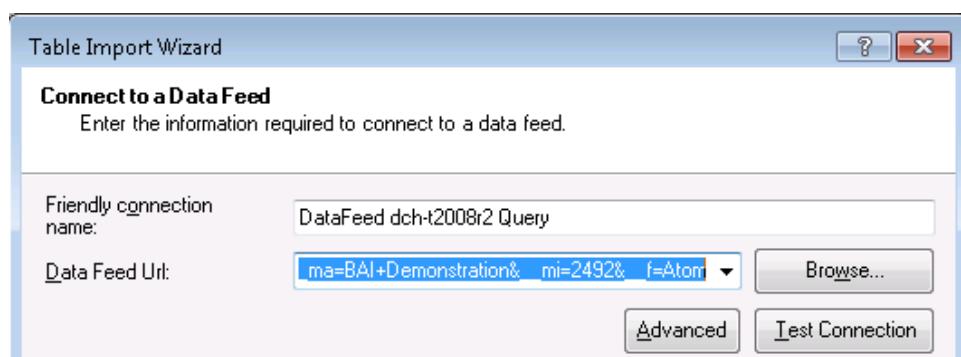

On the client workstation, start Excel 2010 and open a new sheet.

The screenshot shows the Microsoft Excel 2010 ribbon with the 'PowerPivot' tab selected. The ribbon tabs include File, Home, Insert, Page Layout, Formulas, Data, Review, View, and PowerPivot. Below the ribbon, the PowerPivot tab has several icons: PowerPivot Window (highlighted), New, Delete, Measure, Measure Settings, PivotTable Report, Create Linked Table, Update All Excel Data, Settings Options, Field List Show/Hide, and Relationship Detection. A tooltip for 'PowerPivot Window' provides instructions: 'Go to the PowerPivot window to load and prepare data or continue working on data already added to this workbook.' Another tooltip for 'PowerPivot for Excel' says 'Press F1 for add-in help.' The Excel window shows a blank worksheet with columns D through K.

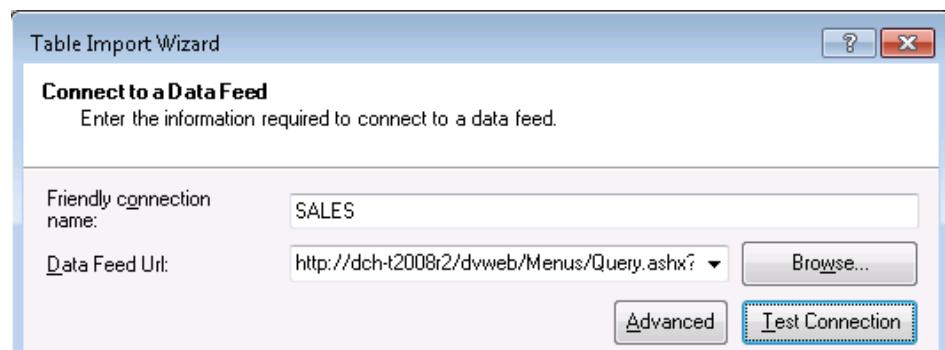

Select the **PowerPivot** Tab and click the **PowerPivot Window** icon:

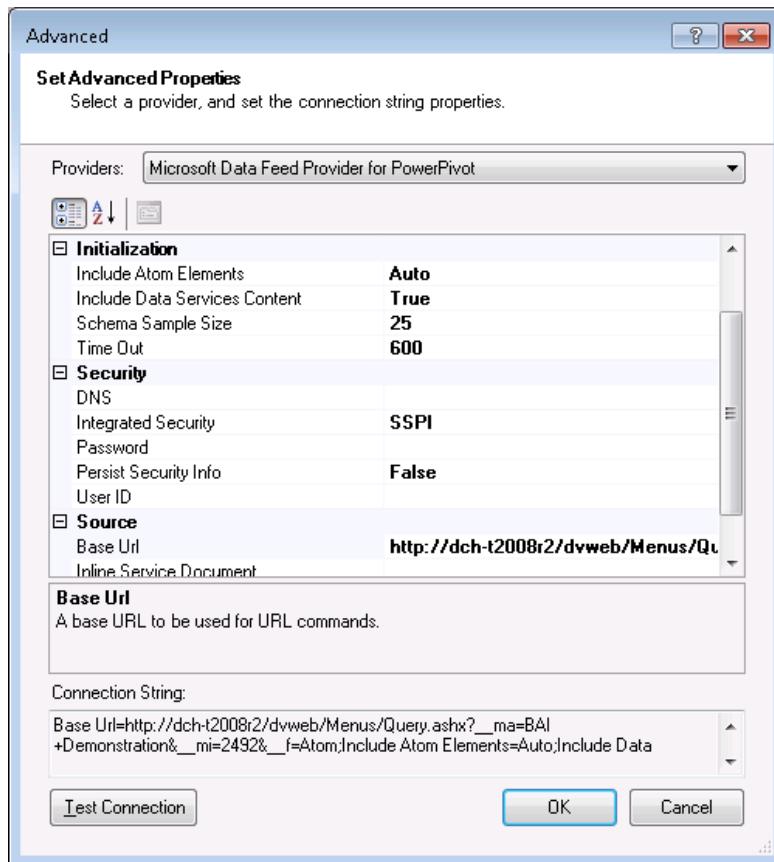

Click the **From Data Feeds** icon, then paste the URL in the **Data Feed Url** box

And change the Friendly connection name to an easier name: (table name for example):

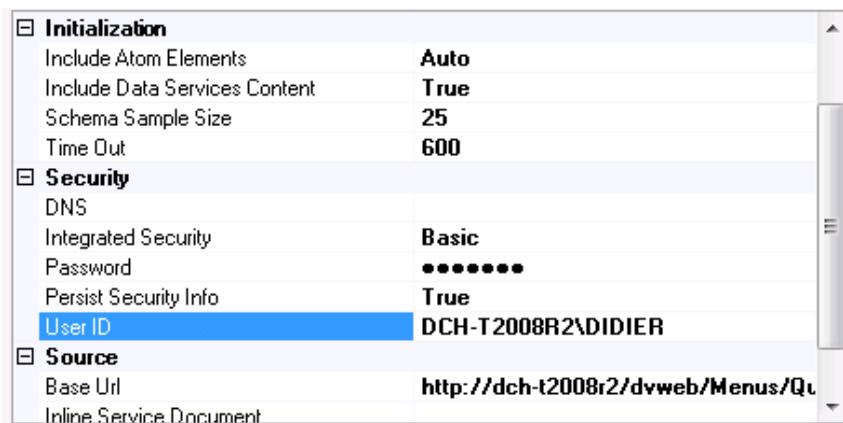

The **Test Connection** could work immediately if you are under Windows Authentication and recognized by the Server. In other case, you could need to specify the login to be used. To do so, click the **Advanced** button:

In the above dialog box:

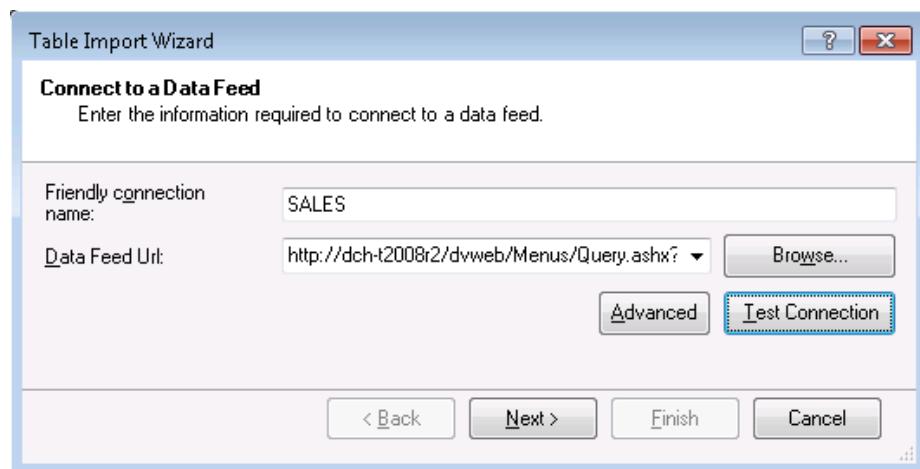

- change **SSPI** with **Basic**
- Enter a valid **User ID** for the Server name visible in the URL
- Enter a valid **Password** for this User ID
- Change the **Persist Security Info** to **True**

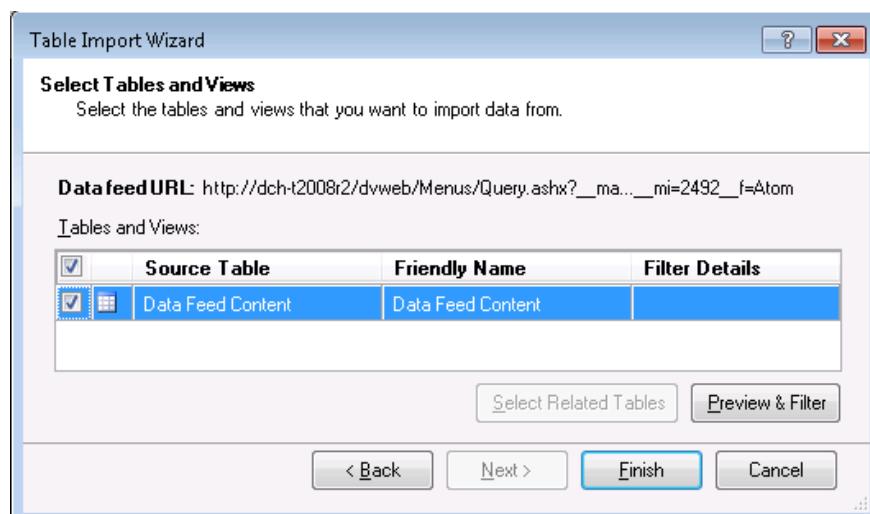

Click **Test Connection** then click **OK**.

Click **OK** twice to come back to the previous windows:

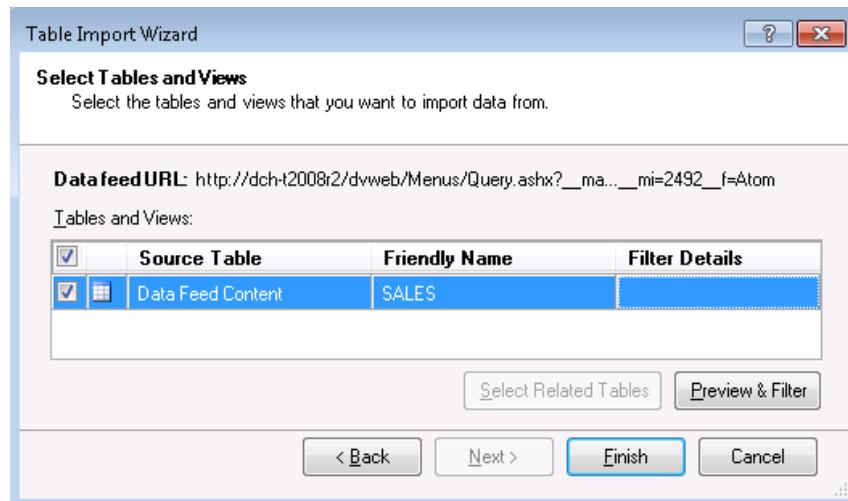

and click **Next**

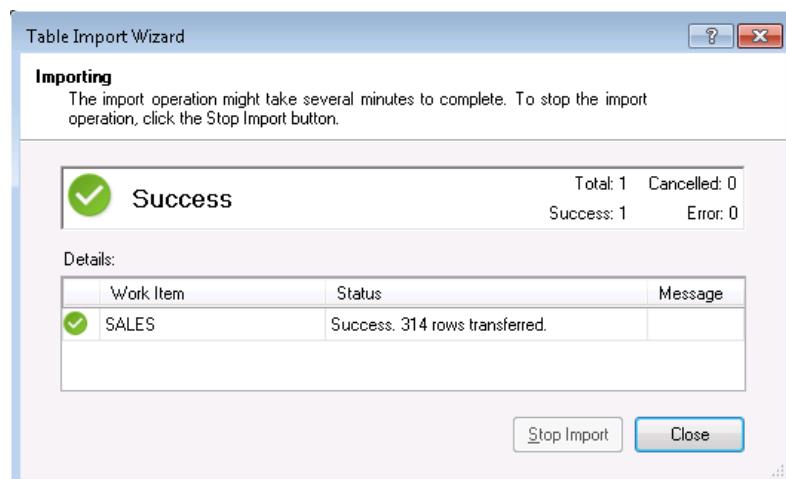

In the above screen, you also can give a friendly name for the **Data Feed Content**: we will use the Table Name: (it will be used as the Tab Name in the PowerPivot for Excel book):

Press F2 to modify the Friendly Name and enter the Table Name for example:

**Click Finish**

Once the data have been transferred to Excel, you will get this dialog:

Click **Close** and repeat, if needed, all steps to add another table.

Each time, the PowerPivot Windows for Excel will create a new tab, with the Friendly Name and the table content:

The screenshot shows the Microsoft PowerPivot ribbon with the "Home" tab selected. The main area displays a table titled "11021" with columns: NO, CUST, SAL, DATE, DATEYear, DATEQuarter, DATEMonth, DATEDay, DATENUM, and TOTAL. The data consists of 11 rows of sales records. Below the table, a tabs bar shows "SALES" and "SALESMAN". The status bar at the bottom indicates "Record: 1 of 314".

[NO]	CUST	SAL	DATE	DATEYear	DATEQuarter	DATEMonth	DATEDay	DATENUM	TOTAL
11021	1005	7	11/01/2011	2011	1	1	11	20110111	136180
11032	1008	5	08/07/2011	2011	3	7	8	20110708	70853,5
11033	1008	5	08/07/2011	2011	3	7	8	20110708	81310,5
11034	1019	15	10/07/2011	2011	3	7	10	20110710	79539,8
11035	1019	15	10/07/2011	2011	3	7	10	20110710	90101,2
11045	1013	6	30/07/2011	2011	3	7	30	20110730	167592,3
11046	1005	7	27/07/2011	2011	3	7	27	20110727	180778,7
11050	1008	5	07/08/2011	2011	3	8	7	20110807	71976,55
11051	1008	5	07/08/2011	2011	3	8	7	20110807	81900,2
11055	1006	4	17/08/2011	2011	3	8	17	20110817	71079,8

Note that for any date, time or date time field found, some new dimension are created such as Year, Quarter, Month, Day etc.

If we repeat the steps for the Salesman Table we get 2 Tabs inside the PowerPivot for Excel Book:

The screenshot shows the Microsoft PowerPivot ribbon with the "Home" tab selected. The main area displays a table titled "1" with columns: SAL, SALNAME, AREA, and Add Column. The data consists of 11 rows of salesman records. Below the table, a tabs bar shows "SALES" and "SALESMAN". The status bar at the bottom indicates "Record: 1 of 18".

SAL	SALNAME	AREA	Add Column
1	Bill Raley	NORTH-WEST	
2	Sandra Davis	NORTH-WEST	
3	Jean Martin	SOUTH	
4	Diane Meyer	ATLANTIC	
5	James Smith	CENTRAL	
6	Jim Baxter	SOUTH	
7	Georges Dunel	WEST	
8	Robert Salta	NORTH-WEST	
9	John Brown	CENTRAL	
10	Enrique Lopez	SOUTH	
11	Joe Kramer	NORTH-WEST	

In the above screen, note the Refresh icon allowing to refresh data next time you will use this PowerPivot.

4.7.4. Step 4: Defining the Join condition for several tables

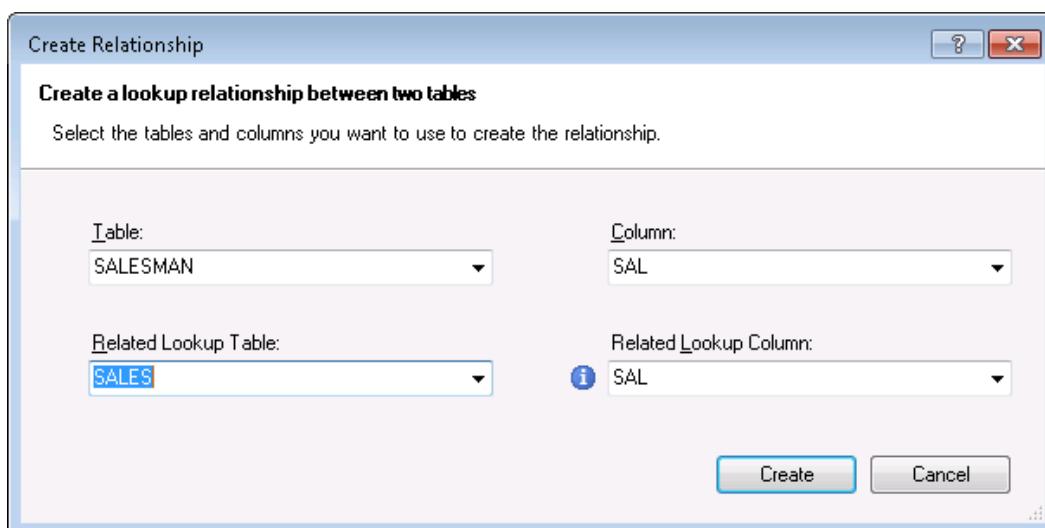

If more than one table is used, you must specify the join conditions between the tables.

To do so, select the **Design** Tab in the previous screen:

The screenshot shows the Microsoft Excel ribbon with the 'PowerPivot for Excel - Book1' tab selected. The 'Design' tab is active, indicated by a blue background. On the ribbon, there are several icons: 'Hide and Unhide Columns', 'Add', 'Delete', 'Calculation Options', 'Existing Connections', 'Create Relationship' (which is highlighted in yellow), 'Manage Relationships', 'Table Properties', and 'Edit'. Below the ribbon is a PivotTable with columns labeled [NO], CUST, S., DATE, DATEYear, and TEMonth. A tooltip for the 'Create Relationship' icon is displayed, stating: 'Create a relationship between two tables in the PowerPivot window.'

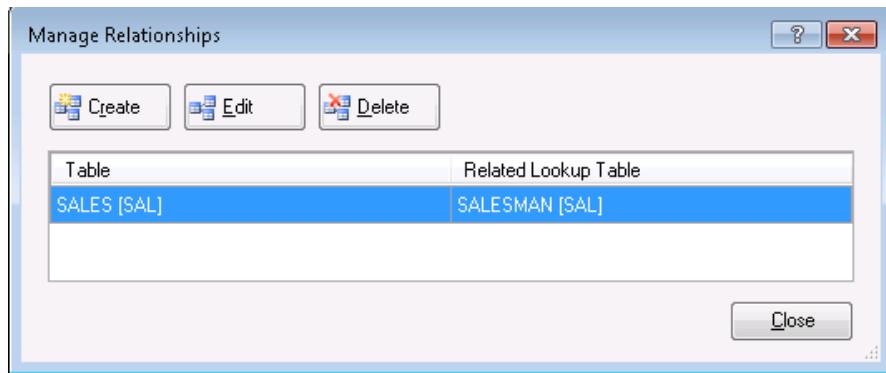

and click the **Create Relation Ship** icon:

Define the required relationship between two tables and click **Create**.

To modify or add relationships, click the **Manage Relationships** icon:

The screenshot shows the Microsoft Excel ribbon with the 'PowerPivot for Excel - Book1' tab selected. The 'Design' tab is active. The 'Manage Relationships' icon is highlighted in yellow. Below the ribbon is a PivotTable with columns labeled [NO], CUST, S., DATE, DATEYear, and TEMonth. A tooltip for the 'Manage Relationships' icon is displayed, stating: 'Create, view, or delete relationships between tables in the PowerPivot window.'

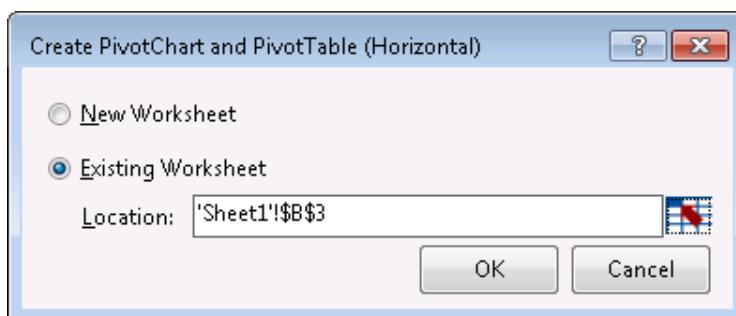

From here you can create, modify or delete a relationship. Click **Close** when finish.

4.7.5. Step 5: Creating the PowerPivot in the Excel Sheet

In the previous screen, click the **PivotTable** icon to create the PowerPivot in the existing sheet or a new sheet:

The screenshot shows the Microsoft Excel ribbon with the "PowerPivot for Excel - Book2" tab selected. In the ribbon, the "Home" tab is active. On the far right of the ribbon, there is a dropdown menu for "PivotTable". This dropdown menu lists several options: "PivotTable", "PivotChart", "Chart and Table (Horizontal)" (which is highlighted in yellow), "Chart and Table (Vertical)", "Two Charts (Horizontal)", "Two Charts (Vertical)", "Four Charts", and "Flattened PivotTable". Below the ribbon, a table is displayed with data from the "SALES" table. The table has columns for SALNAME and AREA. The data includes rows for Bill Raley (NORTH-WEST), Sandra Davis (NORTH-WEST), Jean Martin (SOUTH), Diane Meyer (ATLANTIC), and James Smith (CENTRAL).

And select for example the “Chart and Table (Horizontal)” branch.

If we select the \$B\$3 cell, this cell will be the most top left corner of the PivotTable area. Click **OK** to confirm:

The screenshot shows a Microsoft Excel spreadsheet with a PivotTable and a PivotChart. The PowerPivot Field List pane on the right lists various dimensions and measures like SALES, DATE, and TOTAL. The PivotTable Field List pane also lists these fields. A callout box highlights the 'Row Labels' section in the PowerPivot Field List.

In the above screen, you see on the top right corner the dimensions and measures available for each table, and on the bottom right corner the boxes in which you can drag and drop the dimensions and measures that you need.

The **Row Labels** box will receive one or several dimensions that you want to see as rows.

The **Column Labels** box will receive one or several dimensions that you want to see as columns.

The **Σ Values** box will receive one or several numeric measure(s) that you want to see in the data area of the Pivot Table.

The **Report Filter** box can receive a dimension not visible in the Pivot Table, but used as a filter (criteria) to modify later what you want to see.

Then you can define one or several **Slicer(s)**, in a vertical and/or horizontal position. The slicers will display all available values as buttons allowing you later to click directly on the button(s) whose values should be displayed.

Example with the above Sales and Salesman Tables with **Vertical Slicers**:

The screenshot shows a bar chart titled 'Total' with data for various salespeople. To the left, there are four vertical slicers for DATEYEAR (2011, 2012, 2013), DATEQUARTER (1, 2, 3, 4), DATEMONTH (1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12), and DATEDAY (1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12). The PowerPivot Field List pane on the right shows selected fields: DATEYEAR, DATEQUARTER, DATEMONTH, DATEDAY, and TOTAL. The Row Labels section is set to 'SALNAME'. The Column Labels section is set to 'AREA' (ATLANTIC, CENTRAL). The Values section is set to 'Sum of TOTAL'.

SALESPERSON	AREA	Sum of TOTAL
Bill Raley	ATLANTIC	2 792 881,15 €
Diane Meyer	ATLANTIC	1 947 845,90 €
Doug Castro	ATLANTIC	796 902,48 €
Georges Dunel	ATLANTIC	791 636,21 €
James Smith	CENTRAL	392 397,29 €
Jean Martin	ATLANTIC	1 522 314,95 €
Jim Baxter	ATLANTIC	
Joe Kramer	ATLANTIC	
John Brown	ATLANTIC	
Karen Walker	ATLANTIC	
Kim Johnson	ATLANTIC	
Ric Smith	ATLANTIC	
Robert Salta	ATLANTIC	
Sandra Davis	ATLANTIC	
Tim Rosenberg	ATLANTIC	
Wanda Sanders	ATLANTIC	
Grand Total		3 976 914,65 €
		4 267 063,33 €

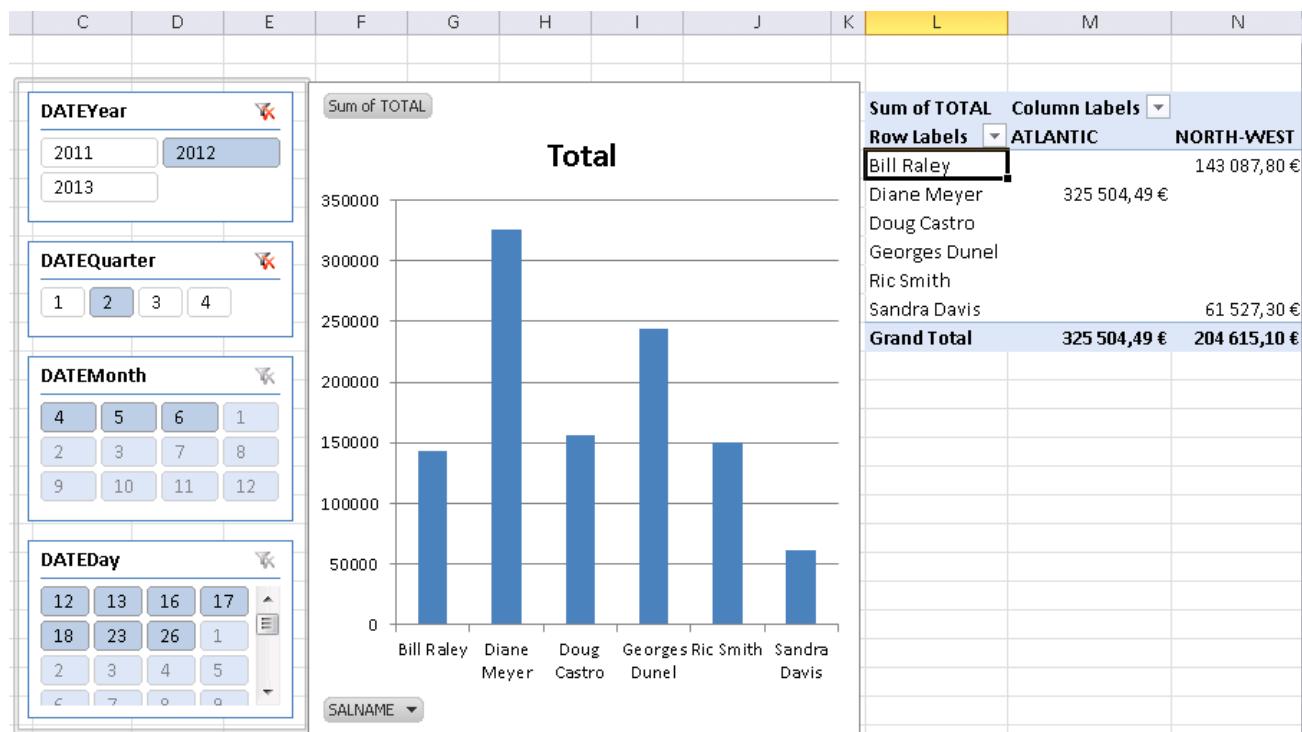

In the above example, the Area have been defined as Column Labels and Salesman Name as Row Labels

The TOTAL field has been added in the measures (Σ Values)

The Year, Quarter, Month and Day are used in the vertical slicers.

The currency format has been defined for the Sum of Total.

Now, if you close the Field List and select only the Year 2013 by clicking on the Year slicer, you will only get data from the year 2013, and if you click on Quarter 2 you will only get data from Quarter 2 of the Year 2013:

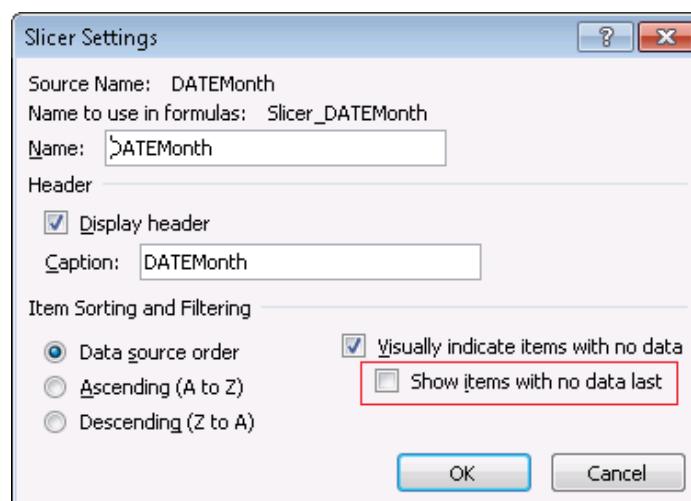

As you can see in the above picture, all months and/or days having no data appear in a light blue grey color.

Only years, quarters, months and days having data appear in a darker color.

You also see that the items without data are set at the end of the list in each slicer square.

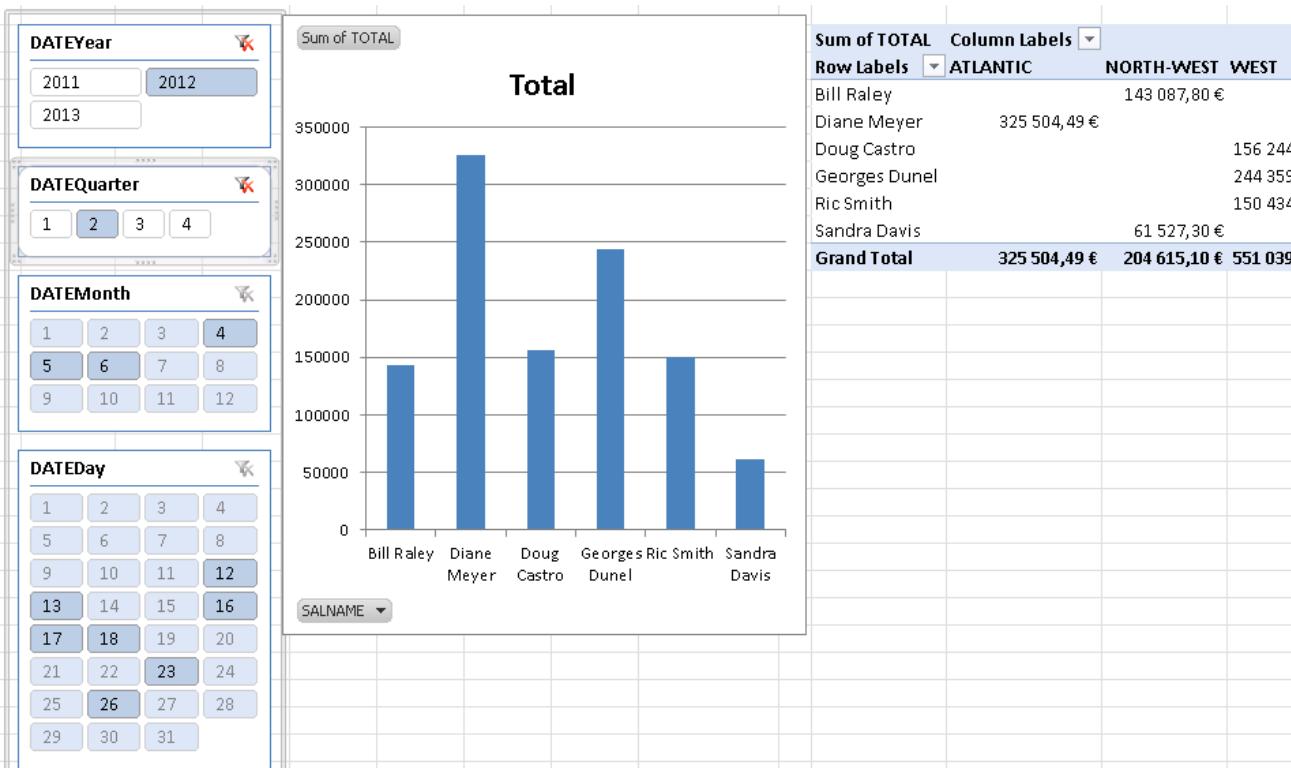

You can modify this presentation using the following commands:

Make a right mouse click on a slicer and select the **Slicer Settings**

Here you can change some options to modify the presentation, for example remove the option “**Show items with no data last**” and click OK for all Date Slicers. The previous example will be as follow if you apply for Months and Days slicers (and if needed Quarter and Year):

Now the month numbers are always in the order from 1 to 12, even if there are no data some months. Same comment for the days.

To **cancel** a slicer selection, just click the **Red Cross with the filter icon** in the slicer box:

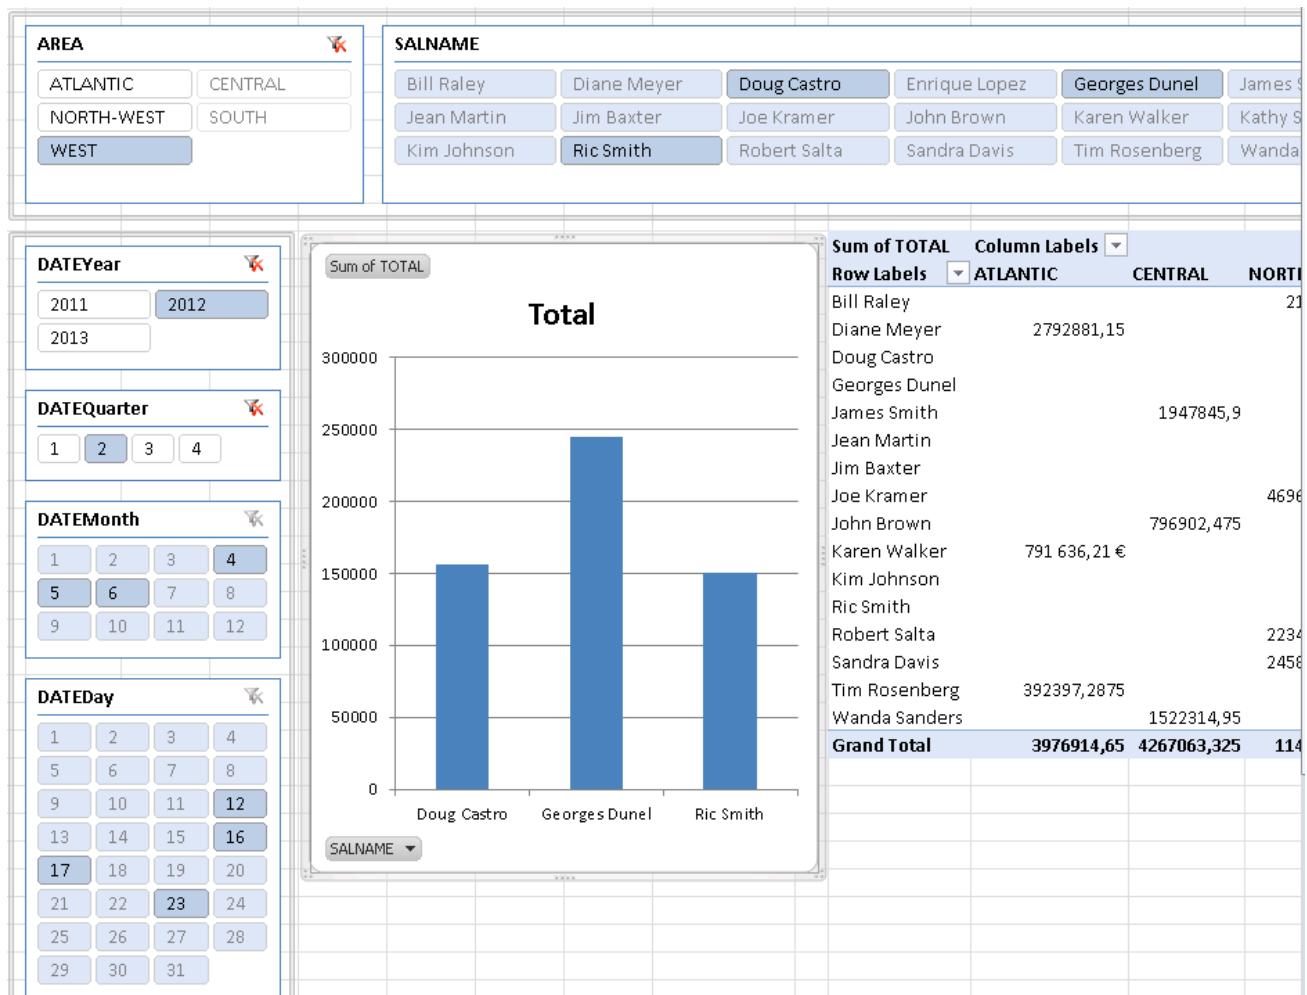

Save your Excel Sheet.xlsx to finish.

Next time you will open it, you can refresh the table data, if needed, using the **Refresh** icon in the PowerPivot Window for Excel.

You also can add **Horizontal Slicers**, example with the AREA and SALESMAN.

If you click on WEST Area, only the vendors from this area will be displayed in the SALESMAN Slicer and the Graph:

5. Schedule

We have already explained how to [create a Task](#) from a report (or query or cube) and have created a task named “**MyReportLastMonth**”. Note that the **Tasks** list contains a standard task installed by Click&DECIDE Enterprise Edition as well as the tasks you have created, such as the **MyReportLastMonth**:

Name	Type
MyReportLastMonth	export
Purge RSS Feed Table	sql

New SQL Task **New Generic Task**

Note that the two above buttons only appear for a Super Administrator Group

This section explains how to schedule one or several tasks at the same time. To do so please follow the steps below:

1. Click the **Schedule** command in the Web Portal (visible only if you belong to a “Super Administrator” Group on the Server).

Scheduled Tasks

Tasks

Import

2. Click **Scheduled Tasks** on the above windows. The Scheduled Task List should appear as follow the first time as we provide a task to purge the Alerts Tables:

Name	Frequency	Status	Last Run Time	Next Run Time	Last Run Result
Purge Alerts Tables	Every day	Ready	10/22/2015 12:15:00 AM	10/23/2015 12:15:00 AM	Succeeded

New Scheduled Task

5.1. Create a New Scheduled Task

To create a new scheduled task, please follow the steps below.

5.1.1. General

1. Click the **New Scheduled Task** button.

Change the default Scheduled Task Name “New Scheduled Task” to a new name (each scheduled task must have a distinct name) as the following example:

General

Scheduled Task Name:

Actions:

Available tasks	Tasks to be run
MyReportLastMonth	
Purge RSS Feed Table	

2. Select in the left **Available tasks** pane the task(s) you want to be performed by your scheduled task.
3. Click the right button to add these tasks to the right **Tasks to be run** pane.
4. Add a **comment** if necessary. This is optional.
5. Clear the **Active** check box if you need to disable this task temporarily.

The screenshot shows the 'General' tab of the 'New Scheduled Task' interface. It includes fields for the scheduled task name ('MyMonthlyReportScheduledTask'), actions ('Available tasks: Purge RSS Feed Table'), tasks to be run ('MyReportLastMonth'), comments ('Current month sales'), and an active status checkbox ('Active (Scheduled Task Runs at Specified Time)').

5.1.2. Frequency

6. Define the **Frequency** you need for the selected tasks from the following:

Now (the task will run immediately between now and the next minute maximum).

The screenshot shows the 'Frequency' configuration for 'Now'. It includes a dropdown menu for frequency set to 'Now' and a checkbox for 'Delete the Task when Done' which is unchecked.

Note: select the **Delete Task when Done** check box if you do not wish to keep this scheduled task.

Once (the task will run only once at the specified date and time).

The screenshot shows the 'Frequency' configuration for 'Once'. It includes a dropdown menu for frequency set to 'Once' and a field for 'Start Date and Time' showing '10/22/2015 12:17:08 PM' with a calendar icon.

Specify the **Start Date and Time**, the task will be saved unless you decide to delete it later.

Daily (the task will run every day starting at the specified date and time).

The screenshot shows the 'Frequency' configuration for 'Every day'. It includes a dropdown menu for frequency set to 'Every day', a field for 'Start Date and Time' showing '10/22/2015 4:00:00 AM' with a calendar icon, a checkbox for 'End Date' which is unchecked, and a field for 'Run the Scheduled Task every' with '1 Day(s)' selected.

Specify the **Start Date and Time** with the Calendar; the task will be saved unless you decide to delete it later.

Specify an **End Date** if necessary.

Define whether the task must be run every day or every X days via the **Run the Scheduled Task every x Day(s)** check box.

Every Week (the task will run each week starting at the specified day and time).

Frequency	
Frequency:	Every week
Start Date and Time	10/22/2015 4:00:00 AM <input type="button" value="Calendar"/>
<input type="checkbox"/> End Date	10/22/2015 <input type="button" value="Calendar"/>
Run the Scheduled Task every	<input checked="" type="checkbox"/> 1 Week(s), on <input checked="" type="checkbox"/> Monday <input type="checkbox"/> Tuesday <input type="checkbox"/> Wednesday <input type="checkbox"/> Thursday <input type="checkbox"/> Friday <input type="checkbox"/> Saturday <input type="checkbox"/> Sunday

Specify the **Start Date and Time**, the task will be saved unless you decide to delete it later.

Specify an **End Date** if necessary.

Define whether the task must be run every week or every X weeks via the **Run the Scheduled Task every x Week(s)** check box.

Specify which **day(s) of the Week** you need to run this scheduled task by selecting the day of the week check boxes as appropriate.

Every Month (the task will run each month starting at the specified date and time).

Frequency	
Frequency:	Every month
Start Date and Time	11/1/2015 4:00:00 AM <input type="button" value="Calendar"/>
<input type="checkbox"/> End Date	10/22/2015 <input type="button" value="Calendar"/>
<input checked="" type="radio"/> The <input type="text"/> 1 of a Month	
<input type="radio"/> The <input type="text"/> First <input type="text"/> Monday of a Month	
Run the Scheduled Task on the Following Months:	
<input checked="" type="checkbox"/> January <input checked="" type="checkbox"/> February <input checked="" type="checkbox"/> March <input checked="" type="checkbox"/> April <input checked="" type="checkbox"/> May <input checked="" type="checkbox"/> June <input checked="" type="checkbox"/> July <input checked="" type="checkbox"/> August <input checked="" type="checkbox"/> September <input checked="" type="checkbox"/> October <input checked="" type="checkbox"/> November <input checked="" type="checkbox"/> December	

Specify the **Start Date and Time**, the task will be saved unless you decide to delete it later.

Specify an **End Date** if necessary.

Select which **day of the month** the task must be run (between 1 to 31).

Select which day of the week (between Monday to Sunday) specifying the position of this day in the month (between First, Second, Third, Fourth or Last).

Select the **Run the Scheduled Task on the following Months** check boxes as appropriate, by selecting the required months of the year.

5.1.3. Repetition

7. Define the **Repetition** if needed:

For each frequency, you can specify if you need to repeat the scheduled task.

Repetition	
<input type="checkbox"/> Repeat the Scheduled Task	
Interval:	<input type="text"/> 1 <input type="button" value="Minutes"/>
Duration:	<input type="text"/> 1 Hours <input type="text"/> 0 Minutes

Repeat the Scheduled Task: check box. Enter an **Interval** for a time dimension in **Minutes** or **Hours**.

Enter a repetition **Duration in Hours** and **Minutes**.

5.1.4. Set Account Information

Set Account Information

Run as:	SYSTEM
Password:	[Redacted]

Finish **Cancel**

Before saving the scheduled task, be sure the SYSTEM user account is correct for your situation. See next paragraph for more details.

8. Click **Finish** to save the new Scheduled Task, that will appear in the list below:

Schedule Scheduled Tasks [Didier] Logout

Name	Frequency	Status	Last Run Time	Next Run Time	Last Run Result
MyReportScheduledTask	Every month	Ready		11/1/2015 4:00:00 AM	[Icons]
Purge Alerts Tables	Every day	Ready	10/22/2015 12:15:00 AM	10/23/2015 12:15:00 AM	Succeeded

New Scheduled Task

5.1.5. Working with the Scheduled Task Account

When you run a task, the SYSTEM user account will be used by default. All scheduled tasks will be saved under the **Local System** account (note the **Security Options** in the **Windows Task Scheduler** on the server machine).

Task Scheduler

File Action View Help

Task Scheduler (Local)

Task Scheduler Library Microsoft

Name	Status	Triggers
GoogleUpdateTaskUser5-1-5-2...	Ready	At 6:30 PM every day
GoogleUpdateTaskUser5-1-5-2...	Ready	At 6:30 PM every day - After triggered, repeat every 1 hour for a duration of 1 day.
MyMonthlyReportScheduledTask	Ready	At 12:00 AM on day 1 of January, February, March, April, May, June, July, August, September, October
Purge Alerts Tables	Ready	At 12:15 AM every day

General Triggers Actions Conditions Settings History (disabled)

Name: MyMonthlyReportScheduledTask

Location: \

Author: Click and Decide Task Manager

Description:

Security options

When running the task, use the following user account:
SYSTEM

Run only when user is logged on
 Run whether user is logged on or not
 Do not store password. The task will only have access to local resources

Actions

- Pro...
- Del...
- Help

To use another user account or modify the settings, please follow the steps below. For example, if you wish to run the task under French regional settings rather than English regional settings, or if you wish to modify parameters for network security reasons.

Before saving the Scheduled Task by clicking the Finish button;

Set Account Information

Run as:	DCH-T2008R2\Administrator
Password:	*****

Finish **Cancel**

1. Enter the new Login in the Run As box
2. Enter the **Password**.
3. Click **Finish** at the base of the **Scheduled Tasks Configuration** pane in the Web Portal when all the required options are selected. The new scheduled task will appear in the left top list.
4. Open the **Windows Task Scheduler**, select **Start> Control Panel> Administrative Tools> Task Scheduler** to see the modified Scheduled Task

The screenshot shows the Windows Task Scheduler interface. On the left, there's a tree view with 'Task Scheduler (Local)', 'Task Scheduler Library', and a 'Microsoft' folder. The main pane lists several tasks under 'Triggers':

Name	Status	Trigger
GoogleUpdateTaskUser5-1-5-21-415...	Ready	At 6:30 PM every day
GoogleUpdateTaskUser5-1-5-21-415...	Ready	At 6:30 PM every day - After triggered, repeat every 1 hour for a duration of 1 day.
MyMonthlyReportScheduledTask	Ready	At 12:00 AM on day 1 of January, February, March, April, May, June, July, August, September, October, November, December
Purge Alerts Tables	Ready	At 12:15 AM every day
User Feed Synchronization-{2BB52...	Ready	At 5:24 PM every day - Trigger expires at 8/9/2023 5:24:18 PM.

The right pane shows the properties for 'MyMonthlyReportScheduledTask':

- General** tab: Name is 'MyMonthlyReportScheduledTask', Location is '\', Author is 'Click and Decide Task Manager', and Description is empty.
- Triggers** tab: Shows the trigger defined above.
- Actions** tab: Not visible.
- Conditions** tab: Not visible.
- Settings** tab: Not visible.
- History (disabled)** tab: Not visible.
- Security options** tab: Set to run as 'DCH-T2008R2\Administrator'. Options include 'Run only when user is logged on' (radio button selected), 'Run whether user is logged on or not', 'Do not store password. The task will only have access to local resources' (checkbox), and 'Run with highest privileges' (checkbox).
- Configure for:** Set to 'Windows Vista™, Windows Server™ 2008'.

5. Press **F5** if necessary to refresh the right pane of the **Task Scheduler**.

5.2. Edit, Delete or Run Now a Scheduled Task

To edit or delete a scheduled task, please perform the steps below:

1. Click the **Schedule** command in the Web Portal (visible only if you belong to a "Super Administrator" Group on the Server).

The screenshot shows the Click&DECIDE Web Portal. At the top, there's a navigation bar with 'Schedule' (highlighted in green), 'Didier' (user name), and 'Logout'. Below the navigation bar, there's a sidebar with 'Scheduled Tasks' (highlighted in green) and 'Tasks'.

2. Click **Scheduled Tasks** on the above windows. The Scheduled Task List should appear as follow the first time as we provide a task to purge the Alerts Tables:

Scheduled Tasks						Logout
Name	Frequency	Status	Last Run Time	Next Run Time	Last Run Result	
MyReportScheduledTask	Every month	Ready		11/1/2015 4:00:00 AM		
Purge Alerts Tables	Every day	Ready	10/22/2015 12:15:00 AM	10/23/2015 12:15:00 AM	Succeeded	
New Scheduled Task						

5.2.1. Edit:

Click directly the Scheduled task name you wish to modify in the editor.

5.2.2. Delete

Click the icon to remove this scheduled task.

5.2.3. Run Now

Click the icon to run now the Scheduled Task (useful to test it after creation).

5.3. Copy a Scheduled Task Shortcut

Sometimes it could be useful to authorize someone not being a Super Administrator to be able to run a Scheduled Task: this is the purpose of the last right icon: this URL can be copied into a Menu branch accessible from some users belonging to a Group displaying this Menu. (New feature of Click&DECiDE 2013).

5.4. Working with SQL Tasks

To work with SQL Tasks please follow the steps below. You can create an SQL Task to send an SQL command to a database. Note that this is reserved to advanced users and Administrators only belonging to a **Super Administrator** Group.

The screenshot shows the 'User Groups' section of the Click&DECiDE Administration Manager. On the left is a tree view of user groups and their sub-items: iSeries, Connect, (All Items), Menu Access, Model Parameter, Rights, and Administrators. The 'Administrators' group is selected and highlighted with a red box. To the right is a detailed view of the 'Administrators' group settings. It includes fields for 'Name' (Administrators), 'Description' (empty), 'Super Administrator' (checked), and 'Enable' (checked). Below these are 'Properties' and 'Authentications' tabs.

In this example we are going to view one of the tasks installed by default, **Purge RSS Feed Table** SQL Task. The **Purge RSS Feed Table** task contains an SQL command which runs an SQL Server procedure. This procedure will purge the required tables.

Note: the database can be one of the Data Sources defined in the Click&DECiDE Administration Manager. (SQL Server, iSeries, ODBC Database).

1. Click the **Schedule** command in the Web Portal, the click the **Tasks** branch:

Note that the two above buttons only appear for a Super Administrator Group

2. Select the **Purge RSS Feed Table** task.
3. Note the **Purge RSS Feed Table** task is opened in the Task Editor.

Note that if the User ID is empty, the program accepts an empty Password, because it could be a database under Windows Authentication.

But if the User ID is not empty, the program also accepts the password to be empty or not empty when creating the task, but, later, when editing this task again, the program always remove the password and a warning message will advise the user that the password is empty, so that he has to enter it again if exists.

5.5. Creating Generic Tasks

You can create a Generic Task to execute a program. Note this is reserved to advanced users and Administrators only. In the following example we will create a Generic Task which runs a VBS Script, named Export_Excel.vbs, located in the C:\Users\Public\Documents\Click and DECiDE Samples\Builder\Automation.

To create a Generic Task, please follow the steps below.

1. Click the **Schedule** command in the Web Portal, the click the **Tasks** branch:

Name	Type
MyReportLastMonth	export
Purge RSS Feed Table	sql

[New SQL Task](#) [New Generic Task](#)

Note that the two above buttons only appear for a Super Administrator Group

1. Click **New Generic Task** button.
2. Enter the **Task Name**.
3. Enter the **Run Command**. In this example a VBS Script, named Export_Excel.vbs will be run, the file is located in the following directory: Click&DECIDE\BAI\Sample\Automation.

Task Name: Export_to_Excel

Comments:

Run Command: Cscript.exe "C:\Users\Public\Documents\Click and DECIDE Samples\Builder\Automation\Export_To_Excel.vbs"

[Finish](#) [Cancel](#)

4. Click **Finish**.
5. Note your new SQL Task appears in the **Tasks** branch in the left pane.

Name	Type
Export_to_Excel	generic
MyReportLastMonth	export
Purge RSS Feed Table	sql

5.6. Running Successive Scheduled Tasks

When you run a scheduled task, the program will run task after task. However, if a task returns an error, the task that follows it will not be run. For this reason we have created a program named D7CheckDay.exe that generates an error if the current day is different from the parameter. For example, "D7CheckDay.exe" 1 will stop all the remaining tasks in the Scheduled Task if we are not the first day of any month, and will continue to run the remaining tasks if we are the first day of the month.

5.6.1. Run a task daily but only if first day of the month:

Schedule Tasks ContinuelfFirstDayOfTheMonth [Didier] Logout

Task Name	ContinuelfFirstDayOfTheMonth
Comments	
Run Command:	"C:\Program Files\Click and DECIDE\BAI\D7CheckDay.exe" 1

Finish Cancel

This is useful when you wish to create a Scheduled Daily Task running successively:

- the Consolidation, Aggregation and Purge tasks
- followed by the Daily Report Generation task
- then check if we are the first day of the Month
- then, if true, run the Monthly Report Generation task, or if false stop the procedure.
- "D7CheckDay.exe" 31 will check if we are the 31st day of the month

5.6.2. Run a task Daily but only if Last Day of the Month

- however "D7CheckDay.exe" -1 will check if it is the last day of the month (ex: 28th of February, 31st of March or 30th of November), for example:

General

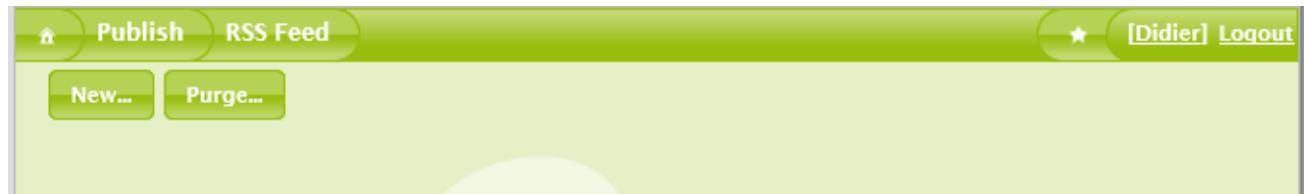

Scheduled Task Name:	Global NSI Task				
Actions:	<table border="1"><tr><td>Available tasks</td><td>Tasks to be run</td></tr><tr><td>ExportToExcel MyReportLastMonth Purge RSS Feed Table</td><td>Click&DECIDE Consolidation Aggregation Pu Daily Report Generation ContinuelfFirstOfTheMonth Monthly Report Generation</td></tr></table>	Available tasks	Tasks to be run	ExportToExcel MyReportLastMonth Purge RSS Feed Table	Click&DECIDE Consolidation Aggregation Pu Daily Report Generation ContinuelfFirstOfTheMonth Monthly Report Generation
Available tasks	Tasks to be run				
ExportToExcel MyReportLastMonth Purge RSS Feed Table	Click&DECIDE Consolidation Aggregation Pu Daily Report Generation ContinuelfFirstOfTheMonth Monthly Report Generation				
Comments:	Network Security Intelligence Daily Task				
<input checked="" type="checkbox"/> Active (Scheduled Task Runs at Specified Time)					

6. Publish

The **Publish** menu enables you to access the table where the RSS Feeds information is saved. You can consult the table content, and create new records or deleted obsolete records from the Publish menu.

If an alert generated by a report or a scheduled task is supposed to add or update a record in this table, then you can consult the **Publish** box to check if the expected record has been added successfully.

6.1. Working with the RSS Feed Table

You can distribute information via RSS Feed, to do so, please follow the steps below.

1. Click the RSS Feed icon in your navigator bar or enter the following URL in your browser:

<http://servername/dvweb/dvrss.ashx>

Click here to access to RSS Feeds

Note: if you want to use RSS Feed under the Chrome browser, you need to install this extension:

<https://chrome.google.com/webstore/detail/rss-subscription-extensio/nlbjncdgjoecebhnmkbbdekmmmcfdj>

2. Note the Click and DECIDE RSS feed appears:

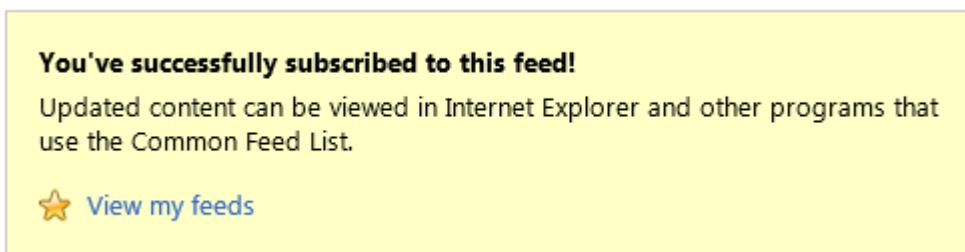

The screenshot shows a Windows Internet Explorer window with the title "Click & DECIDE RSS - Windows Internet Explorer". The address bar shows the URL "http://localhost/dvweb/". The main content area displays a yellow box with the heading "Click & DECIDE RSS" and a message about RSS feeds. It includes a link "Subscribe to this feed". To the right, there is a "Displaying" panel showing "4 / 4" items, with "All" selected. Below it is a "Sort by:" dropdown menu with options "Date" and "Title".

3. Click **Subscribe to this feed** if you want to add this RSS Feed to your Feed Headlines gadget.

4. Click the **Subscribe** button

5. Select the **Publish** command in the Web Portal
6. Click **RSS Feed** to create, edit or remove an RSS Feed from the RSS Feed Table.

RSS Feed							[Administrator] Logout

4. Click the **OK** icon to confirm.

6.1.2. Creating a RSS Feed record

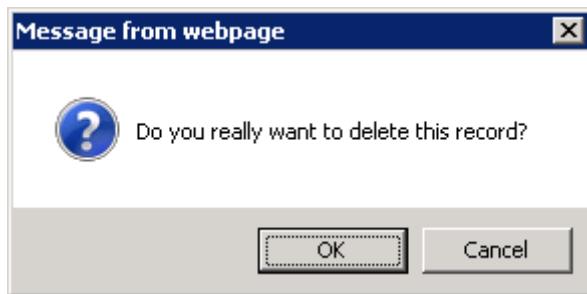

To create an RSS Feed, please follow the steps below.

1. Click **RSS Feed** in the **Publish** command in the Web Portal.
2. Click the **Add an RSS feed to publish** button at the bottom of the RSS feed screen.
3. Configure the parameters for the new RSS feed as appropriate.
4. Note the **Date** field's content can be used by the Purge command later.
5. Note the **Category** text box can remain empty (Optional).
6. **Note:** Standard RSS Feed readers do not use **Users** and **Groups**
7. Click **Add**.

6.1.3. Deleting an RSS Feed

To delete an RSS Feed, please follow the steps below.

1. Click **RSS Feed** in the **Publish** command in the Web Portal.
2. Click the **Remove** icon to the left of the **RSS Feed** you want to delete. A message will appear asking you to confirm.

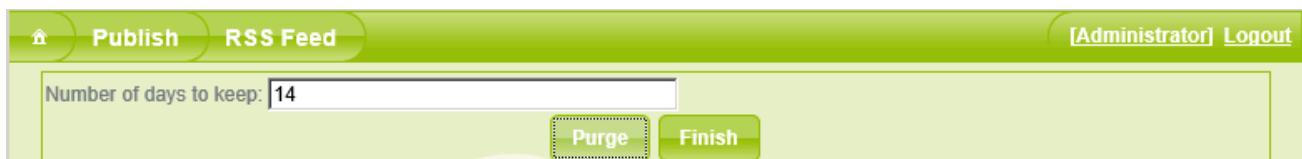

3. Click **OK**.

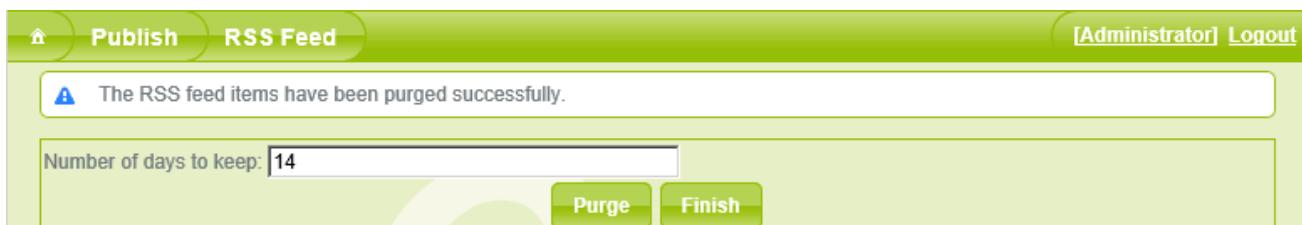

6.1.4. Purging Obsolete RSS Feeds

You can purge obsolete an RSS Feed, whose date is older than a specified number of days. To purge an obsolete RSS Feed, please follow the steps below.

1. Click **RSS Feed** in the **Publish** command in the Web Portal.
2. Click the **Purge existing RSS feeds** button at the bottom of the RSS feed screen.
3. Enter the **Number of days to keep**

4. Click **Purge**. The success message appears under the **Number of days to keep** text box.

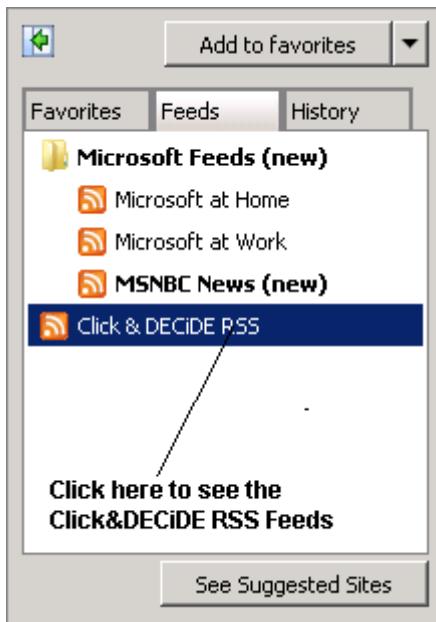

5. Click **Finish**.

6.1.5. Accessing your RSS Feed through your browser:

Under Internet Explorer click this icon to access the RSS Feeds:

Then:

7. Working with Date Keywords

7.1. Invariant Predefined Functions

Invariant functions are keyword or expressions that can be understood by Click&DECIDE whatever your PC's regional settings language is.

INVARIANT PREDEFINED FUNCTIONS		
Function	Range for x	Comment
HOURS (Note: in INVARIANT mode, hours is always written in plural even if the value is x=0 or x=1).		
x hours ago	0 - 12	The date time interval from the beginning of the hour specified in the past from XX:00:00 to XX:59:59.
in x hours	0 - 12	The date time interval from the beginning of the hour specified in the future from XX:00:00 to XX:59:59.
since x hours	0 - 12	The interval from the beginning of the hour specified in the past at XX:00:00 up to now.
until x hours	1 - 12	The interval from now to the end of the hour specified in the future at XX:59:59.
DAYS (Note: in INVARIANT mode, days is always written in plural even if the value is x=0 or x=1).		
x days ago	0 - 7	The date of the day specified in the past from 00:00:00 to 23:59:59.
in x days	0 - 7	The date of the day specified in the future from 00:00:00 to 23:59:59.
since x days	0 - 7	From the beginning of the date of the day specified in the past from 00:00:00 up to now.
until x days	1 - 7	From now up to the end of the date of the day specified in the future at 23:59:59.
WEEKS (Note: in INVARIANT mode, weeks is always written in plural even if the value is x=0 or x=1).		
x weeks ago	0 - 7	The date interval for the week specified in the past from YYYYMMDD 00:00:00 to YYYYMMDD 23:59:59.
in x weeks	0 - 7	The date interval for the week specified in the future from YYYYMMDD 00:00:00 to YYYYMMDD 23:59:59.
since x weeks	0 - 7	From the beginning of the first day of the week specified in the past at 00:00:00 up to now.
until x weeks	1 - 7	From now to the end of the last day of the week specified in the future at 23:59:59.
MONTHS (Note: in INVARIANT mode, months is always written in plural even if the value is x=0 or x=1).		
x months ago	0 - 12	The date interval for the first day of the month specified in the past from YYYYMM01 00:00:00 to YYYYMM31 23:59:59.
in x months	0 - 12	The date interval for the first day of the month specified in the future from YYYYMM01 00:00:00 to YYYYMM31 23:59:59.
since x months	0 - 12	From the beginning of the first day of the month specified in the past at 00:00:00 up to now.
until x months	1 - 12	From now up to the end of the last day of the month specified in the future at 23:59:59.
QUARTER (Note: in INVARIANT mode, quarters is always written in plural even if the value is x=0 or x=1).		

q1 or Q1		Uses the date interval for the First Quarter of the current year from YYYY0101 00:00:00 to YYYY0331 23:59:59.
q2 or Q2		Uses the date interval for the Second Quarter of the current year from YYYY0401 00:00:00 to YYYY0630 23:59:59.
q3 or Q3		Uses the date interval for the Third Quarter of the current year from YYYY0701 00:00:00 to YYYY0930 23:59:59.
q4 or Q4		Uses the date interval for the Fourth Quarter of the current year from YYYY1001 00:00:00 to YYYY1231 23:59:59.
x quarters ago	1 - 4	The date interval for the first day of the quarter specified in the past from YYYYMM01 00:00:00 to the last day of the same quarter at YYYYMM31 23:59:59.
in x quarters	1 - 4	The date interval for the first day of the quarter specified in the future from YYYYMM01 00:00:00 to the last day of the same quarter at YYYYMM31 23:59:59.
qx 1990 <---> qx 2030	1 - 4	Uses the date interval for the specified Quarter of the specified year from YYYY0101 00:00:00 to YYYY0331 23:59:59. (Note that the year can be between 1990 and 2030 in the current Click&DECiDE version 11.1.0 or greater).
YEARS (Note: in INVARIANT mode, years is always written in plural even if the value is x=0 or x=1).		
x years ago	0 - 10	The date interval from the first day of the year specified in the past at YYYY0101 00:00:00 to YYYY1231 23:59:59.
in x years	0 - 10	The date interval from the first day of the year specified in the future at YYYY0101 00:00:00 to YYYY1231 23:59:59.
since x years	0 - 10	From the beginning of the first day of the year specified in the past at YYYY0101 00:00:00 up to now.
until x years	1 - 10	From now up to the end of the last day of the year specified in the future at YYYY1231 23:59:59.

7.2. Standard Days and Months Functions By Language

In the following table the first column is the same for Invariant or English, other available languages can be used according to your PC's regional settings language:

Invariant and English	%s is a	French	German	Spanish	Catalan	Italian	Swedish
Days		Jours	Tags	Dias	Dies	Giorni	Dagar
DAY FROM LAST WEEK							
last %s	Day name	%s semaine dernière	%s letzter wochse	%s semana pasada	%s setmana passada	%s settimana scorsa	%s förra vecka
DAY ON NEXT WEEK

ShowParameters.aspx?_ma=BAI+Demonstration&_mi=2316">/dvweb/Menus>ShowParameters.aspx?_ma=BAI+Demonstration&_mi=2316				

8.4. Display

Display		
Function	Description	Comment
Display.aspx		
/dvweb/Menus/ Display.aspx?	Displays a runnable Menu item result with the navigation bar (Under a tablet or smartphone, no navigation bar is displayed).	Note: in the case of a runnable item, if the result already exists, it will be directly displayed, if not it will be run without the possibility to cancel. To run directly an item with the possibility to cancel, you must use ShowParameters.aspx with the &__e=1
/dvweb/Menus/Display.aspx?_ma=BAI+Demonstration&_mi=2558&_rp=Area+Chart+Sample.xgc		
Display.ashx		
/dvweb/Menus/ Display.ashx?	Displays a runnable Menu item result without the navigation bar, useful for drill-down/drill-up reports or Parent/Child Dashboards.	Note: in the case of a runnable item, if the result already exists, it will be directly displayed, if not it will be run without the possibility to cancel.
/dvweb/Menus/Display.ashx?_ma=BAI+Demonstration&_mi=2558&_rp=Dashboard+GC+Main.xgc		

8.5. Download

Download		
Functionalities	Description	Comment
Download.ashx		
/dvweb/Menus/ Download.ashx ?	Downloads a Menu Item or its result.	Note: in the case of a runnable item, if the result already exists, it will be directly displayed, if not it will be run without the possibility to cancel. To run directly an item with the possibility to cancel, you must use ShowParameters.aspx with the &__e=1&__sav=1
/dvweb/Menus/Download.ashx?__ma=BAI+Demonstration&__mi=2538&YEAR_PARAM=&SALNAME_PARAM=&PROD_REF_PARAM=&__f=PDF		

8.6. Query/WebQuery

Query /WebQuery		
Function	Comment	
Query.ashx		
/dvweb/Menus/ Query.ashx ?	Returns the raw data from a Menu Item Result.	Always run without the possibility to cancel. Use the &__ca=NN (minutes) to enable the browser cache in order to improve the performances.
/dvweb/Menus/Query.ashx?__ma=BAI+Demonstration&__mi=2528&P_Year=&__f=Google+Data+Table		
/dvweb/Menus/Query.ashx?__ma=BAI+Demonstration&__mi=2528&P_Year=[\"P_Year\",\"P_Year\"]&__f=WebQuery		
WebQuery.ashx		
/dvweb/ WebQuery.ashx ?	Returns the raw data from a Menu Item Result.	Short version of Query.ashx used for WebQueries. Do not need the &__f=WebQuery flag.
/dvweb/WebQuery.ashx?__ma=BAI+Demonstration&__mi=2528&P_Year=[\"P_Year\",\"P_Year\"]		
Note that for WebQuery URL longer than 255 characters, you can use the TinyURL described in this User Guide page 57.		

8.7. Share button shortcuts

Copy Shortcut in the Share Button		
Parameters		
Checked	Value	Result
No	default	The URL will not contain this parameter and the default value will be used for the query
Yes	Empty	The URL will contain &PARAM= or &PARAM=["PARAM", "PARAM"] for WebQueries
	default	The URL will not contain this parameter and the default value will be used for the query
	other	The URL will contain &PARAM=VALUE
