How to validate the Click&DECiDE Code Signature?

Date: February 17th, 2011

Problem:

Sometimes Windows 2008 does not contain the certificates allowing to validate our code signature.

Explanation:

The signature for SETUP.EXE and Data1.cab must be validated.

Solution:

The following certificates must be installed as Trsuted Root Authority in the local computer store.

- Thawte Primary Root CA G1 (EV)
- Thawte Primary Root CA G2 (ECC)

Steps

- 1. Download the certificates files at: http://www.clickndecide.com/downloads/kits/thawte-roots.zip
- 2. Unzip the zip file in a temporary directory. The content is the following:
